Disclaimer

The forewarnings are based on the retrospective disease data available in the NADRES database. Hence, for those states where data is limited/less, the forewarning may not be realistic.

Further the forewarning will not take into consideration the control measures that are *in situ*.

Acknowledgements

I am pleased to present the Vet-Alert Bulletin of September 2026, forecasting disease risks for the month of November 2026. I express my deepest gratitude to Dr. Mangi Lal Jat, Hon'ble Secretary, DARE and Director General, ICAR, Dr. Raghavendra Bhatta, Hon'ble Deputy Director General (Animal Science), ICAR, and Dr. Divakar Hemadri, ADG (Animal Health), ICAR, New Delhi, for their invaluable guidance and support in facilitating access to critical inputs, data, and analytics that form the backbone of this bulletin.

I also express my sincere gratitude to the Secretary, Department of Animal Husbandry and Dairying (DAHD), and Dr. Naveena B. Maheswarappa, Animal Husbandry Commissioner, Department of Animal Husbandry and Dairying (DAHD), Ministry of Fisheries, Animal Husbandry and Dairying, Government of India, for providing vital livestock population data and for their invaluable support in facilitating the practical application of the analytical outcomes presented in this study.

I sincerely acknowledge the contributions of the Animal Husbandry Departments of all State Governments and the National Animal Disease Epidemiology Network (NADEN) centres, whose timely and diligent submission of livestock disease outbreak reports were crucial for disease monitoring, forecasting, and strengthening of forewarning systems. Their collaboration ensures the robustness and relevance of the information provided in this bulletin.

Finally, I extend my heartfelt thanks to the entire NADRES and NADEN team of ICAR-NIVEDI, including Dr. K. P. Suresh, Dr. S. S. Patil, Dr. Jagadish Hiremath, Dr. S. S. Jacob, and Dr. Narayanan G., as well as the SRFs, JRFs, Young Professionals, and other contractual staff contributing to predictive forecast analytics work. Their dedicated efforts in data analysis, report preparation, and maintaining high scientific standards have been invaluable in bringing out this bulletin.

Baldev R. Gulati
Director, ICAR- NIVEDI

1. About the bulletin....

Livestock sector plays a crucial role in the rural economy of India as around 20.5 million people depend upon livestock for their livelihood. Even though the investment in the livestock sector is meagre, tremendous achievements have been observed in the sector during the last decade. As it is an important component in poverty alleviation programmes, continuous emphasis is being laid on this sector for enhancing the quality of the primary and secondary products in the international market, which in turn demands improved animal health. Therefore, livestock development programmes cannot succeed unless a well-organized animal health service is built up for safeguarding the livestock against economically important diseases.

Forecasting is the scientific process of predicting future events based on historical data and current conditions, using statistical models or machine learning. It is essential for risk mitigation, resource optimization, strategic planning, and economic efficiency across various sectors. In livestock, forecasting aids in disease prediction and prevention, efficient resource allocation, and minimizing economic losses due to disease outbreaks. It also supports climate adaptation and informs policy formulation, ensuring better management of animal health and enhancing the sustainability of the livestock sector.

India has achieved significant success in the eradication of diseases like Rinderpest (RP), Contagious Bovine Pleuropneumonia (CBPP), African Horse Sickness (AHS), and Dourine. However, several other infectious and non-infectious diseases continue to cause substantial annual economic losses. Effective prevention, control, and eradication of these diseases require a deep understanding of their epidemiology and economic impact. ICAR-NIVEDI has the mandate to conduct research in veterinary epidemiology and disease informatics. India's success in eradicating RP demonstrates the country's capacity to overcome challenges, and similar efforts are essential to control and eradicate diseases such as FMD, PPR, Brucellosis, CSF, ASF, LSD and HS, which showing significant economic burdens on the livestock industry.

To address this, ICAR-NIVEDI has identified 15 priority livestock diseases based on historical incidence patterns and has developed a comprehensive database for these diseases. ICAR-NIVEDI has also created NADRES v2, an early warning system powered by Artificial Intelligence (AI), which integrates diverse datasets to forecast livestock disease risks. This system allows stakeholders, including livestock populations, farmers, and organizations, to prepare and respond promptly, minimizing the occurrence of disease outbreaks. The system combines historical disease data, livestock population figures from the 20th Livestock Census (2019), and meteorological and remotely sensed data, including 23 risk parameters like temperature, precipitation, humidity, wind velocity, and soil moisture. These data are sourced from global providers, including NASA's NCEP, CRU, and MODIS satellites. NADRES v2 utilizes 18 machine learning models trained on outbreak data, with rigorous evaluation using 11 performance metrics: Receiver Operating Characteristic (ROC), Cohen's Kappa, True Skill Statistic (TSS), Precision, Accuracy, Error Rate, Sensitivity, Specificity, F1 Score, Log Loss, and Gini Coefficient. Risk predictions are expressed as probabilities (0-1) and categorized into six levels: Very High Risk, High Risk, Moderate Risk, Low Risk, Very Low Risk, and No Risk. These forecasts provide district-level risk assessments for livestock diseases across 755 districts in India, with predictions made two months in advance.

This forewarning is compiled into a bulletin that alerts Animal Husbandry Departments at both the national and state levels, prompting appropriate control measures. The forewarning bulletin serves as a valuable tool for field veterinarians, helping them implement preventive and control measures that reduce the occurrence of livestock disease outbreaks.

The detailed methodology for forewarning of livestock diseases is available at this link

https://nivedi.res.in/Nadres_v2/bulletin.php

2. Livestock disease risk forewarning for India for the month of November 2026

The livestock disease risk forewarning of **September 2026** predicts that **1,404** disease risk events across India are likely to experience high to very high risk of disease outbreaks in **November 2026**. Jharkhand (234 disease risk events predicted), Uttar Pradesh (232 disease risk events predicted), Assam (120 disease risk events predicted), Karnataka (69 disease risk events predicted), and Kerala (68 disease risk events predicted) are the top 5 states projected to experience significant outbreaks.

The most predicted outbreaks for the top few diseases for **November 2026** include: S&G Pox (267outbreaks), Trypanosomiasis (150 outbreaks) Theileriosis (135 outbreaks), Babesiosis (133 outbreaks), and FMD (132 outbreaks). These findings demonstrate the importance of targeted preventive measures in the most vulnerable districts. The predicted disease outbreaks, systematically categorized and visualized by disease (Fig. 1) and by state (Fig. 2), are presented above.

These diseases represent a significant threat to livestock health with potential implications for animal productivity, welfare, and regional economies. To mitigate the anticipated risks, a comprehensive disease management strategy is required, incorporating enhanced epidemiological surveillance, targeted vaccination programs, and robust biosecurity measures. Timely and scientifically guided interventions will be critical to minimizing the economic and zoonotic impacts of these livestock diseases across affected regions.

III. Spatial distribution of district level livestock disease risk forewarning for specific diseases

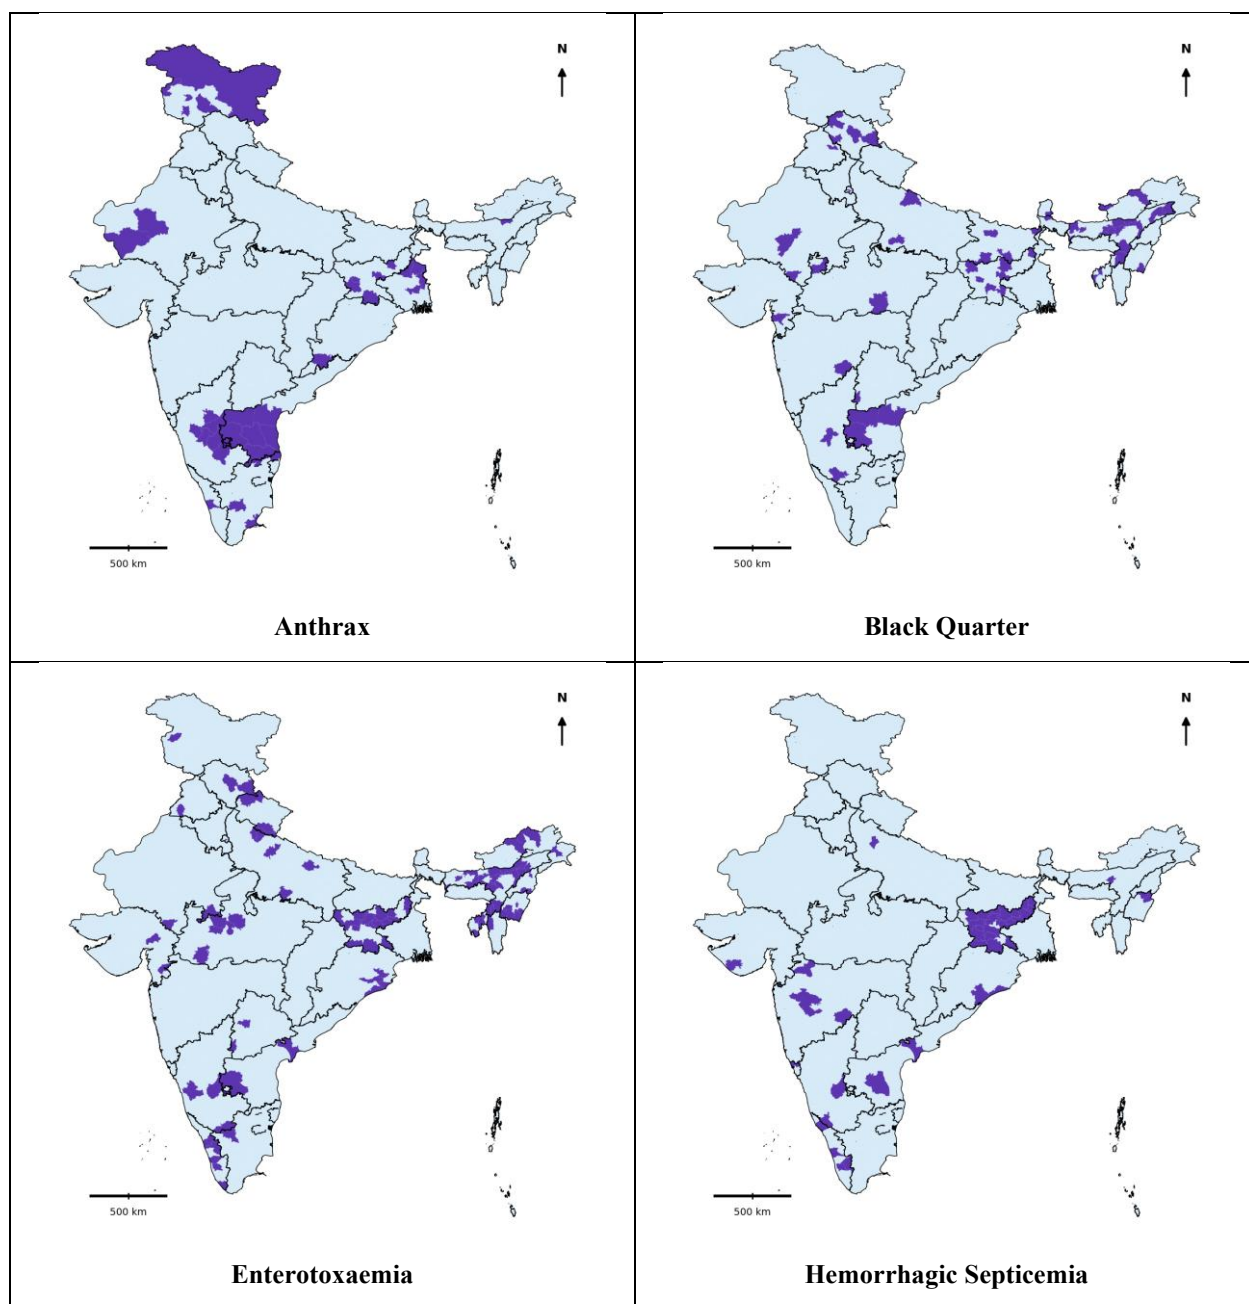

A) District level spatial distribution maps of prediction of risk for major viral diseases forewarnings for November 2026

***B) District level spatial distribution maps of prediction of risk for major parasitic diseases
forewarnings for November 2026***

C) District level spatial distribution maps of prediction of risk for major bacterial disease forewarnings for November 2026

IV. General Risk Mitigation/Risk Communication Strategies

A. Vaccination Drives

- Conduct ring vaccination campaigns within a 3-5 km radius in affected areas using suitable vaccines for specific diseases, wherever feasible.
- Administer primary vaccinations at the recommended age, followed by booster doses annually or as advised.
- Vaccinate animals in endemic zones to prevent outbreaks, ensuring age-appropriate and serotype-specific vaccinations.

B. Disease Surveillance

- Implement regular monitoring and reporting of unusual mortality or symptoms in livestock.
- Enforce strict biosecurity protocols, including controlled farm access, equipment disinfection, and quarantine for newly introduced animals.
- Control vector populations through integrated management practices, including tick control, fly-proof shelters, and molluscicide use in snail-infested areas.

C. Awareness Programs

- Educate farmers on proper disposal methods for infected carcasses, such as incineration or deep burial with lime.
- Raise awareness about avoiding high-risk practices such as feeding swill to pigs or grazing in infected or waterlogged areas.
- Promote hygiene and sanitation measures include disinfection of contaminated areas and restrictions on animal movement in and out of affected zones.

D. Capacity-Building and Training Programs

- Conduct workshops and training sessions for veterinarians, farmers, and animal health workers on disease identification, prevention, and management techniques.
- Develop skill enhancement programs for using modern diagnostic tools and biosecurity measures effectively.
- Provide hands-on training on vaccination procedures, carcass disposal methods, and managing outbreaks to ensure timely and accurate responses.
- Regularly track the SMS alerts sent to farmers and veterinarians and implement control measures.

3. State-wise Livestock Disease Risk Forewarning for November 2026

Union Territories

3.1. Andaman & Nicobar

The livestock disease forecast for **Andaman & Nicobar** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **1** district is at **high risk** for **PPR** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 1 District of Andaman & Nicobar for November 2026

Sl. No.	Disease Name	Name of District
1.	Peste des Petits Ruminants	Nicobars

3.2. Daman & Diu

The livestock disease forecast for **Daman & Diu** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **2** districts are at **very high risk** for **BQ and S&G Pox** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 2 District of Daman & Diu for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Black Quarter	Diu
2.	Sheep and Goat pox	Daman

3.3. Delhi

The livestock disease forecast for **Delhi** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **10** districts are at **very high risk** for **BQ, ET, PPR, S&G Pox and Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 10 Districts of Delhi for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Black Quarter	Central Delhi, New Delhi and West
2.	Enterotoxaemia	Central Delhi and New Delhi
3.	Peste des Petits Ruminants	Central Delhi, East, New Delhi, North East, North West, Shahdara and South
4.	Sheep and Goat pox	Central Delhi, New Delhi, North West and West
5.	Trypanosomiasis	Central Delhi, East, New Delhi, North, North East, North West, Shahdara, South West and West

3.4. Jammu & Kashmir

The livestock disease forecast for **Jammu & Kashmir** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **24** districts are at **very high risk** for **Anthrax, BT, ET, FMD, LSD, PPR and S&G Pox** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 24 Districts of Jammu & Kashmir for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Anthrax	Kishtwar, Leh, Muzaffarabad, Pulwama, Reasi and Srinagar
2.	Bluetongue	Bandipore, Doda, Ganderbal, Jammu, Kargil, Kathua, Kishtwar, Kulgam, Kupwara, Leh, Mirpur, Muzaffarabad, Pulwama, Punch, Rajouri, Ramban, Reasi, Samba and Shupiyan
3.	Enterotoxaemia	Kupwara
4.	Foot and Mouth Disease	Kathua
5.	Lumpy Skin Disease	Anantnag, Badgam, Baramula, Kulgam, Pulwama, Shupiyan and Srinagar
6.	Peste des Petits Ruminants	Baramula
7.	Sheep and Goat pox	Anantnag, Badgam, Bandipore, Doda, Ganderbal, Kargil, Kathua, Kishtwar, Kulgam, Kupwara, Leh, Muzaffarabad, Pulwama, Punch, Ramban, Reasi, Shupiyan and Udampur

3.5. Puducherry

The livestock disease forecast for **Puducherry** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **3** districts are at **very high risk** for **Babesiosis, FMD, HS, LSD, PPR, S&G Pox, Theileriosis and Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 3 Districts of Puducherry for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Babesiosis	Mahe and Puducherry
2.	Foot and Mouth Disease	Karaikal, Mahe and Puducherry
3.	Haemorrhagic Septicaemia	Puducherry
4.	Lumpy Skin Disease	Puducherry
5.	Peste des Petits Ruminants	Puducherry
6.	Sheep and Goat pox	Karaikal and Puducherry
7.	Theileriosis	Mahe and Puducherry
8.	Trypanosomiasis	Mahe

States

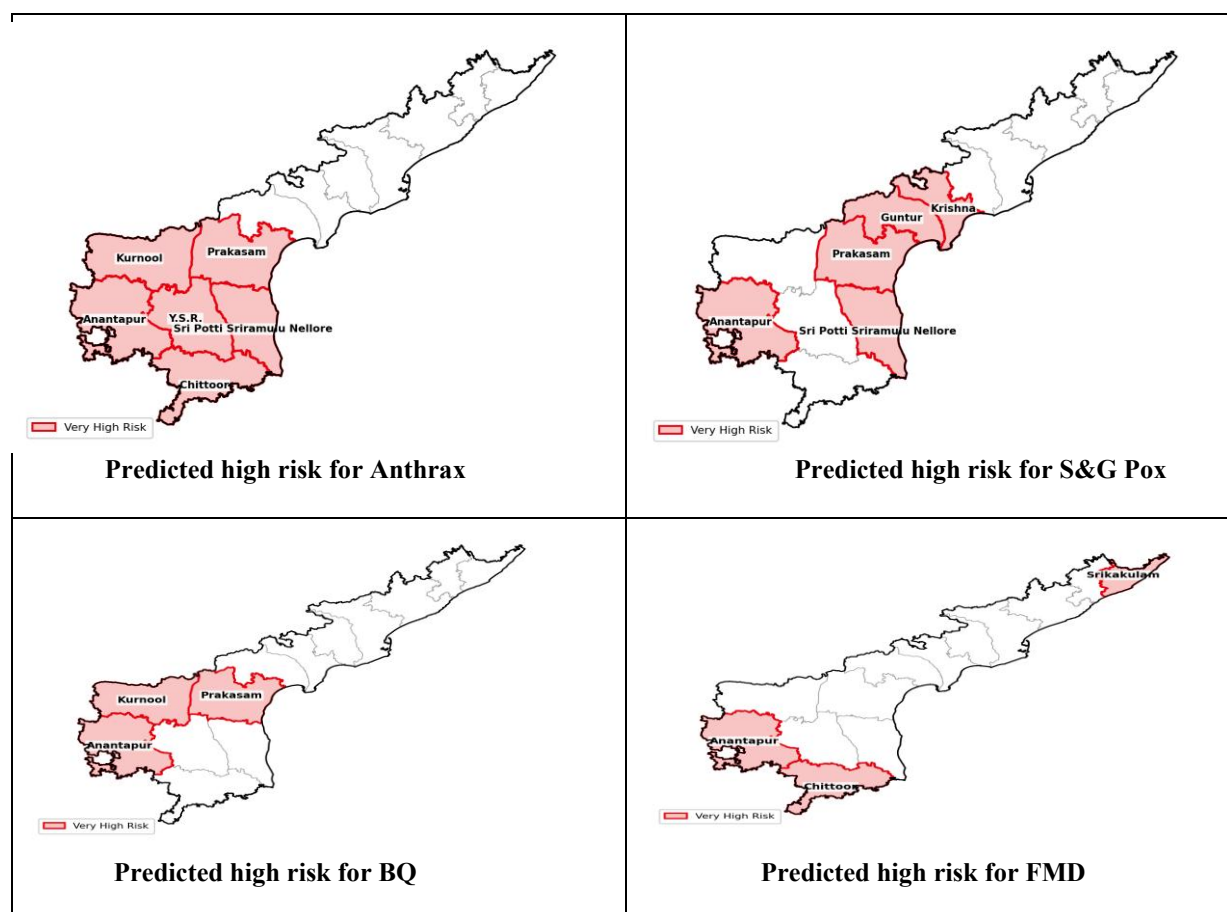

3.6. Andhra Pradesh

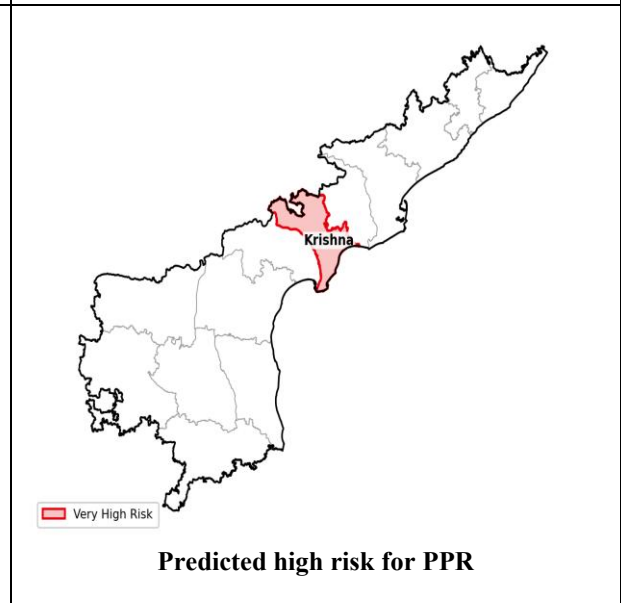

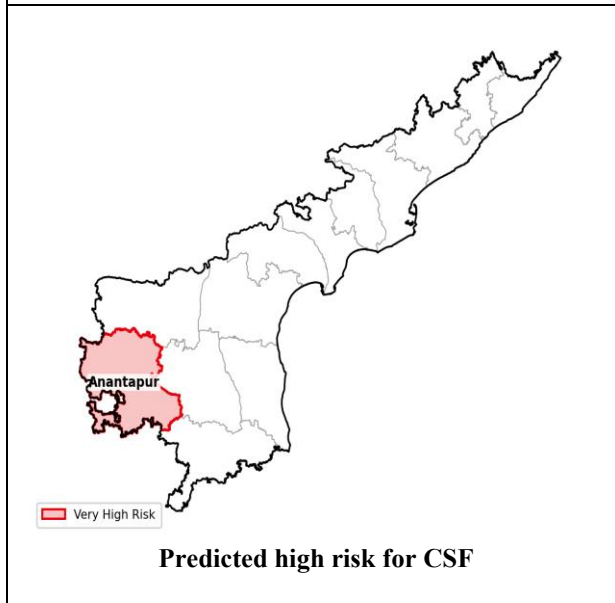

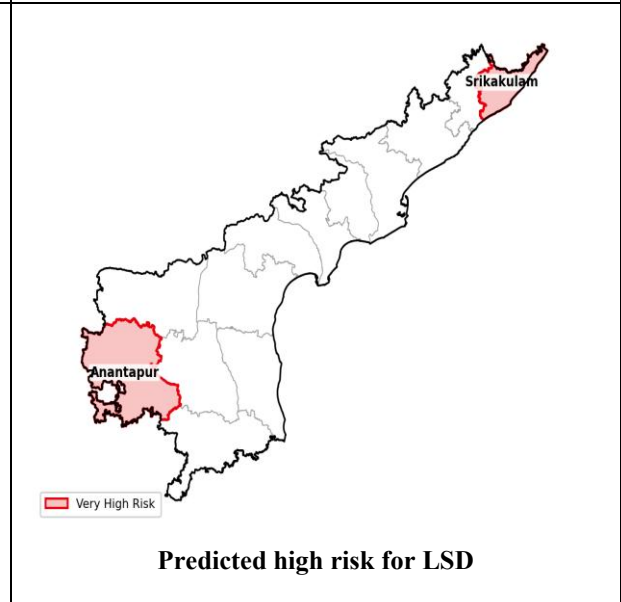

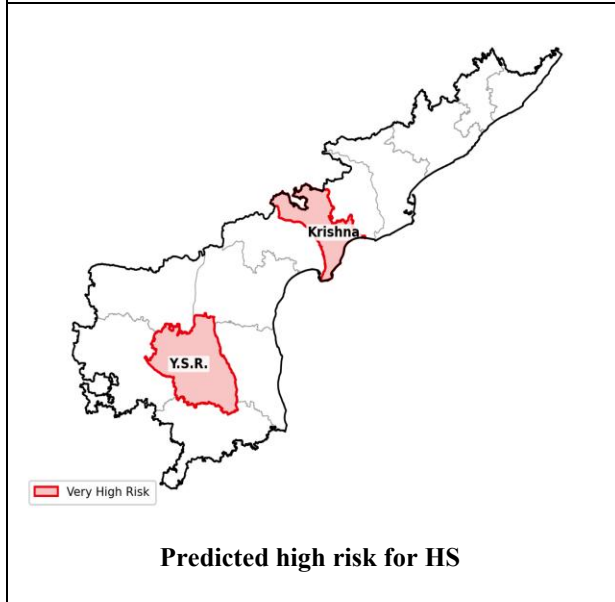

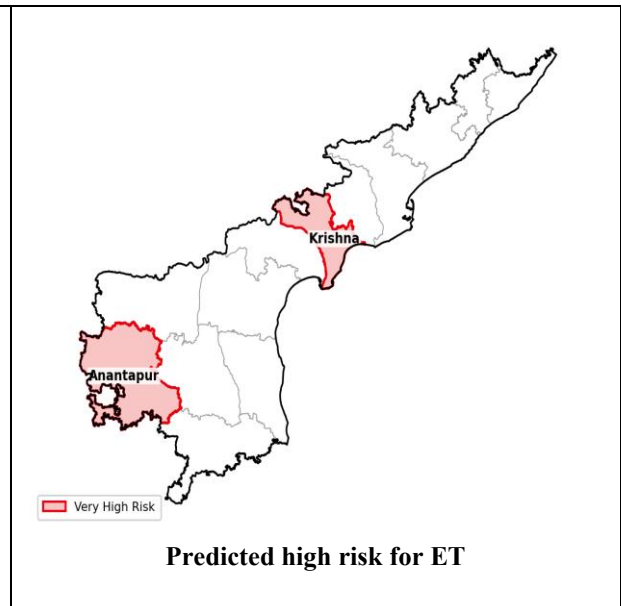

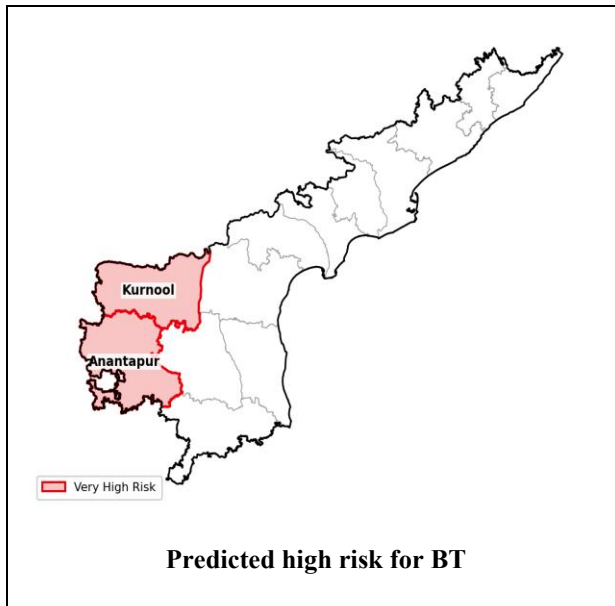

The livestock disease forecast for **Andhra Pradesh** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **9** districts are at **very high risk** for **Anthrax, BQ, BT, CSF, ET, FMD, HS, LSD, PPR** and **S&G Pox** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 9 Districts of Andhra Pradesh for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Anthrax	Anantapur, Chittoor, Kurnool, Prakasam, Sri Potti Sriramulu Nellore and Y.S.R.
2.	Black Quarter	Anantapur, Kurnool and Prakasam
3.	Bluetongue	Anantapur and Kurnool
4.	Classical Swine Fever	Anantapur
5.	Enterotoxaemia	Anantapur and Krishna
6.	Foot and Mouth Disease	Anantapur, Chittoor and Srikakulam
7.	Haemorrhagic Septicaemia	Krishna and Y.S.R.
8.	Lumpy Skin Disease	Anantapur and Srikakulam
9.	Peste des Petits Ruminants	Krishna
10.	Sheep and Goat pox	Anantapur, Guntur, Krishna, Prakasam and Sri Potti Sriramulu Nellore

II. District-wise mapping of very high-risk areas for 10 diseases in Andhra Pradesh for the month of November 2026

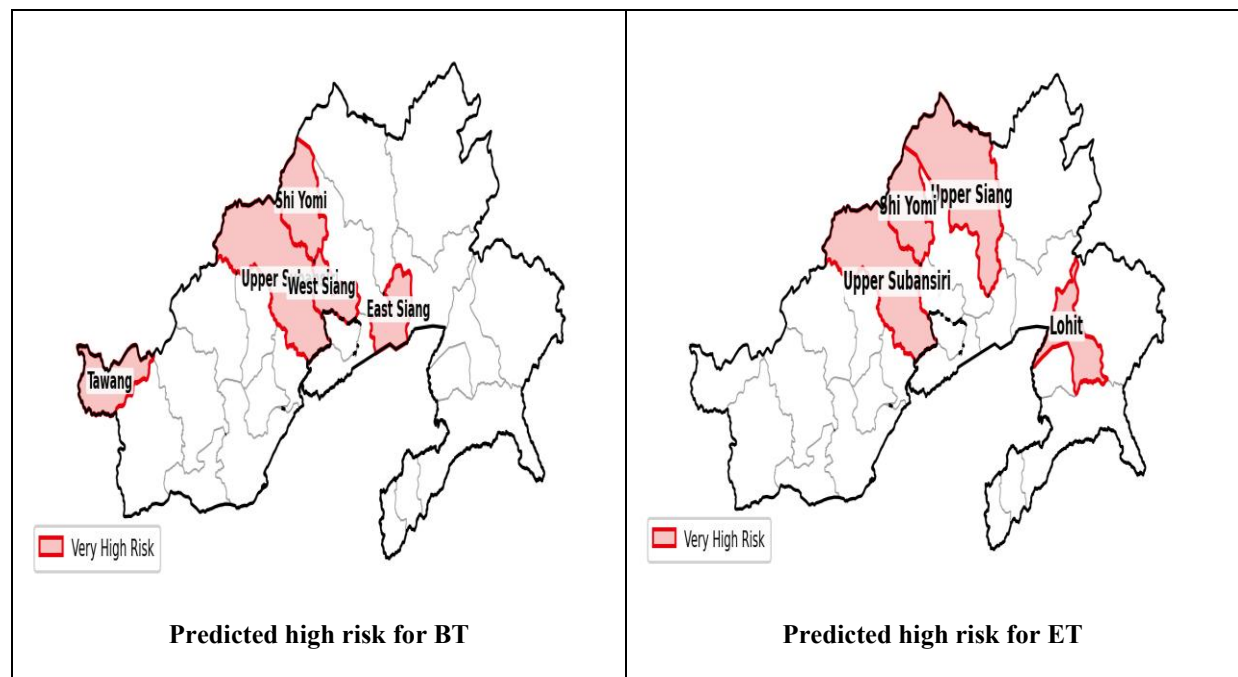

3.7. Arunachal Pradesh

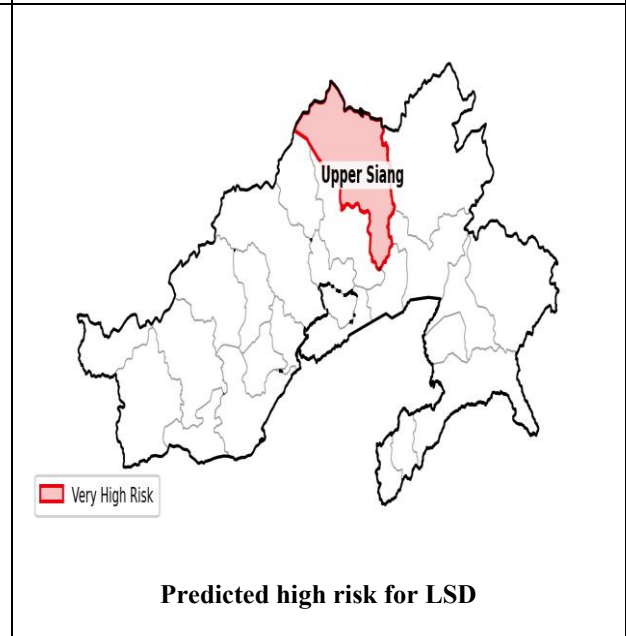

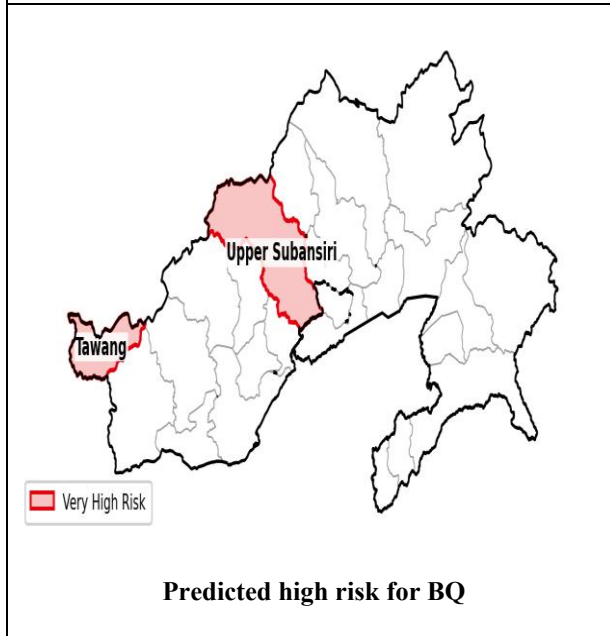

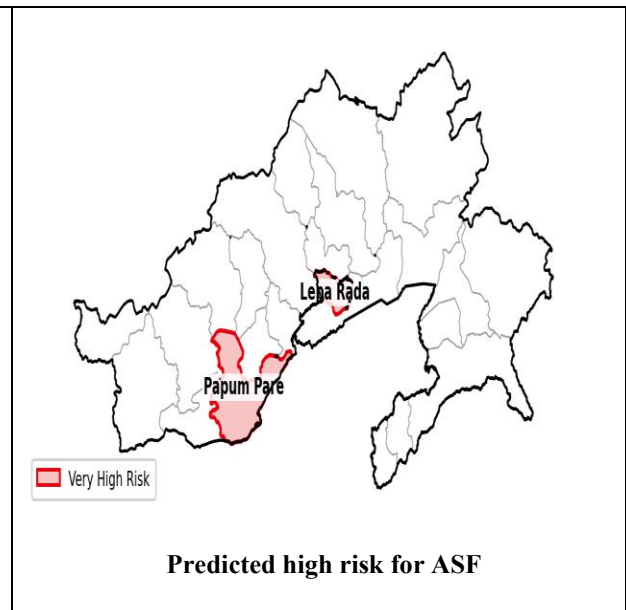

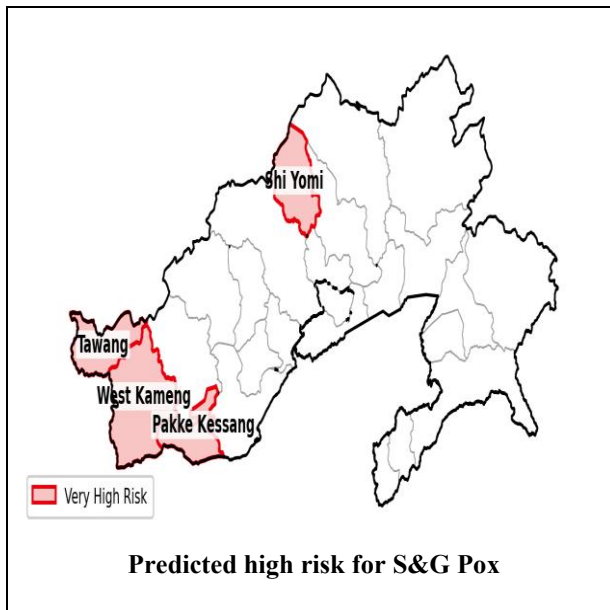

The livestock disease forecast for **Arunachal Pradesh** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **13 districts** are at **very high risk** for **ASF, BQ, BT, ET, LSD, PPR** and **S&G Pox** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 13 Districts of Arunachal Pradesh for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Lepa Rada and Papum Pare
2.	Black Quarter	Tawang and Upper Subansiri
3.	Bluetongue	Central Siang, East Siang, Shi Yomi, Tawang, Upper Subansiri and West Siang
4.	Enterotoxaemia	Dibang Valley, Lohit, Shi Yomi, Upper Siang and Upper Subansiri
5.	Lumpy Skin Disease	Upper Siang
6.	Sheep and Goat pox	Pakke Kessang, Shi Yomi, Tawang and West Kameng

II. District-wise mapping of very high-risk areas for 6 diseases in Arunachal Pradesh for the month of November 2026

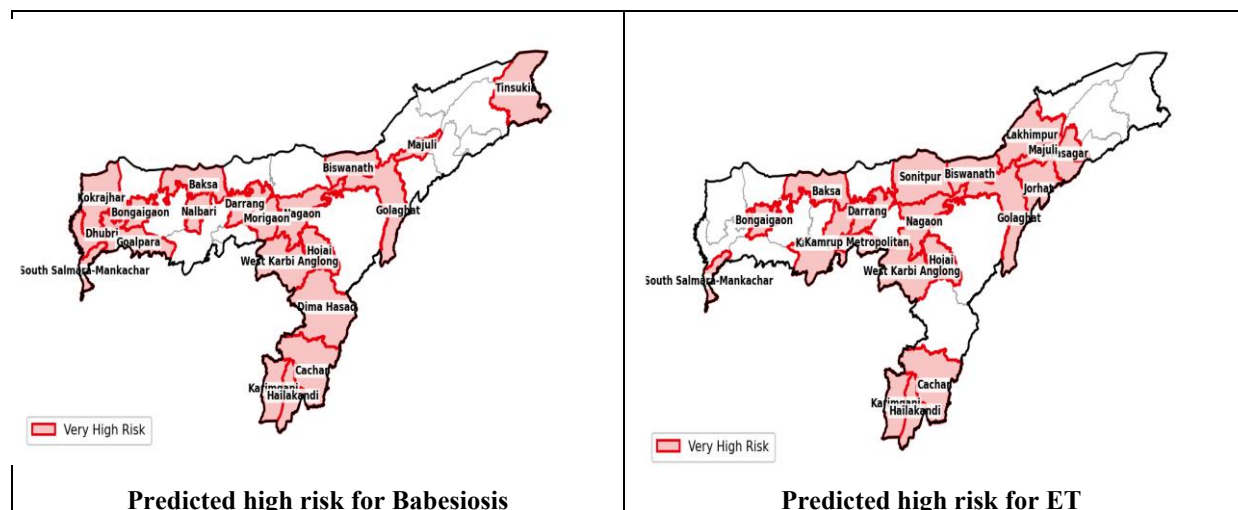

3.8. Assam

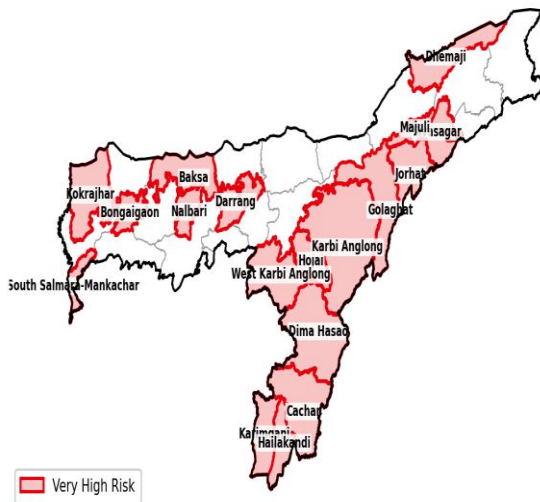

The livestock disease forecast for **Assam** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **30** districts are at **very high risk** for **ASF, Anthrax, Babesiosis, BQ, BT, CSF, ET, Fascioliasis, FMD, HS, LSD, PPR, S&G Pox** and **Theileriosis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 30 Districts of Assam for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Dibrugarh, Goalpara, Karbi Anglong, Sivasagar, Sonitpur and Udalguri
2.	Anthrax	Biswanath
3.	Babesiosis	Baksa, Biswanath, Bongaigaon, Cachar, Darrang, Dhubri, Dima Hasao, Goalpara, Golaghat, Hailakandi, Hojai, Karimganj, Kokrajhar, Majuli, Morigaon, Nagaon, Nalbari, South Salmara-Mankachar, Tinsukia and West Karbi Anglong
4.	Black Quarter	Biswanath, Bongaigaon, Cachar, Darrang, Dibrugarh, Dima Hasao, Golaghat, Hailakandi, Kamrup Metropolitan, Kokrajhar, Morigaon, Nagaon, Sivasagar, Sonitpur, South Salmara-Mankachar and Tinsukia
5.	Bluetongue	Biswanath, Darrang, Dhemaji, Lakhimpur, Majuli, Morigaon, Nalbari, Sonitpur and Udalguri
6.	Classical Swine Fever	Cachar, Darrang, Golaghat, Hailakandi, Nalbari, Sonitpur, Tinsukia and Udalguri
7.	Enterotoxaemia	Baksa, Biswanath, Bongaigaon, Cachar, Darrang, Golaghat, Hailakandi, Hojai, Jorhat, Kamrup, Kamrup Metropolitan, Karimganj, Lakhimpur, Majuli, Nagaon, Sivasagar, Sonitpur, South Salmara-Mankachar and West Karbi Anglong
8.	Fascioliasis	Jorhat, Kokrajhar and Lakhimpur
9.	Foot and Mouth Disease	Cachar, Hailakandi, Kamrup Metropolitan, Karimganj and South Salmara-Mankachar
10.	Haemorrhagic Septicaemia	Morigaon
11.	Lumpy Skin Disease	Bongaigaon, Kokrajhar, Majuli, Sivasagar and South Salmara-Mankachar
12.	Peste des Petits Ruminants	Baksa, Bongaigaon, Cachar, Darrang, Dhemaji, Dima Hasao, Golaghat, Hailakandi, Hojai, Jorhat, Karbi Anglong, Karimganj, Kokrajhar, Majuli, Nalbari, Sivasagar, South Salmara-Mankachar and West Karbi Anglong
13.	Sheep and Goat pox	Bongaigaon, Dima Hasao, Hailakandi, Kamrup, Kamrup Metropolitan, Karbi Anglong, Kokrajhar and South Salmara-Mankachar
14.	Theileriosis	Tinsukia

II. District-wise mapping of very high-risk areas for 14 diseases in Assam for the month of November 2026

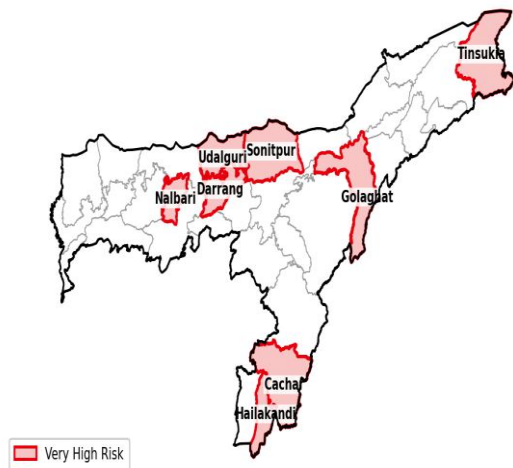

Predicted high risk for PPR

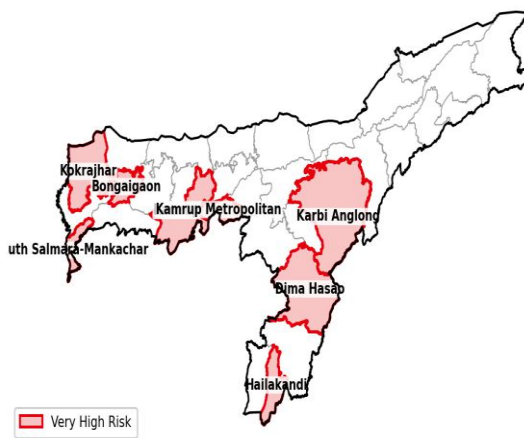

Predicted high risk for BQ

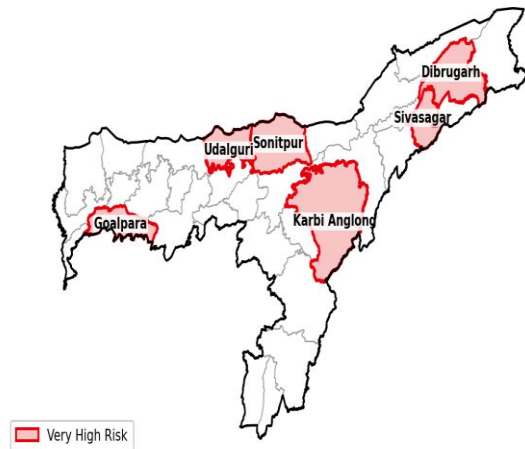

Predicted high risk for BT

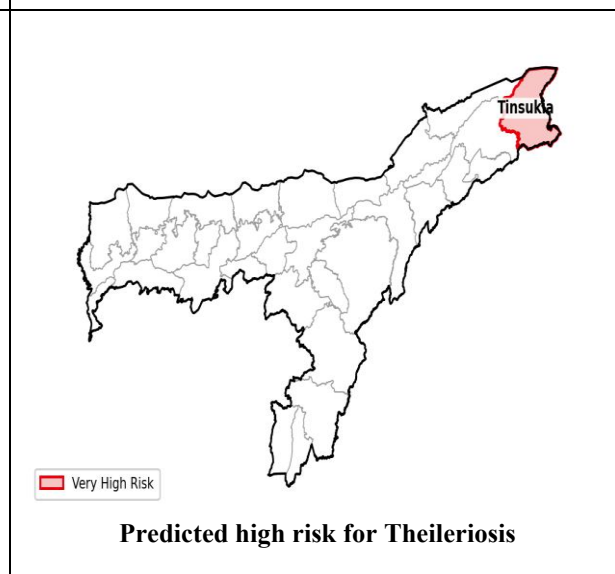

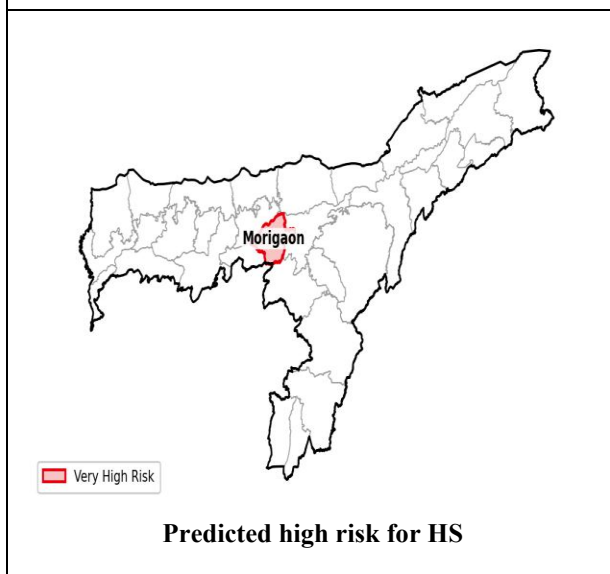

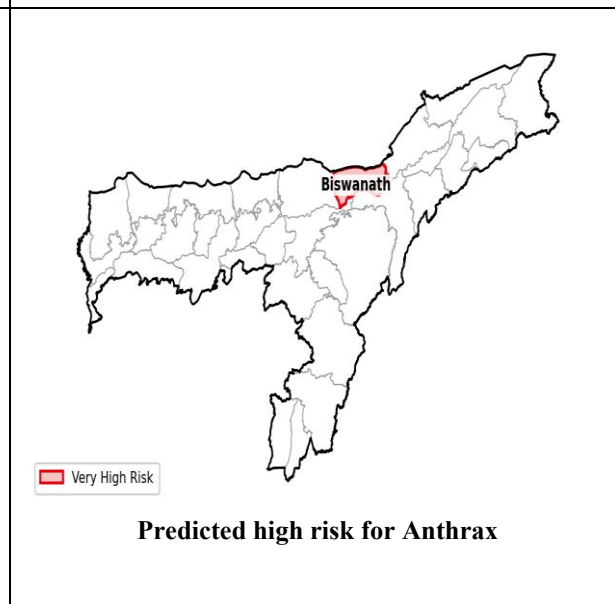

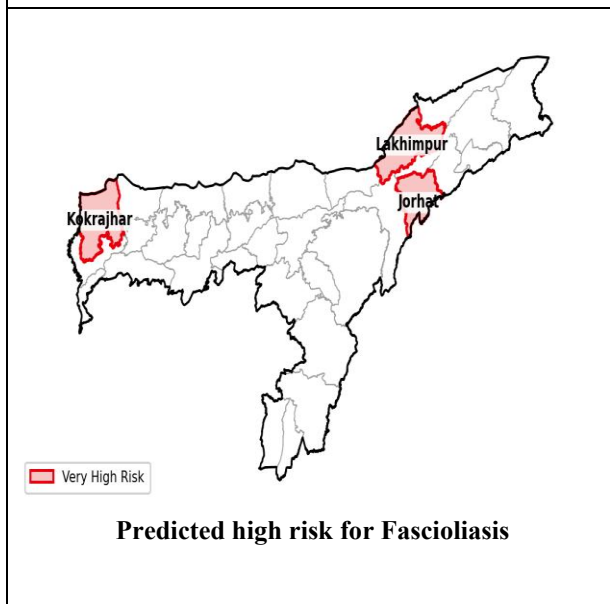

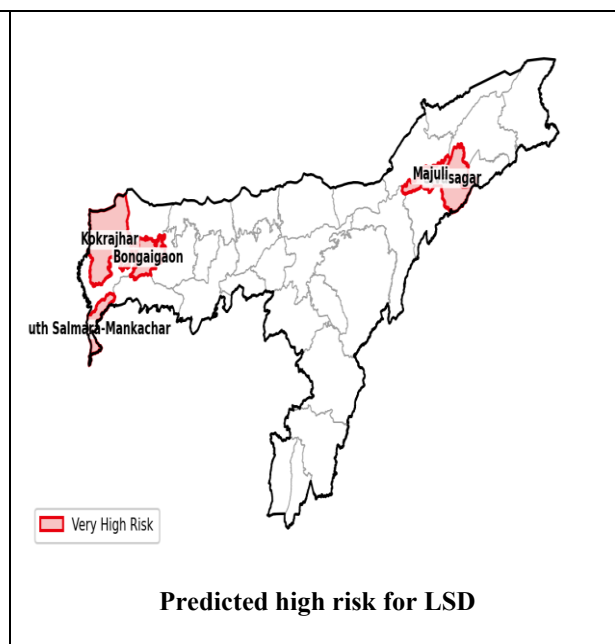

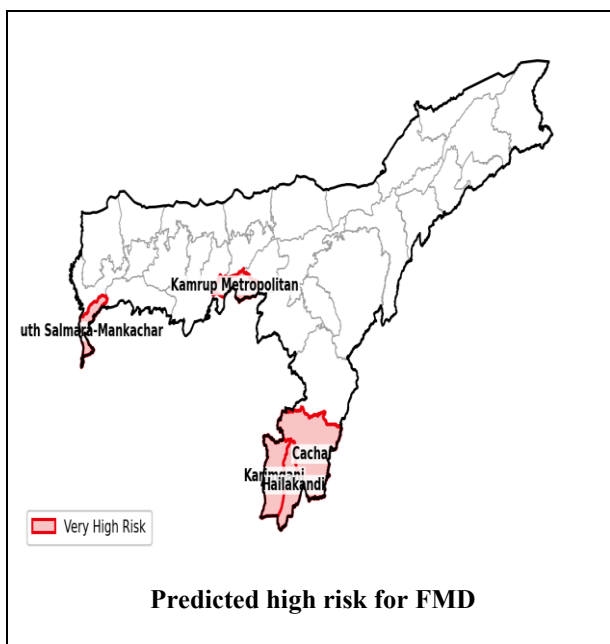

Predicted high risk for CSF

Predicted high risk for S&G Pox

Predicted high risk for ASF

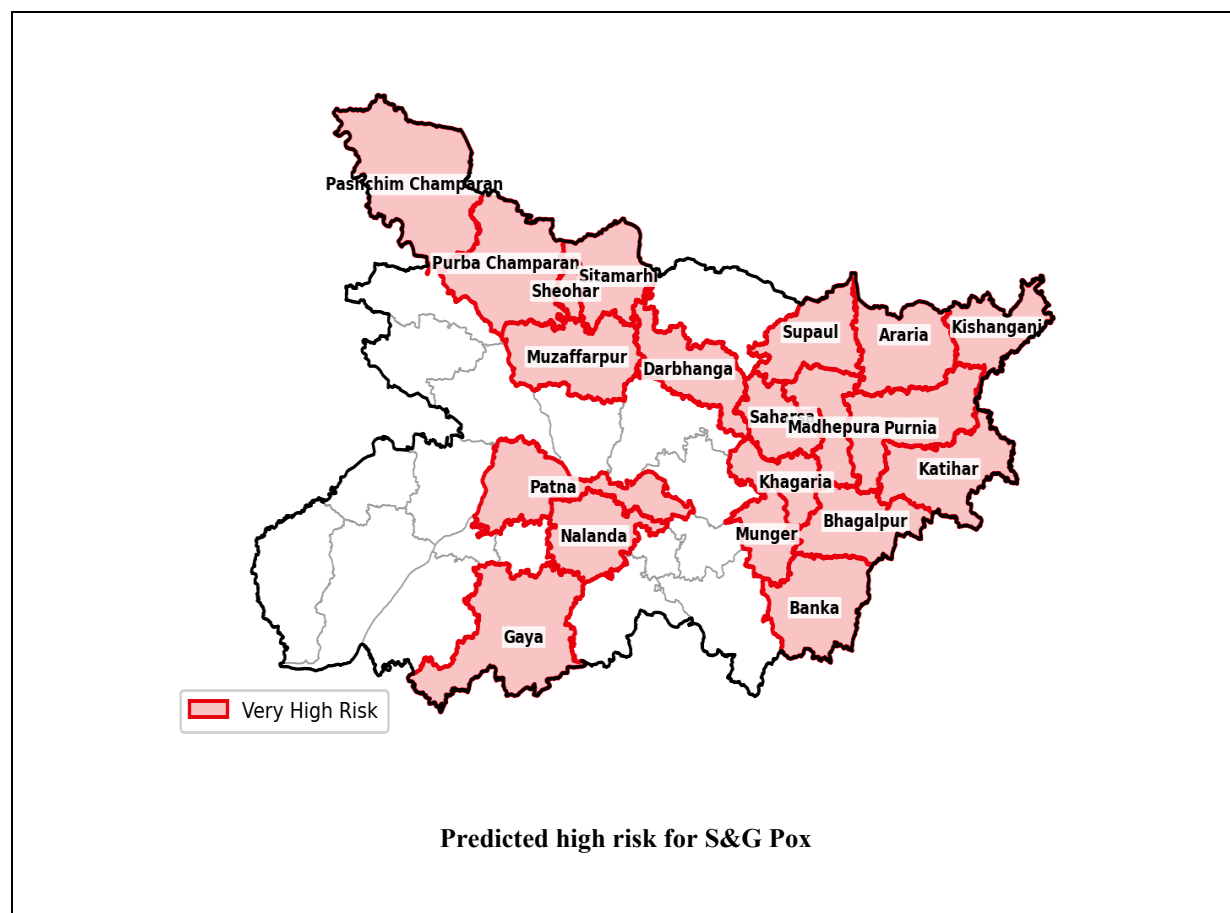

3.9. Bihar

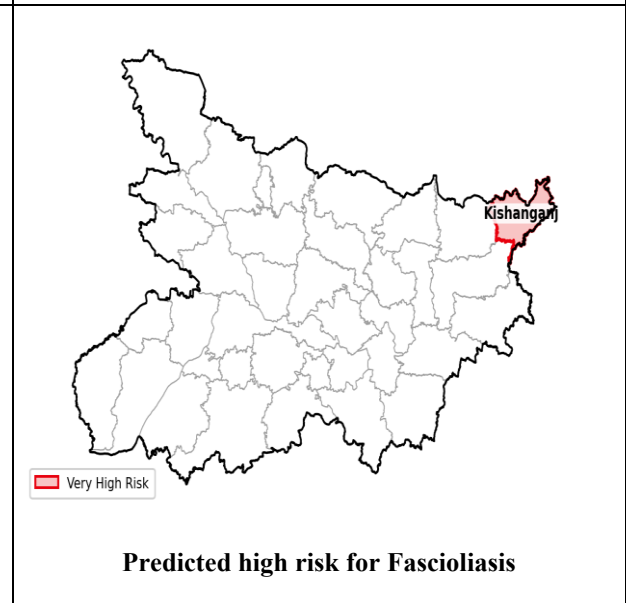

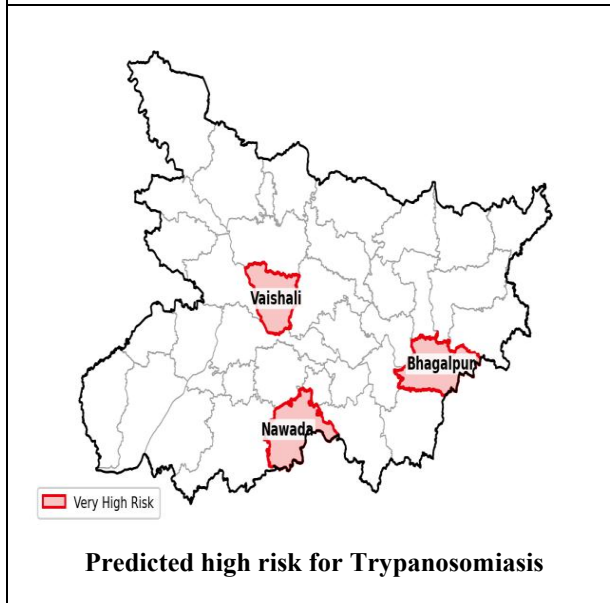

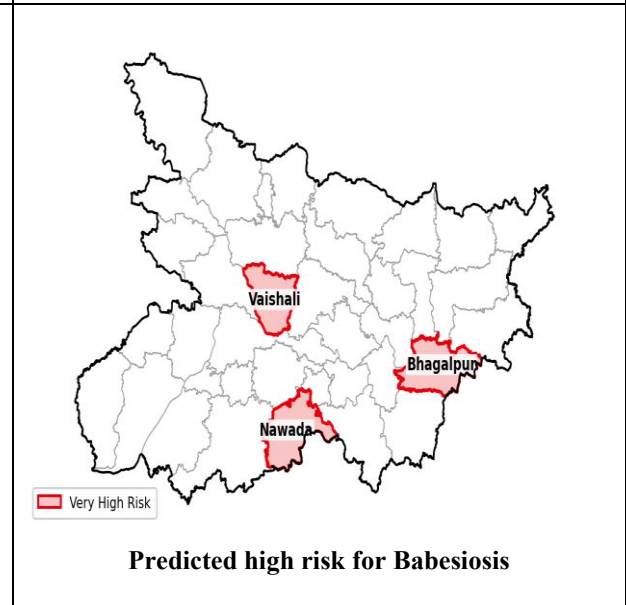

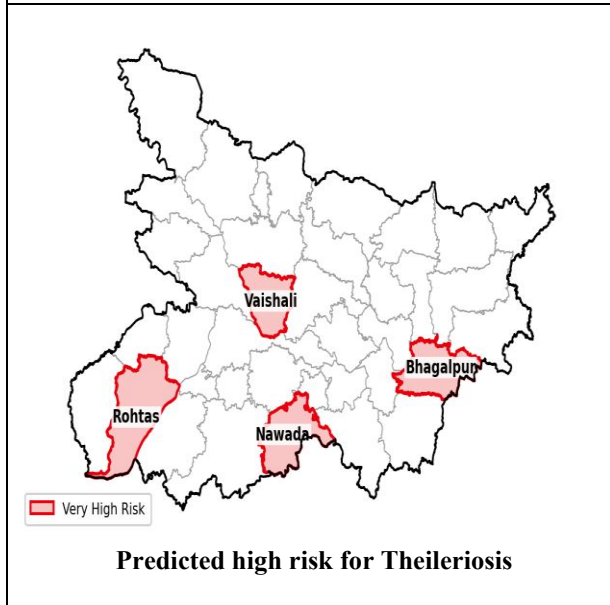

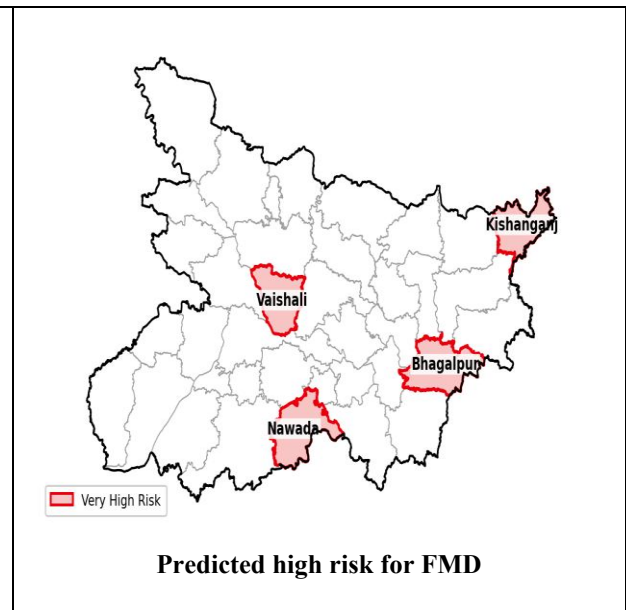

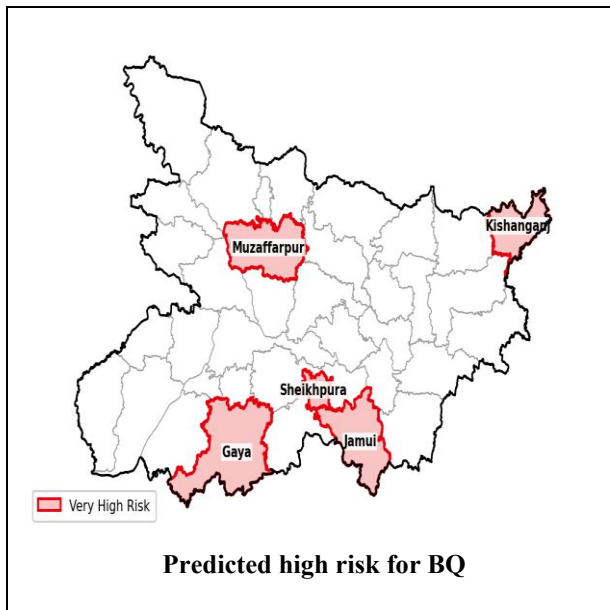

The livestock disease forecast for **Bihar** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **25 districts** are at **very high risk** for **Babesiosis, BQ, Fascioliasis, FMD, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 25 Districts of Bihar for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Babesiosis	Bhagalpur, Nawada and Vaishali
2.	Black Quarter	Gaya, Jamui, Kishanganj, Muzaffarpur and Sheikhpura
3.	Fascioliasis	Kishanganj
4.	Foot and Mouth Disease	Bhagalpur, Kishanganj, Nawada and Vaishali
5.	Sheep and Goat pox	Araria, Banka, Bhagalpur, Darbhanga, Gaya, Katihar, Khagaria, Kishanganj, Madhepura, Munger, Muzaffarpur, Nalanda, Pashchim Champaran, Patna, Purba Champaran, Purnia, Saharsa, Sheohar, Sitamarhi and Supaul
6.	Theileriosis	Bhagalpur, Nawada, Rohtas and Vaishali
7.	Trypanosomiasis	Bhagalpur, Nawada and Vaishali

II. District-wise mapping of very high-risk areas for 7 diseases in Bihar for the month of November 2026

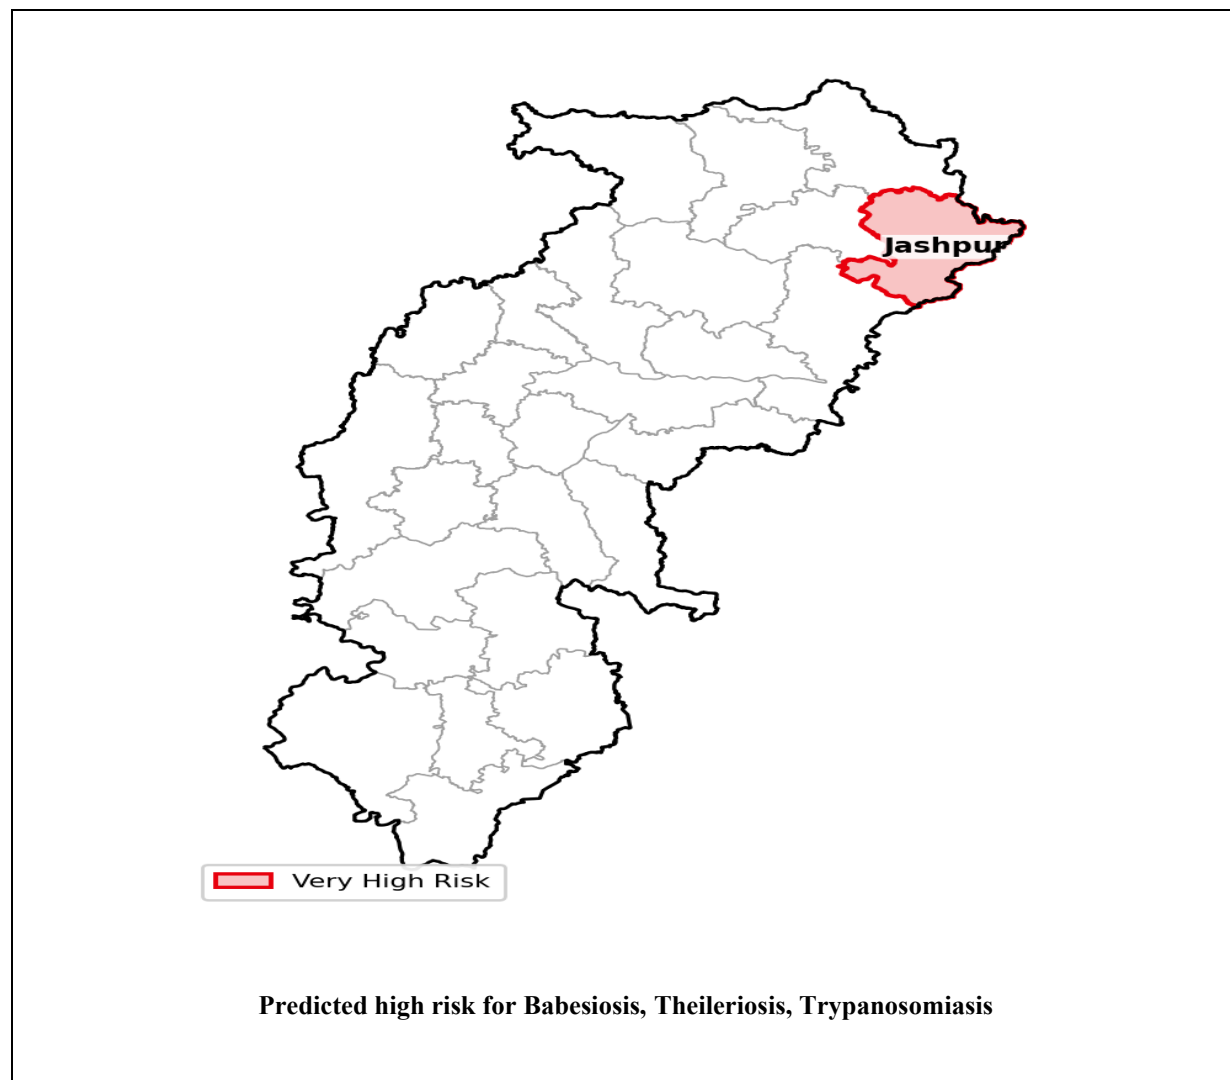

3.10. Chhattisgarh

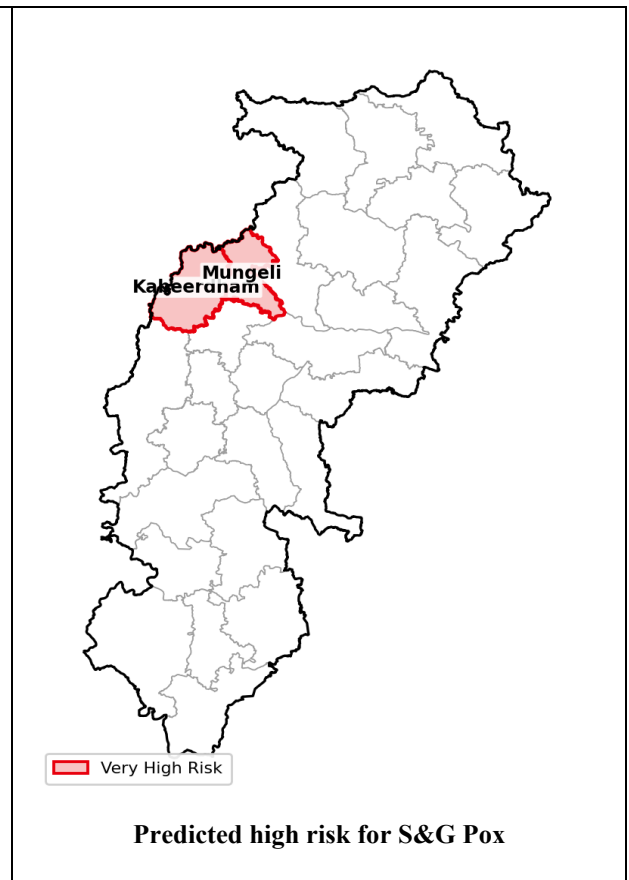

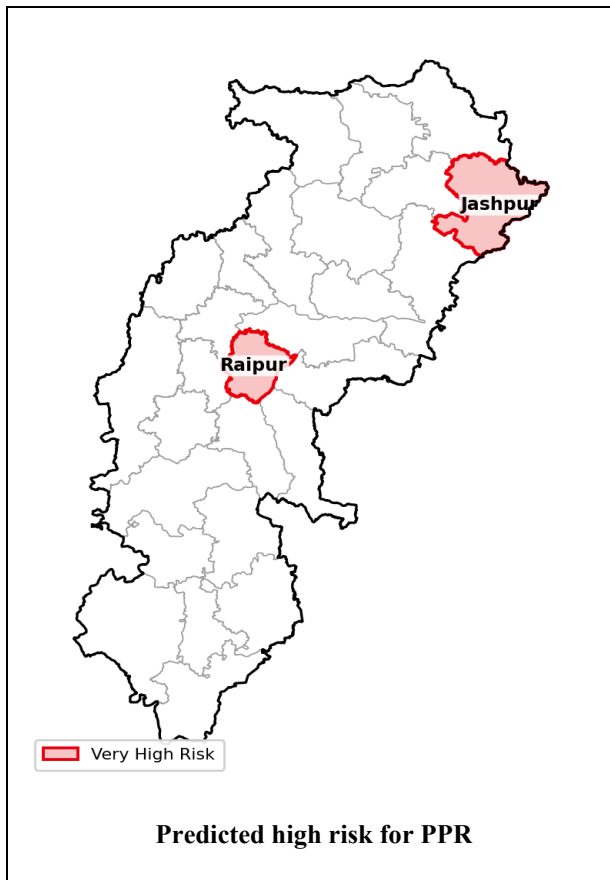

The livestock disease forecast for **Chhattisgarh** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **4** districts are at **very high risk** for **Babesiosis, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 4 Districts of Chhattisgarh for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Babesiosis	Jashpur
2.	Peste des Petits Ruminants	Jashpur and Raipur
3.	Sheep and Goat pox	Kabeerdham and Mungeli
4.	Theileriosis	Jashpur
5.	Trypanosomiasis	Jashpur

II. District-wise mapping of very high-risk areas for 5 diseases in Chhattisgarh for the month of November 2026

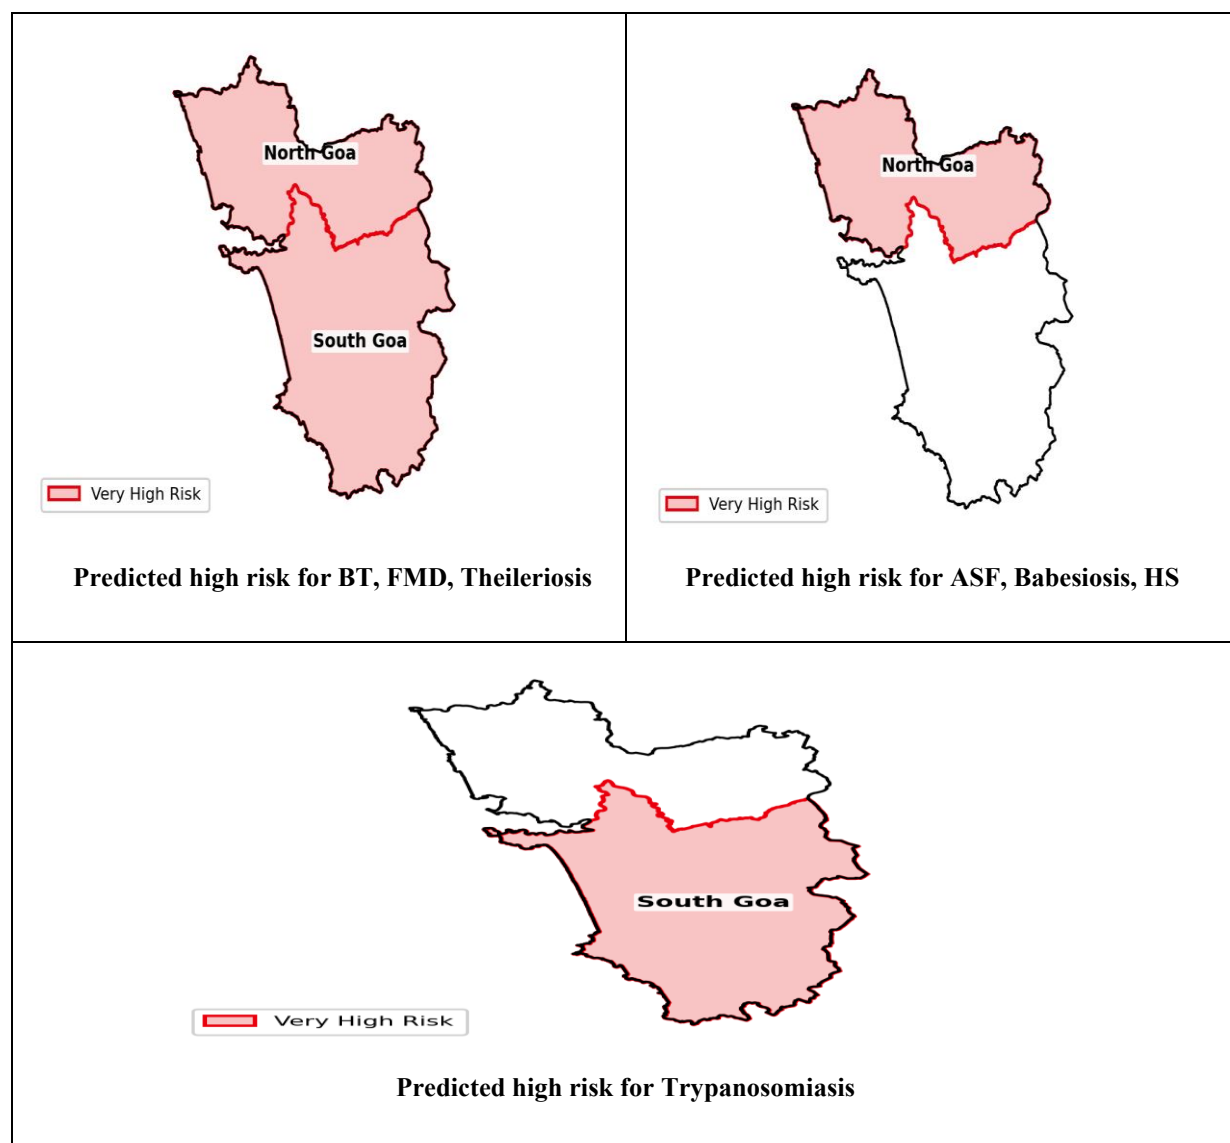

3.11. Goa

The livestock disease forecast for **Goa** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **2** districts are at **very high risk** for **ASF, Babesiosis, BT, FMD, HS, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 2 Districts of Goa for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	North Goa
2.	Babesiosis	North Goa
3.	Bluetongue	North Goa and South Goa
4.	Foot and Mouth Disease	North Goa and South Goa
5.	Haemorrhagic Septicaemia	North Goa
6.	Theileriosis	North Goa and South Goa
7.	Trypanosomiasis	South Goa

II. District-wise mapping of very high-risk areas for 7 diseases in Goa for the month of November 2026

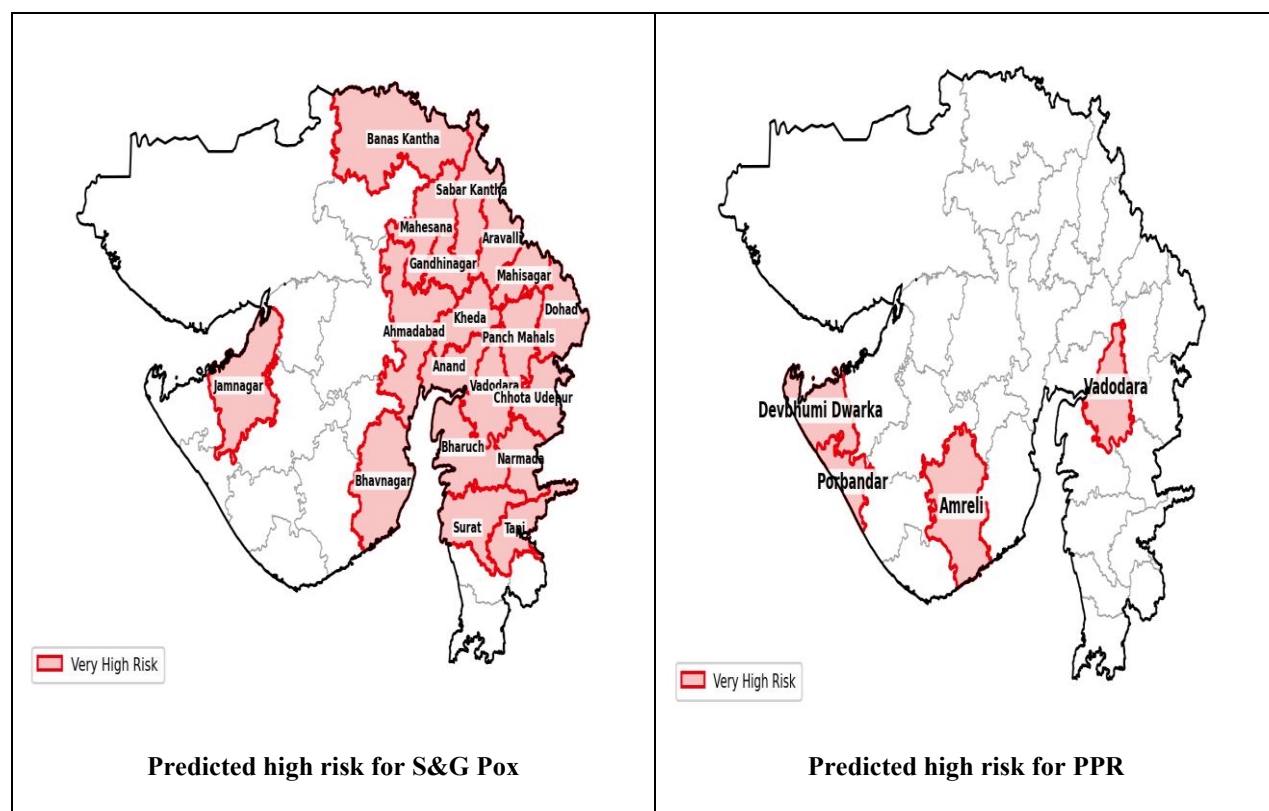

3.12. Gujarat

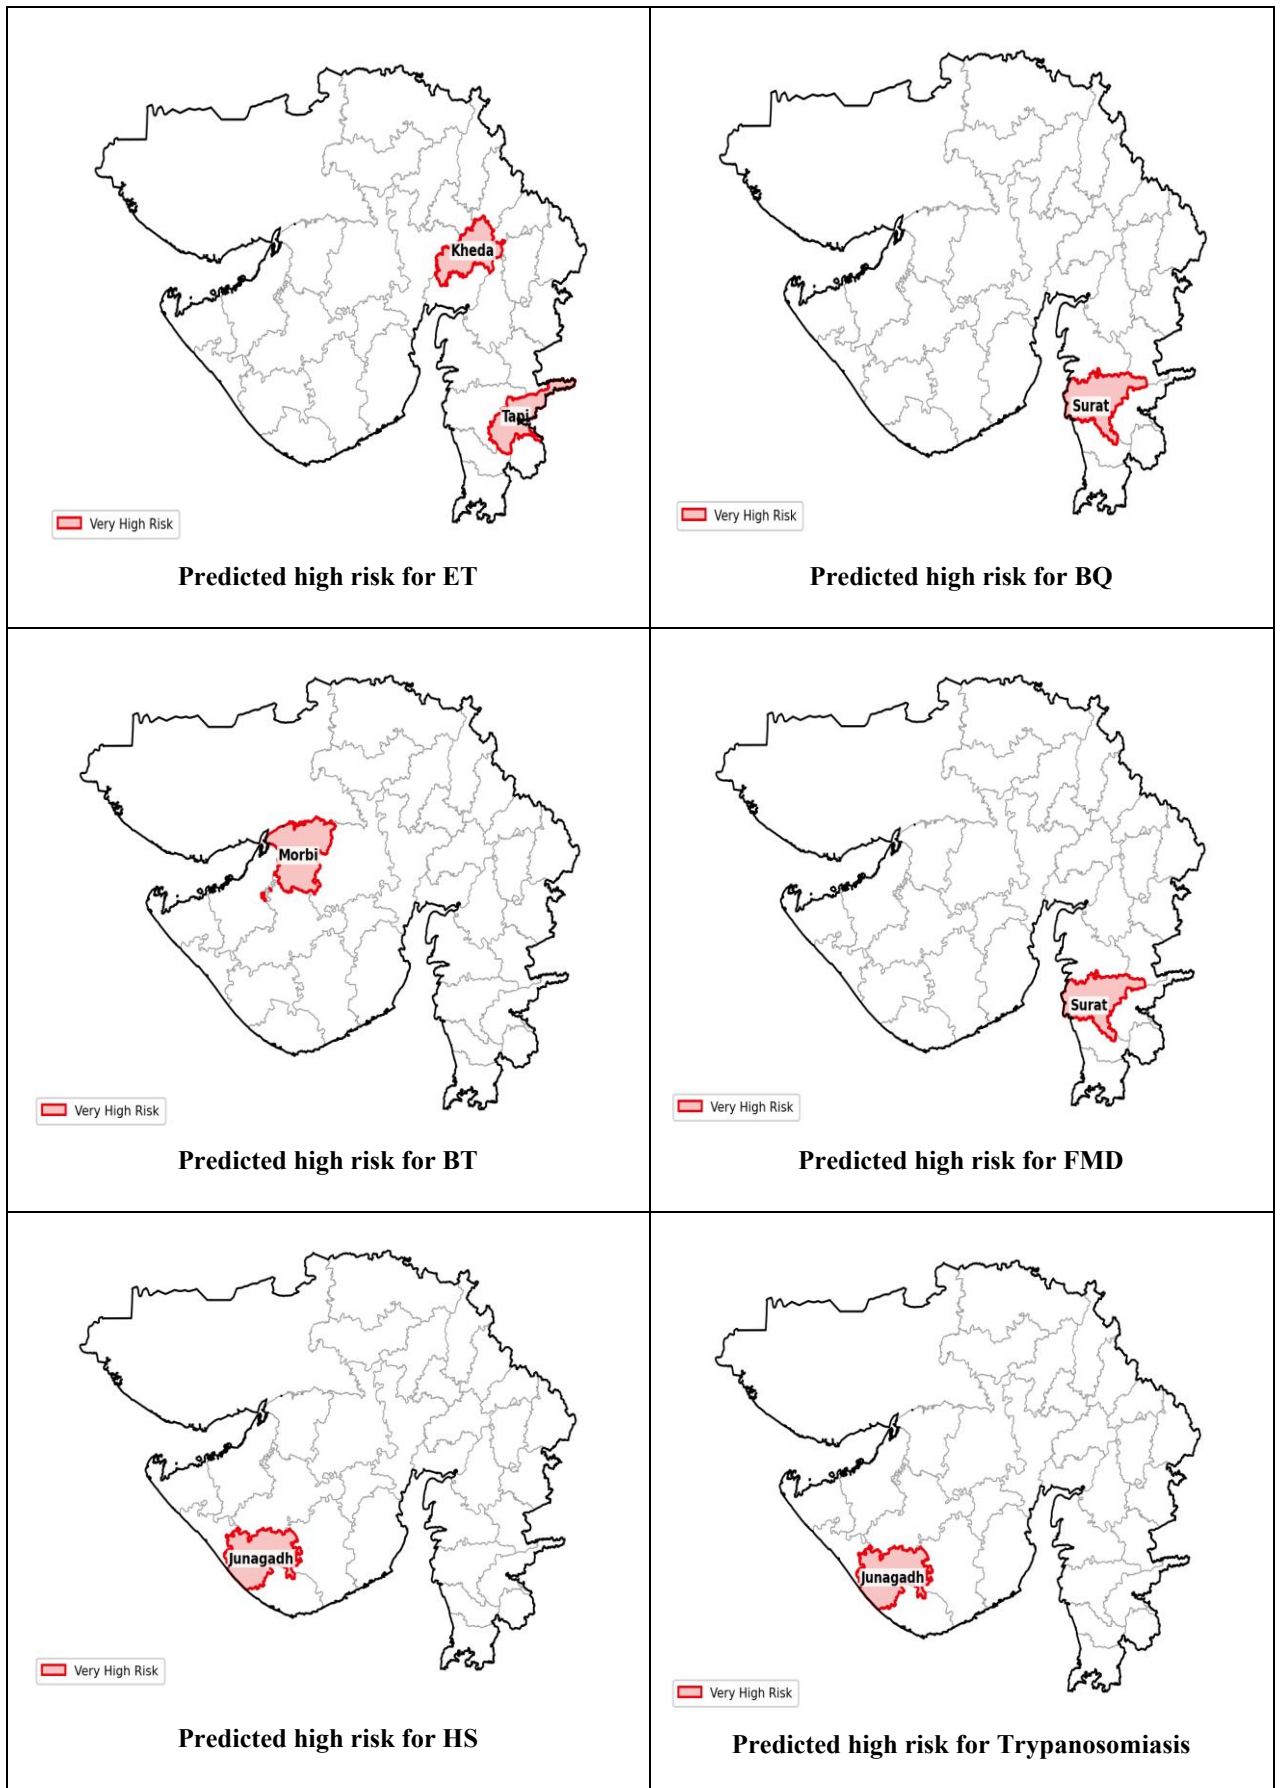

The livestock disease forecast for **Gujarat** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **24** districts are at **very high risk** for **BQ, BT, ET, FMD, HS, PPR, S&G Pox** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 24 Districts of Gujarat for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Black Quarter	Surat
2.	Bluetongue	Morbi
3.	Enterotoxaemia	Kheda and Tapi
4.	Foot and Mouth Disease	Surat
5.	Haemorrhagic Septicaemia	Junagadh
6.	Peste des Petits Ruminants	Amreli, Devbhumi Dwarka, Porbandar and Vadodara
7.	Sheep and Goat pox	Ahmadabad, Anand, Aravalli, Banas Kantha, Bharuch, Bhavnagar, Chhota Udaipur, Dohad, Gandhinagar, Jamnagar, Kheda, Mahesana, Mahisagar, Narmada, Panch Mahals, Sabar Kantha, Surat, Tapi and Vadodara
8.	Trypanosomiasis	Junagadh

II. District-wise mapping of very high-risk areas for 8 diseases in Gujarat for the month of November 2026

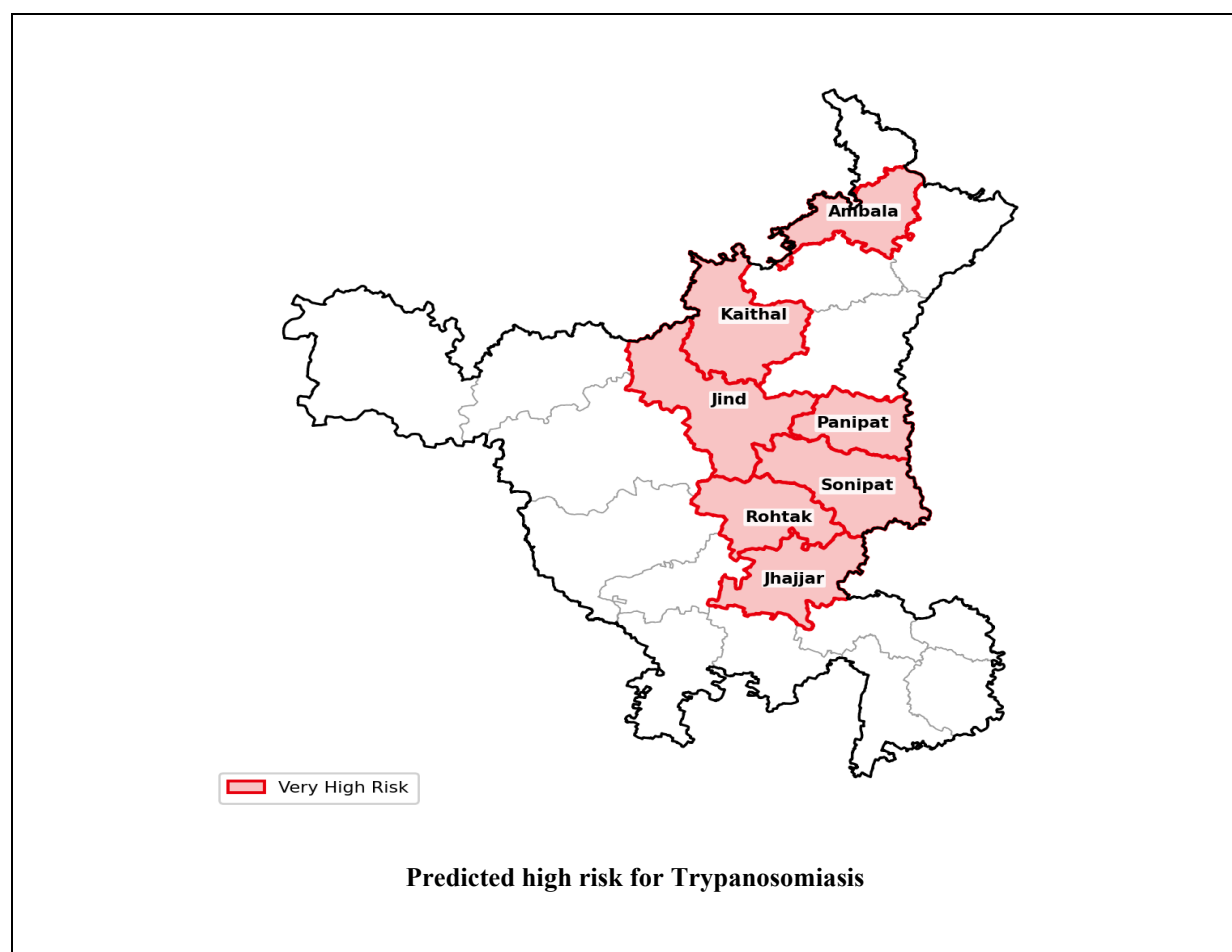

3.13. Haryana

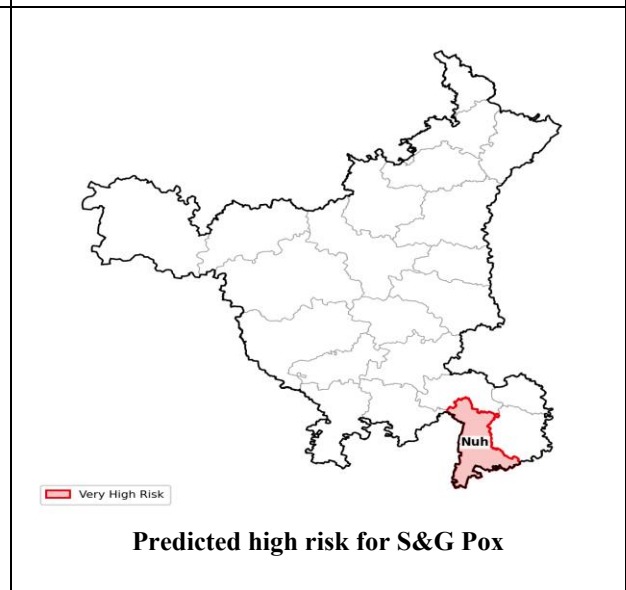

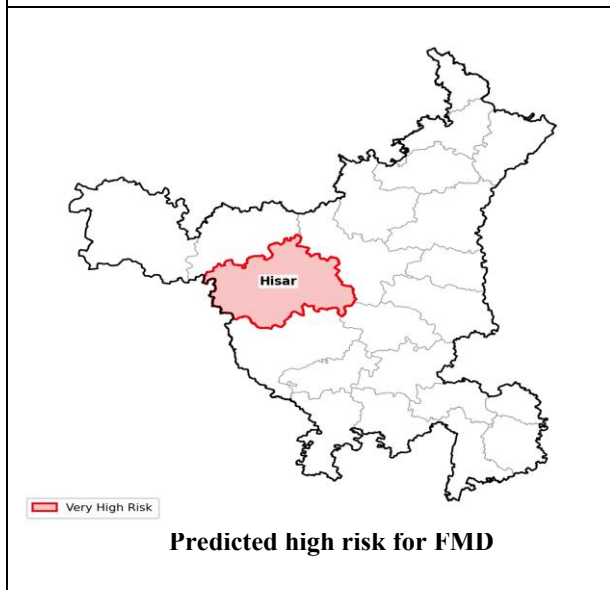

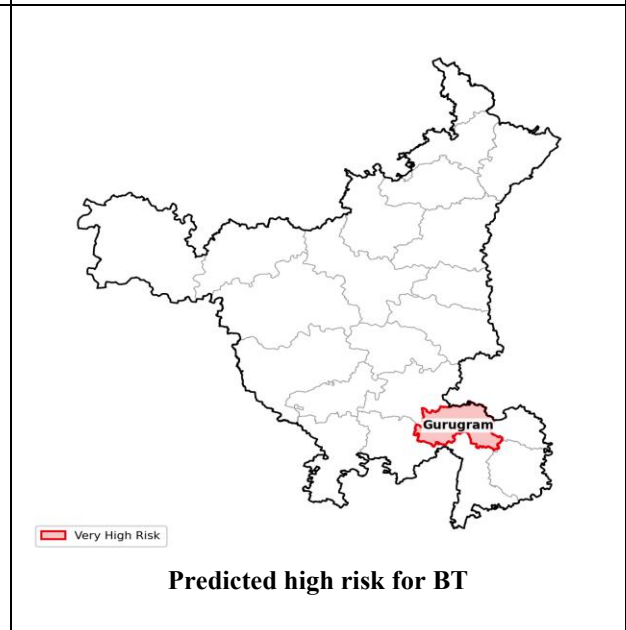

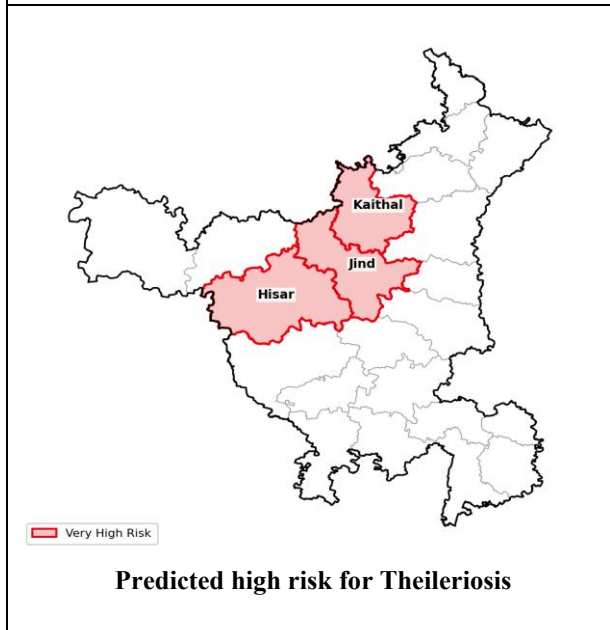

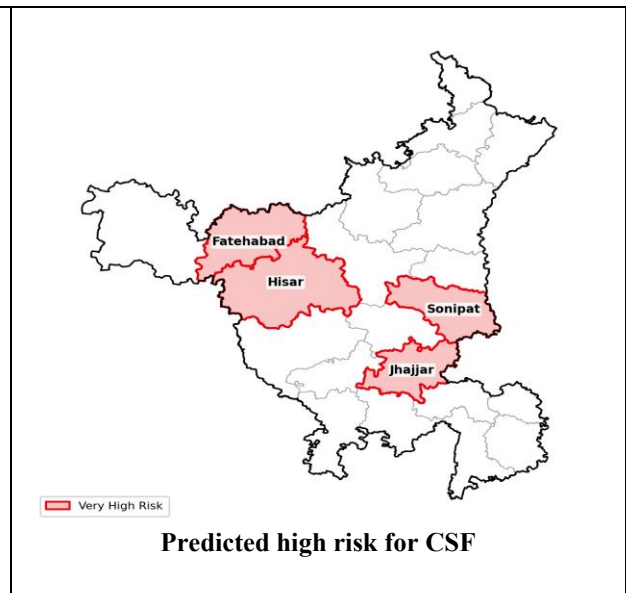

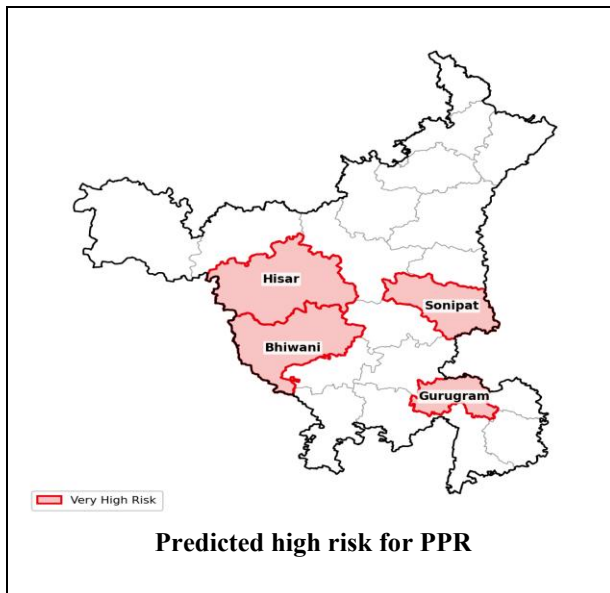

The livestock disease forecast for **Haryana** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **13** districts are at **very high risk** for **BT, CSF, FMD, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 13 Districts of Haryana for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Bluetongue	Gurugram and Hanumangarh
2.	Classical Swine Fever	Fatehabad, Hisar, Jhajjar and Sonipat
3.	Foot and Mouth Disease	Hisar
4.	Peste des Petits Ruminants	Bhiwani, Gurugram, Hanumangarh, Hisar and Sonipat
5.	Sheep and Goat pox	Nuh
6.	Theileriosis	Hisar, Jind and Kaithal
7.	Trypanosomiasis	Ambala, Jhajjar, Jind, Kaithal, Panipat, Rohtak and Sonipat

II. District-wise mapping of very high-risk areas for 7 diseases in Haryana for the month of November 2026

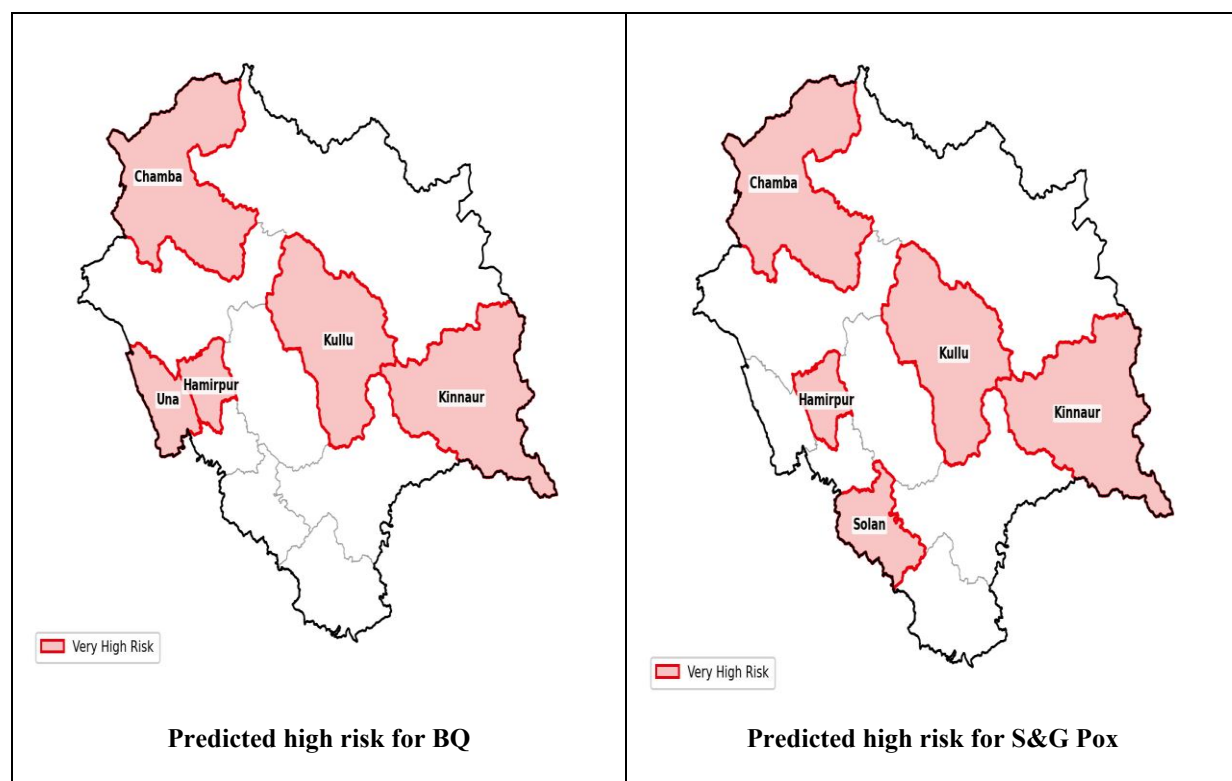

3.14. Himachal Pradesh

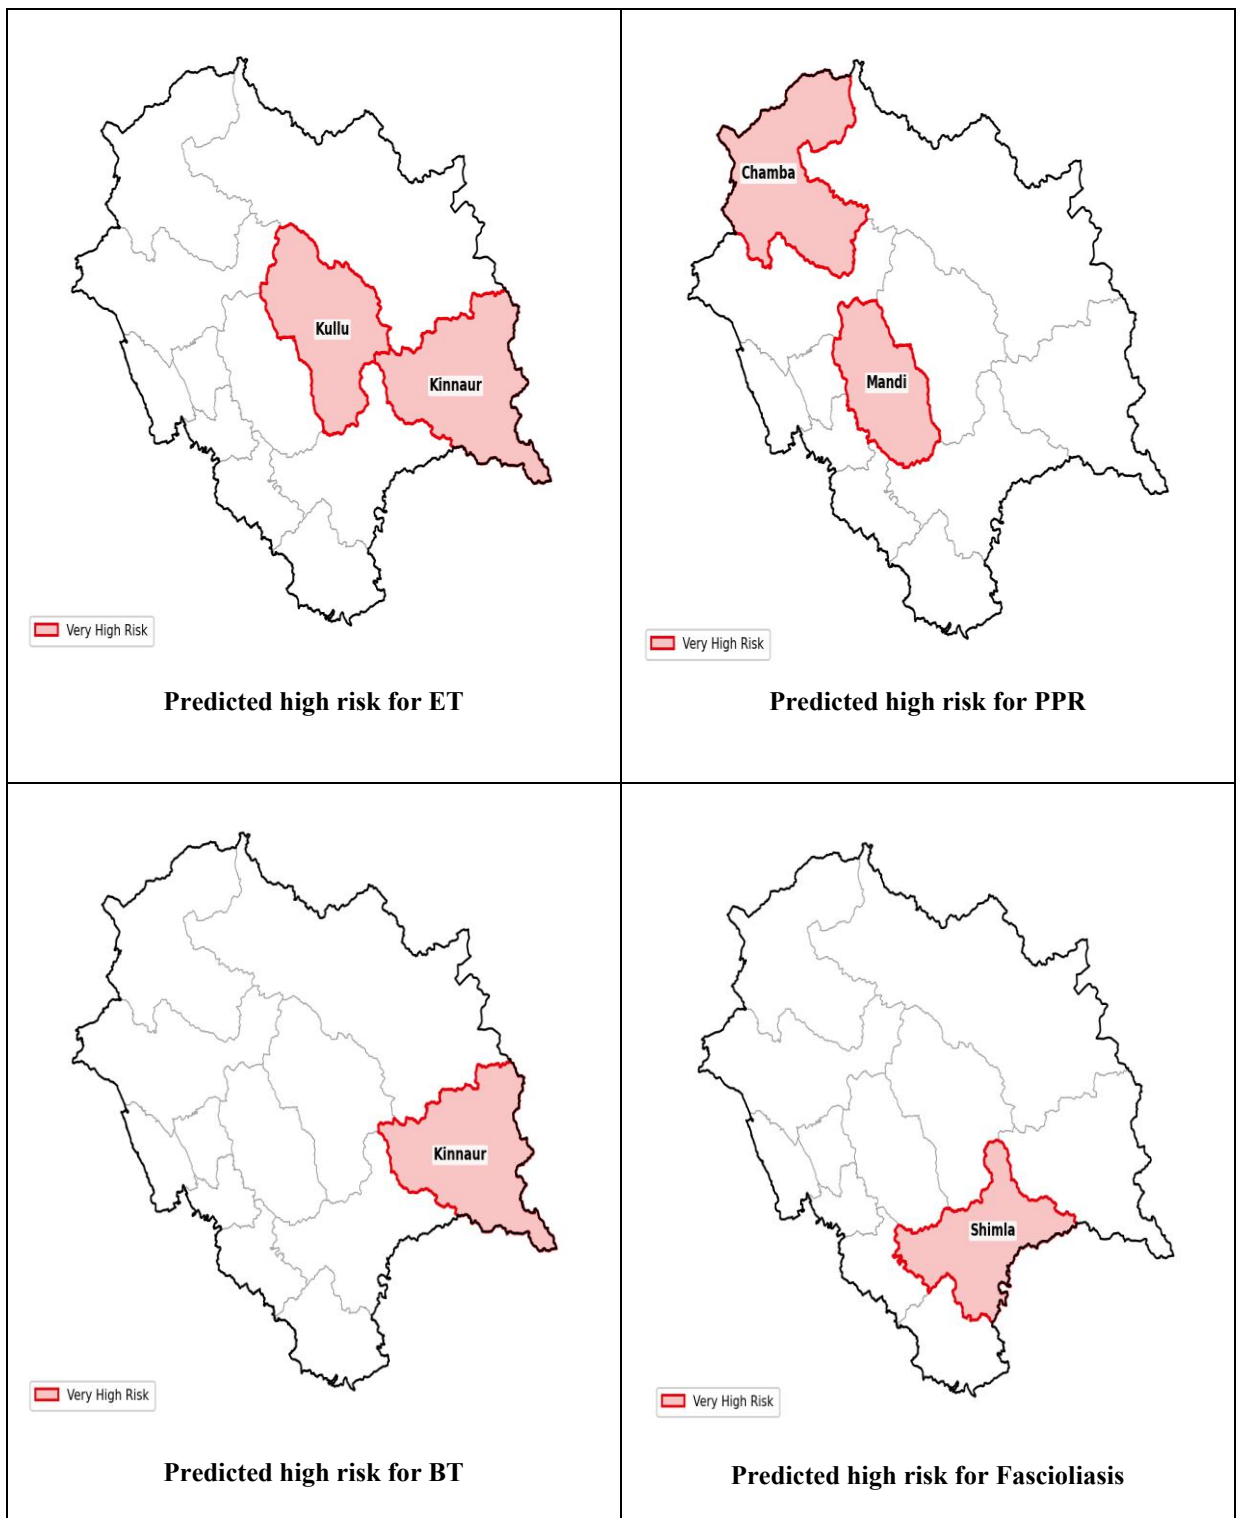

The livestock disease forecast for **Himachal Pradesh** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **8** districts are at **very high risk** for **BQ, BT, ET, Fascioliasis, PPR** and **S&G Pox** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 8 Districts of Himachal Pradesh for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Black Quarter	Chamba, Hamirpur, Kinnaur, Kullu and Una
2.	Bluetongue	Kinnaur
3.	Enterotoxaemia	Kinnaur and Kullu
4.	Fascioliasis	Shimla
5.	Peste des Petits Ruminants	Chamba and Mandi
6.	Sheep and Goat pox	Chamba, Hamirpur, Kinnaur, Kullu and Solan

II. District-wise mapping of very high-risk areas for 6 diseases in Himachal Pradesh for the month of November 2026

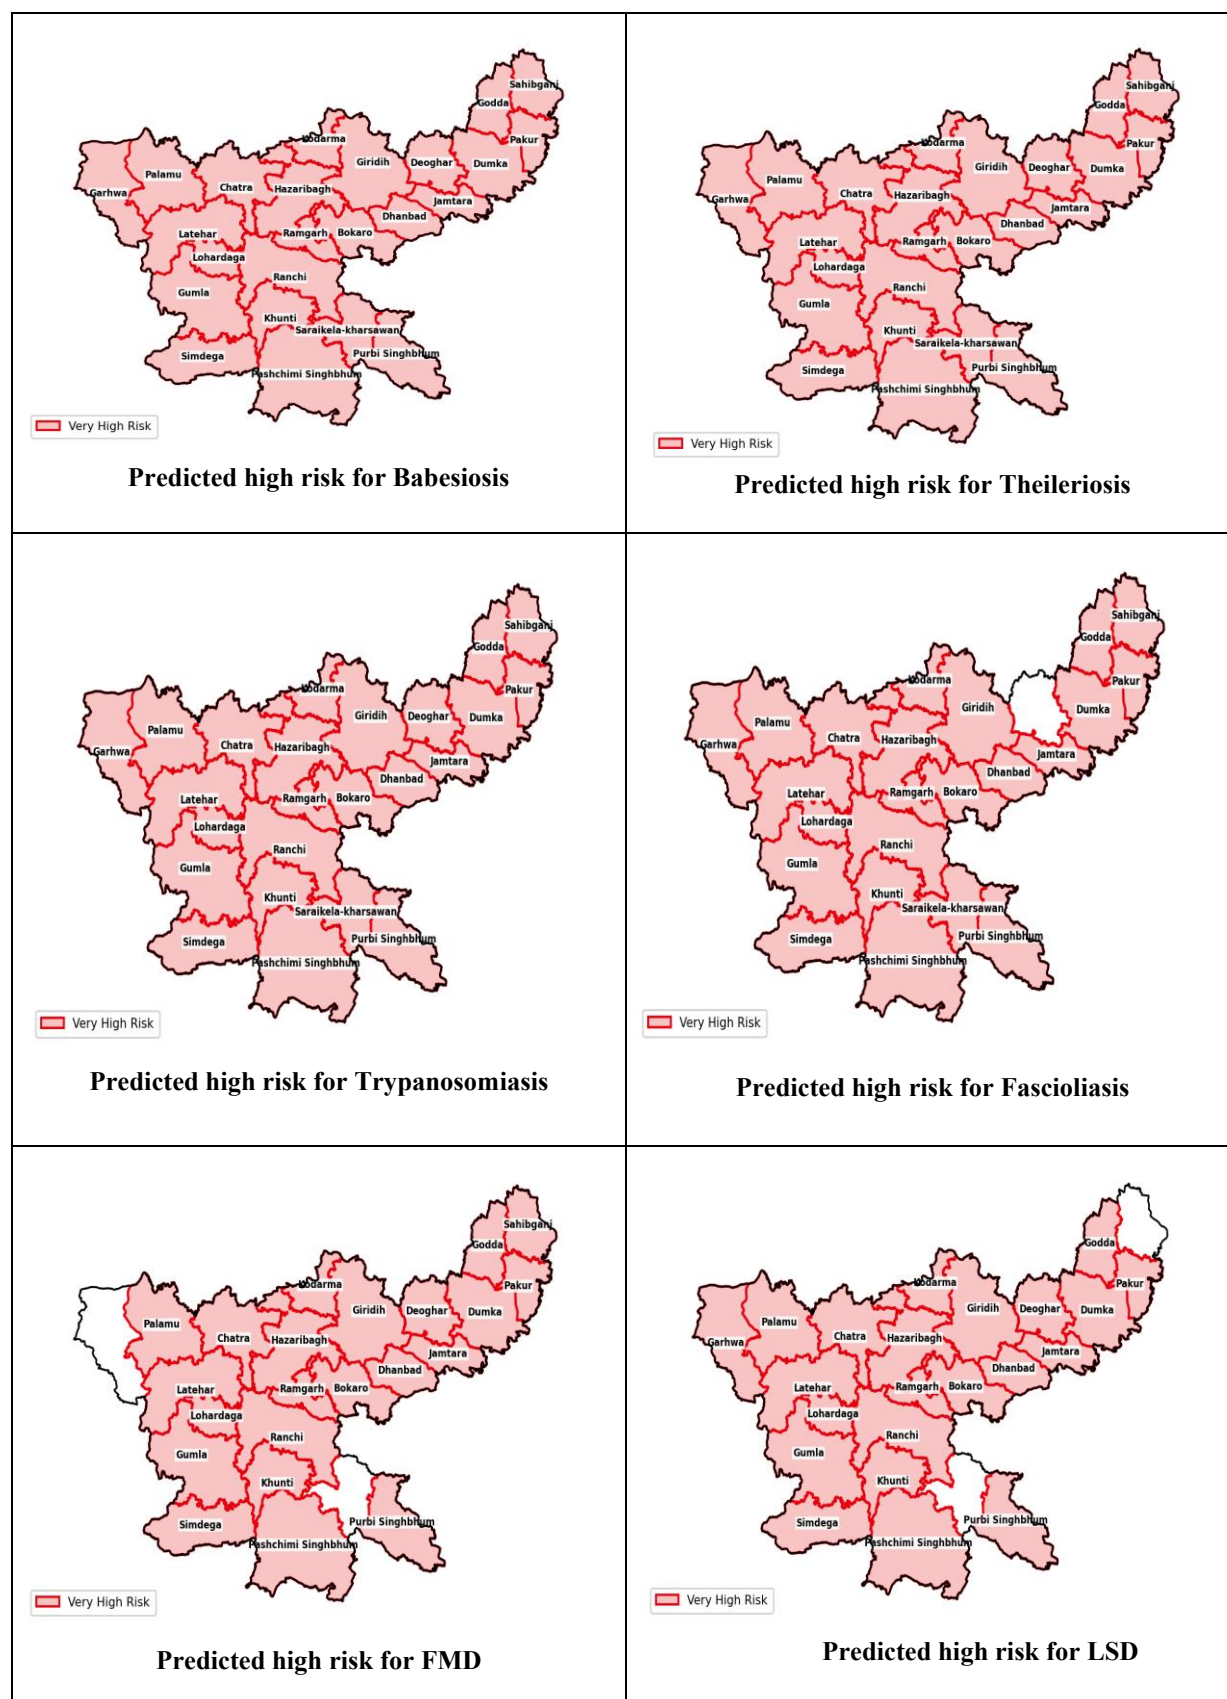

3.15. Jharkhand

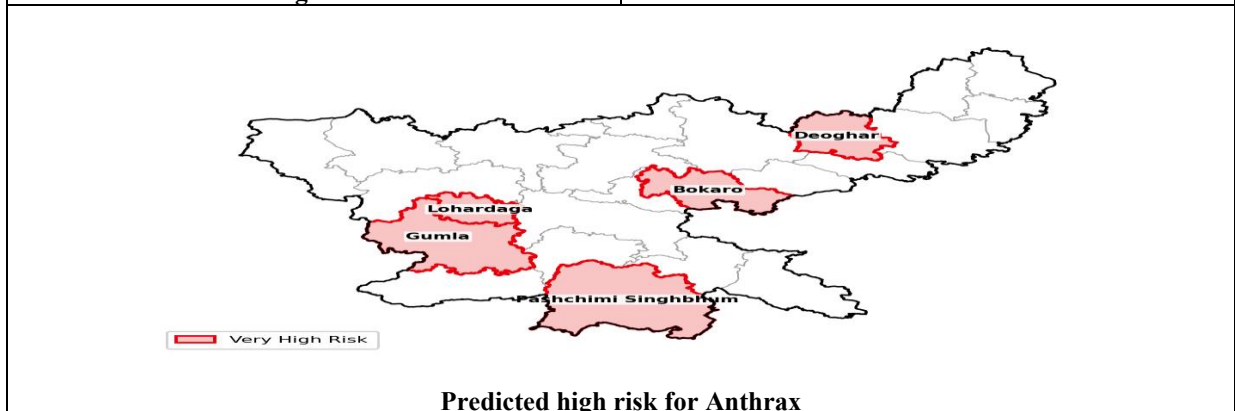

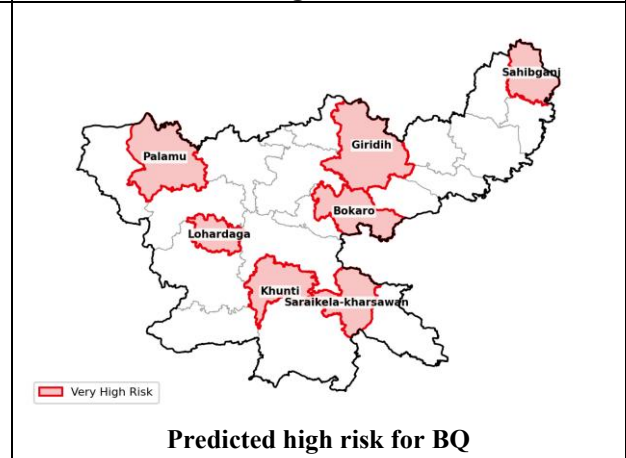

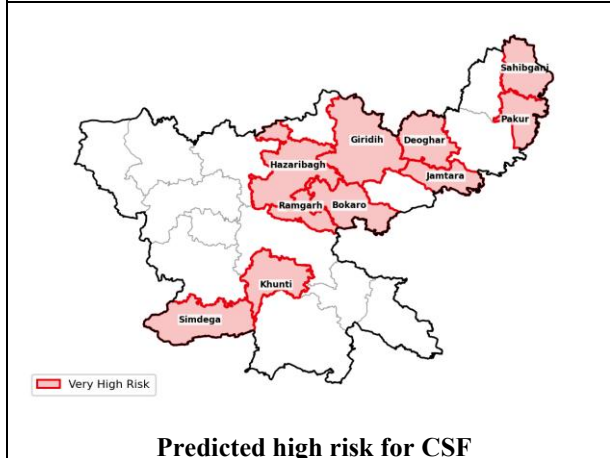

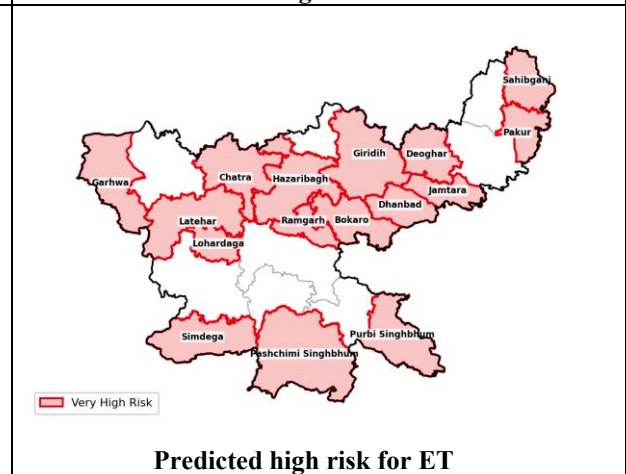

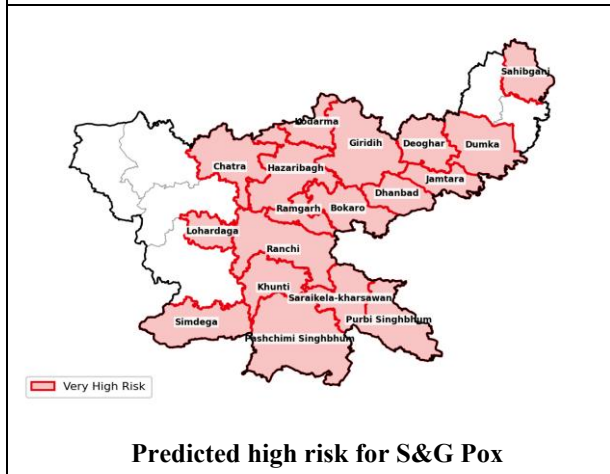

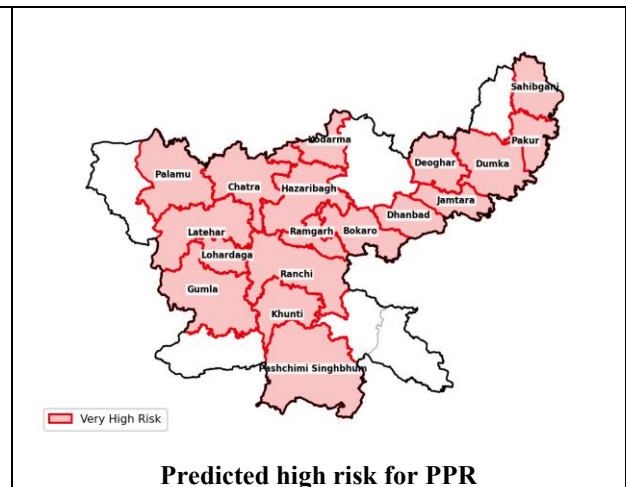

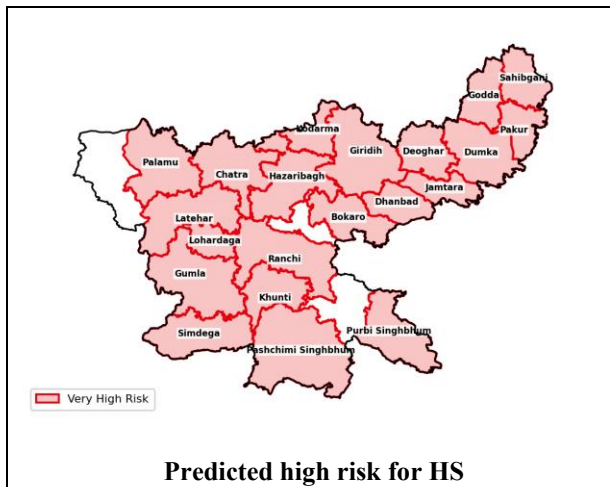

The livestock disease forecast for **Jharkhand** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **24** districts are at **very high risk** for **Anthrax, Babesiosis, BQ, CSF, ET, Fascioliasis, FMD, HS, LSD, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 24 Districts of Jharkhand for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Anthrax	Bokaro, Deoghar, Gumla, Lohardaga and Pashchimi Singhbhum
2.	Babesiosis	Bokaro, Chatra, Deoghar, Dhanbad, Dumka, Garhwa, Giridih, Godda, Gumla, Hazaribagh, Jamtara, Khunti, Kodarma, Latehar, Lohardaga, Pakur, Palamu, Pashchimi Singhbhum, Purbi Singhbhum, Ramgarh, Ranchi, Sahibganj, Saraikela-Kharsawan and Simdega
3.	Black Quarter	Bokaro, Giridih, Khunti, Lohardaga, Palamu, Sahibganj and Saraikela-Kharsawan
4.	Classical Swine Fever	Bokaro, Deoghar, Giridih, Hazaribagh, Jamtara, Khunti, Pakur, Ramgarh, Sahibganj and Simdega
5.	Enterotoxaemia	Bokaro, Chatra, Deoghar, Dhanbad, Garhwa, Giridih, Hazaribagh, Jamtara, Latehar, Lohardaga, Pakur, Pashchimi Singhbhum, Purbi Singhbhum, Ramgarh, Sahibganj and Simdega
6.	Fascioliasis	Bokaro, Chatra, Dhanbad, Dumka, Garhwa, Giridih, Godda, Gumla, Hazaribagh, Jamtara, Khunti, Kodarma, Latehar, Lohardaga, Pakur, Palamu, Pashchimi Singhbhum, Purbi Singhbhum, Ramgarh, Ranchi, Sahibganj, Saraikela-Kharsawan and Simdega
7.	Foot and Mouth Disease	Bokaro, Chatra, Deoghar, Dhanbad, Dumka, Giridih, Godda, Gumla, Hazaribagh, Jamtara, Khunti, Kodarma, Latehar, Lohardaga, Pakur, Palamu, Pashchimi Singhbhum, Purbi Singhbhum, Ramgarh, Ranchi, Sahibganj and Simdega
8.	Haemorrhagic Septicaemia	Bokaro, Chatra, Deoghar, Dhanbad, Dumka, Giridih, Godda, Gumla, Hazaribagh, Jamtara, Khunti, Kodarma, Latehar, Lohardaga, Pakur, Palamu, Pashchimi Singhbhum, Purbi Singhbhum, Ranchi, Sahibganj and Simdega
9.	Lumpy Skin Disease	Bokaro, Chatra, Deoghar, Dhanbad, Dumka, Garhwa, Giridih, Godda, Gumla, Hazaribagh, Jamtara, Khunti, Kodarma, Latehar, Lohardaga, Pakur, Palamu, Pashchimi Singhbhum, Purbi Singhbhum, Ramgarh, Ranchi and Simdega
10.	Peste des Petits Ruminants	Bokaro, Chatra, Deoghar, Dhanbad, Dumka, Gumla, Hazaribagh, Jamtara, Khunti, Kodarma, Latehar, Lohardaga, Pakur, Palamu, Pashchimi Singhbhum, Ramgarh, Ranchi and Sahibganj
11.	Sheep and Goat pox	Bokaro, Chatra, Deoghar, Dhanbad, Dumka, Giridih, Hazaribagh, Jamtara, Khunti, Kodarma, Lohardaga, Pashchimi Singhbhum, Purbi Singhbhum, Ramgarh, Ranchi, Sahibganj, Saraikela-Kharsawan and Simdega
12.	Theileriosis	Bokaro, Chatra, Deoghar, Dhanbad, Dumka, Garhwa, Giridih, Godda, Gumla, Hazaribagh, Jamtara, Khunti, Kodarma, Latehar, Lohardaga, Pakur, Palamu, Pashchimi Singhbhum, Purbi Singhbhum, Ramgarh, Ranchi, Sahibganj, Saraikela-Kharsawan and Simdega
13.	Trypanosomiasis	Bokaro, Chatra, Deoghar, Dhanbad, Dumka, Garhwa, Giridih, Godda, Gumla, Hazaribagh, Jamtara, Khunti, Kodarma, Latehar, Lohardaga, Pakur, Palamu, Pashchimi Singhbhum, Purbi Singhbhum, Ramgarh, Ranchi, Sahibganj, Saraikela-Kharsawan and Simdega

II. District-wise mapping of very high-risk areas for 13 diseases in Jharkhand for the month of November 2026

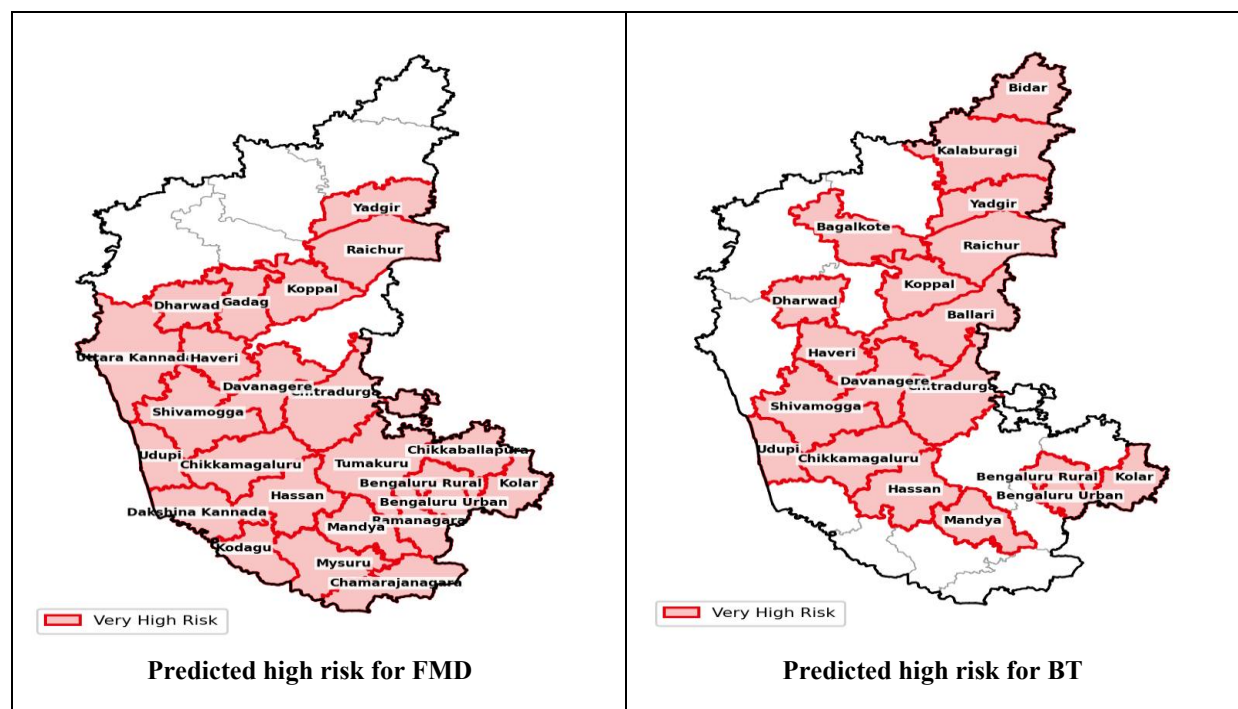

3.16. Karnataka

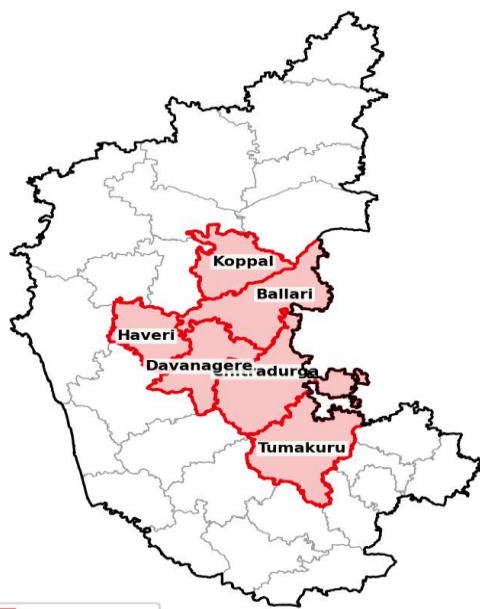

The livestock disease forecast for **Karnataka** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **29** districts are at **very high risk** for **ASF, Anthrax, Babesiosis, BQ, BT, ET, FMD, HS, LSD, PPR, S&G Pox and Theileriosis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 29 Districts of Karnataka for November 2026

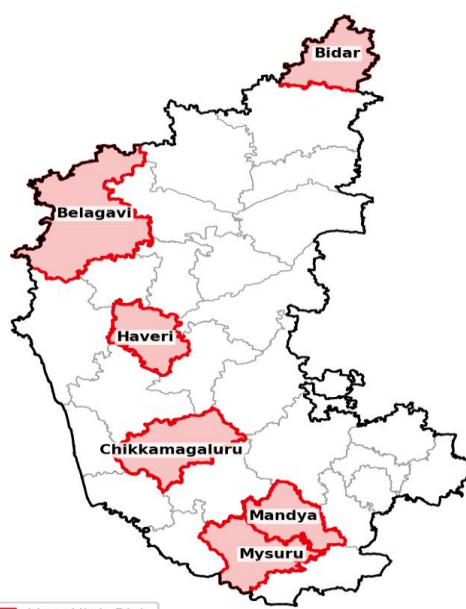

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Bengaluru Urban
2.	Anthrax	Ballari, Chitradurga, Davanagere, Haveri, Koppal and Tumakuru
3.	Babesiosis	Dakshina Kannada
4.	Black Quarter	Davanagere and Mysuru
5.	Bluetongue	Bagalkote, Bengaluru Urban, Bengaluru Rural, Ballari, Bidar, Chikkamagaluru, Chitradurga, Davanagere, Dharwad, Kalaburagi, Hassan, Haveri, Kolar, Koppal, Mandya, Raichur, Shivamogga, Udupi and Yadgir
6.	Enterotoxaemia	Chamarajanagar, Chitradurga and Shivamogga
7.	Foot and Mouth Disease	Bengaluru Urban, Bengaluru Rural, Chamarajanagar, Chikkaballapura, Chikkamagaluru, Chitradurga, Dakshina Kannada, Davanagere, Dharwad, Gadag, Hassan, Haveri, Kodagu, Kolar, Koppal, Mandya, Mysuru, Raichur, Ramanagara, Shivamogga, Tumakuru, Udupi, Uttara Kannada and Yadgir
8.	Haemorrhagic Septicaemia	Chitradurga and Kodagu
9.	Lumpy Skin Disease	Belagavi, Bidar, Chikkamagaluru, Haveri, Mandya and Mysuru
10.	Peste des Petits Ruminants	Dharwad
11.	Sheep and Goat pox	Haveri, Kolar and Yadgir
12.	Theileriosis	Dakshina Kannada

II. District-wise mapping of very high-risk areas for 12 diseases in Karnataka for the month of November 2026

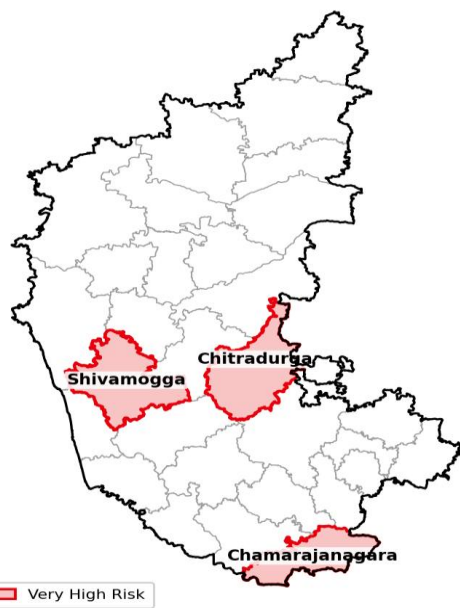

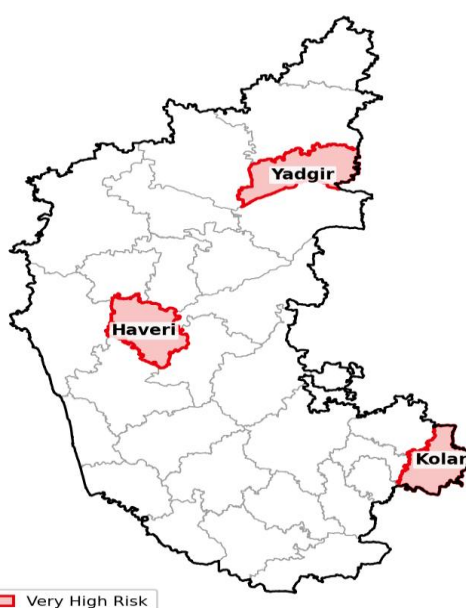

Predicted high risk for Anthrax

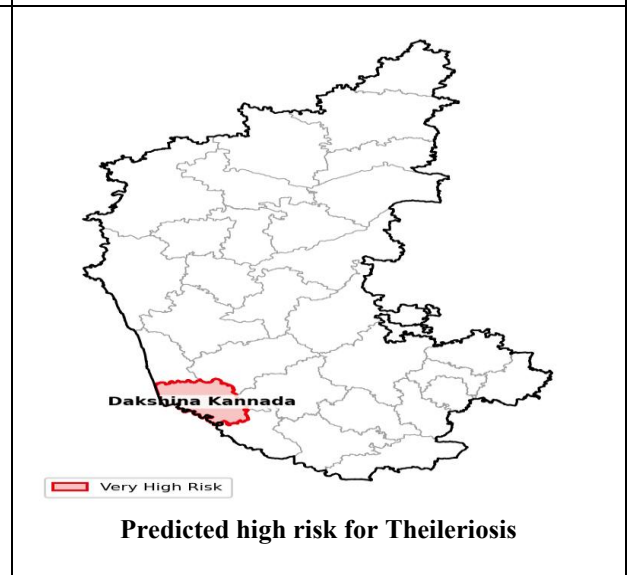

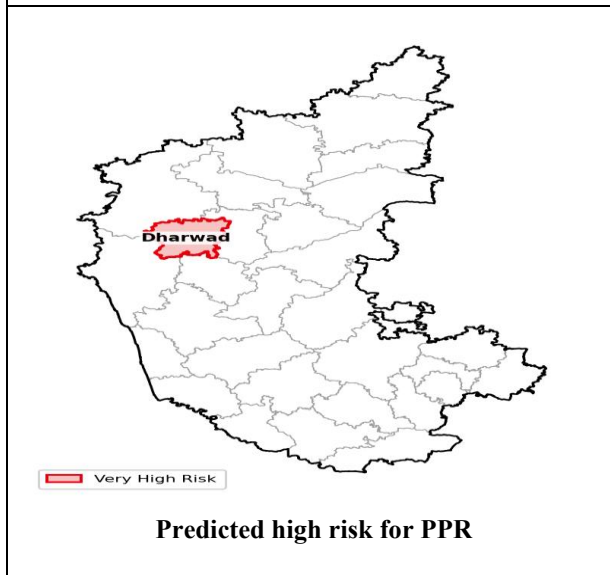

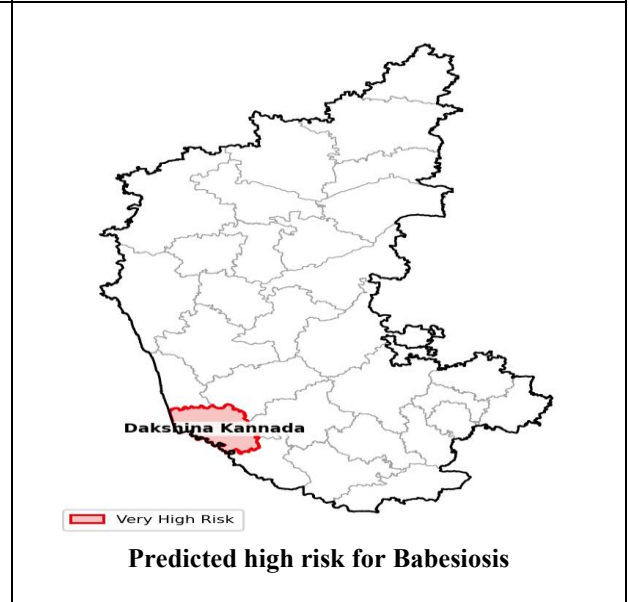

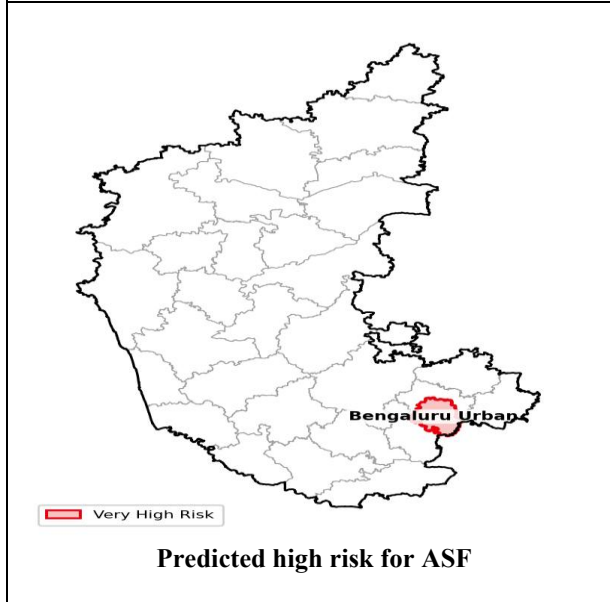

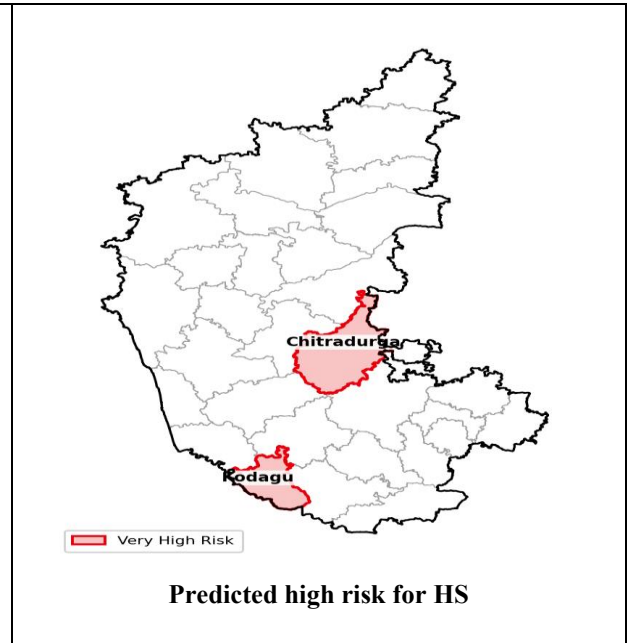

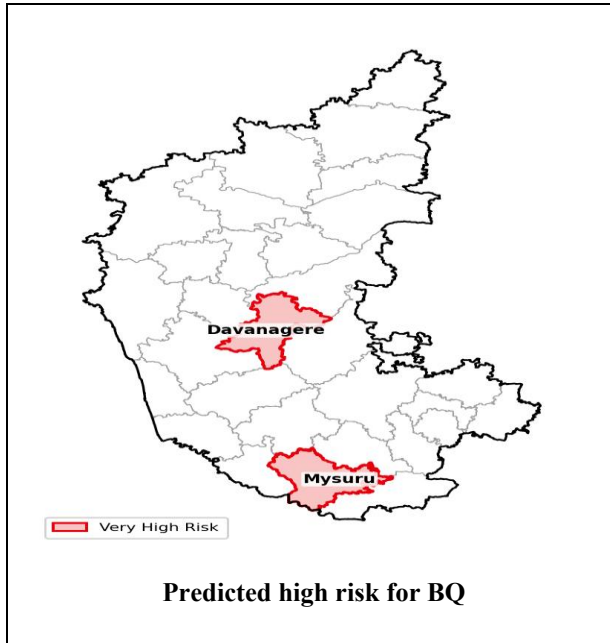

Predicted high risk for LSD

Predicted high risk for ET

Predicted high risk for S&G Pox

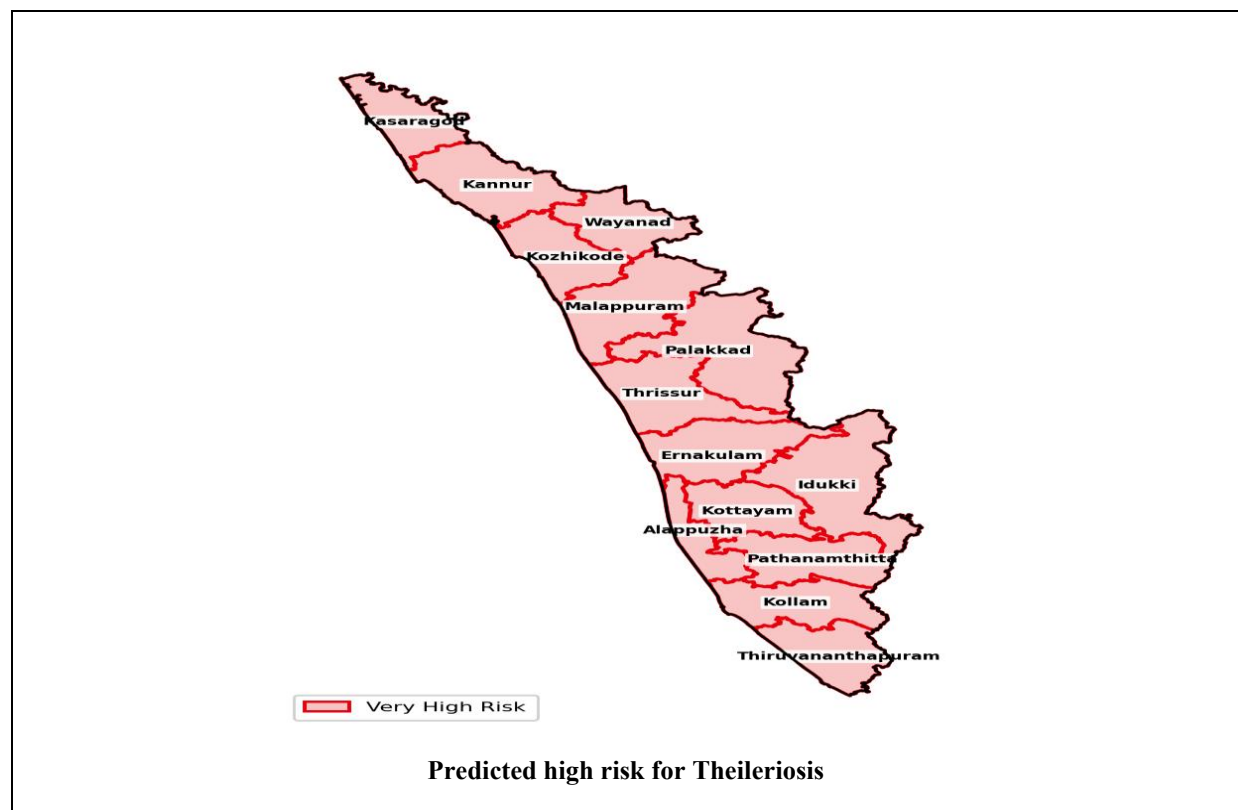

3.17. Keralam

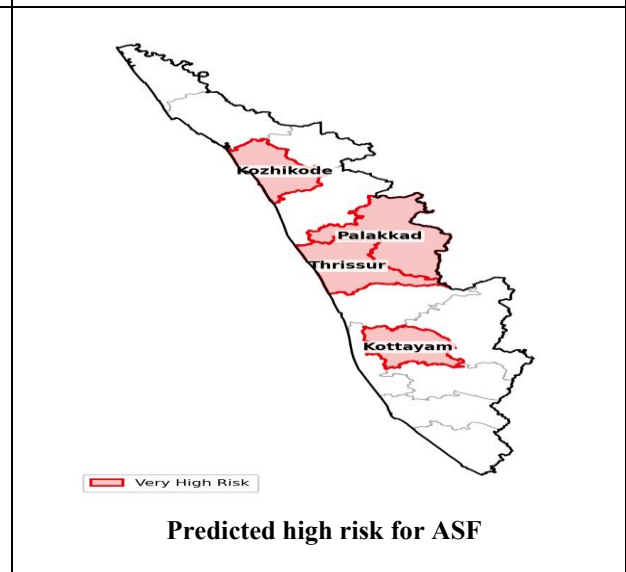

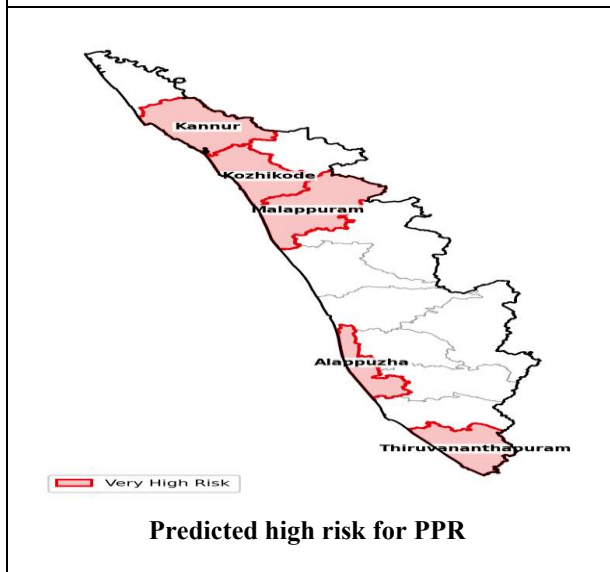

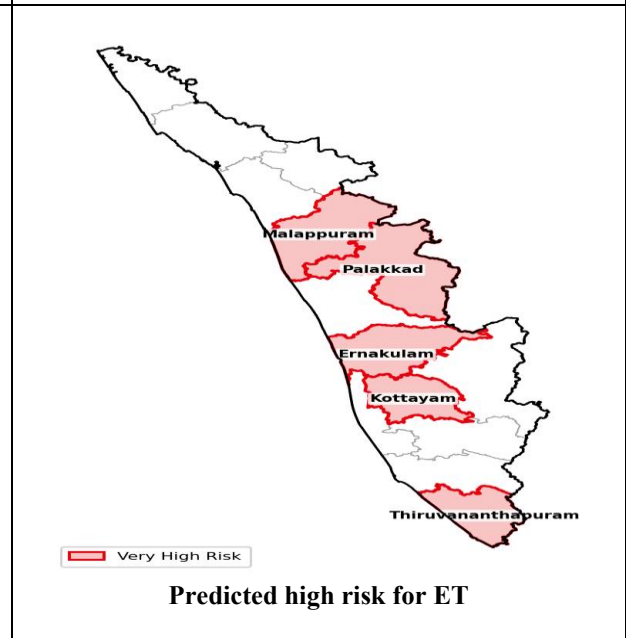

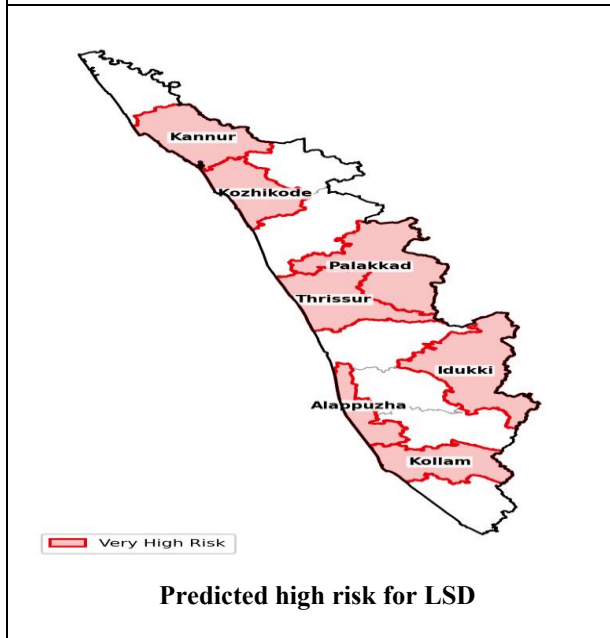

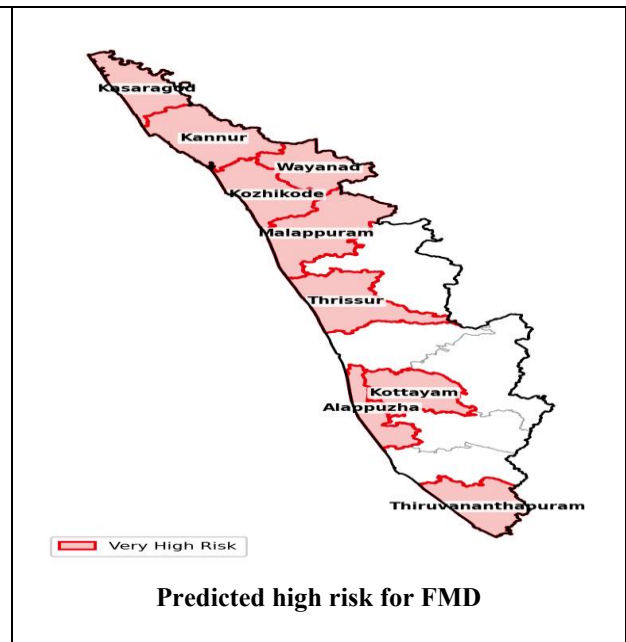

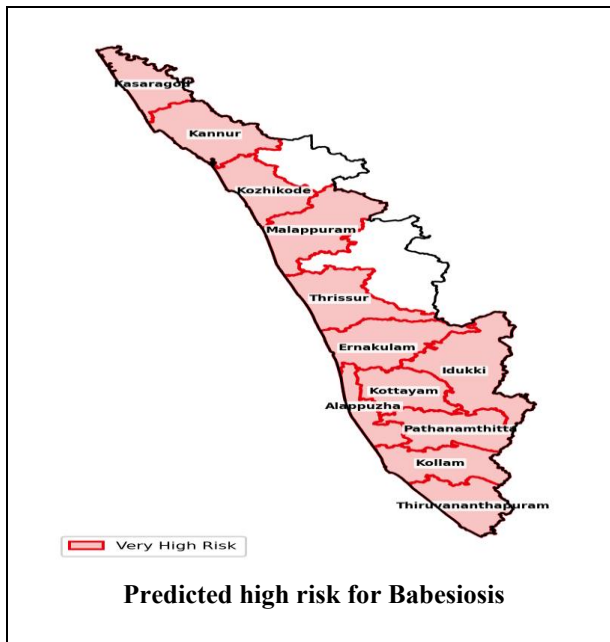

The livestock disease forecast for **Keralam** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **14** districts are at **very high risk** for **ASF, Anthrax, Babesiosis, CSF, ET, Fascioliasis, FMD, HS, LSD, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

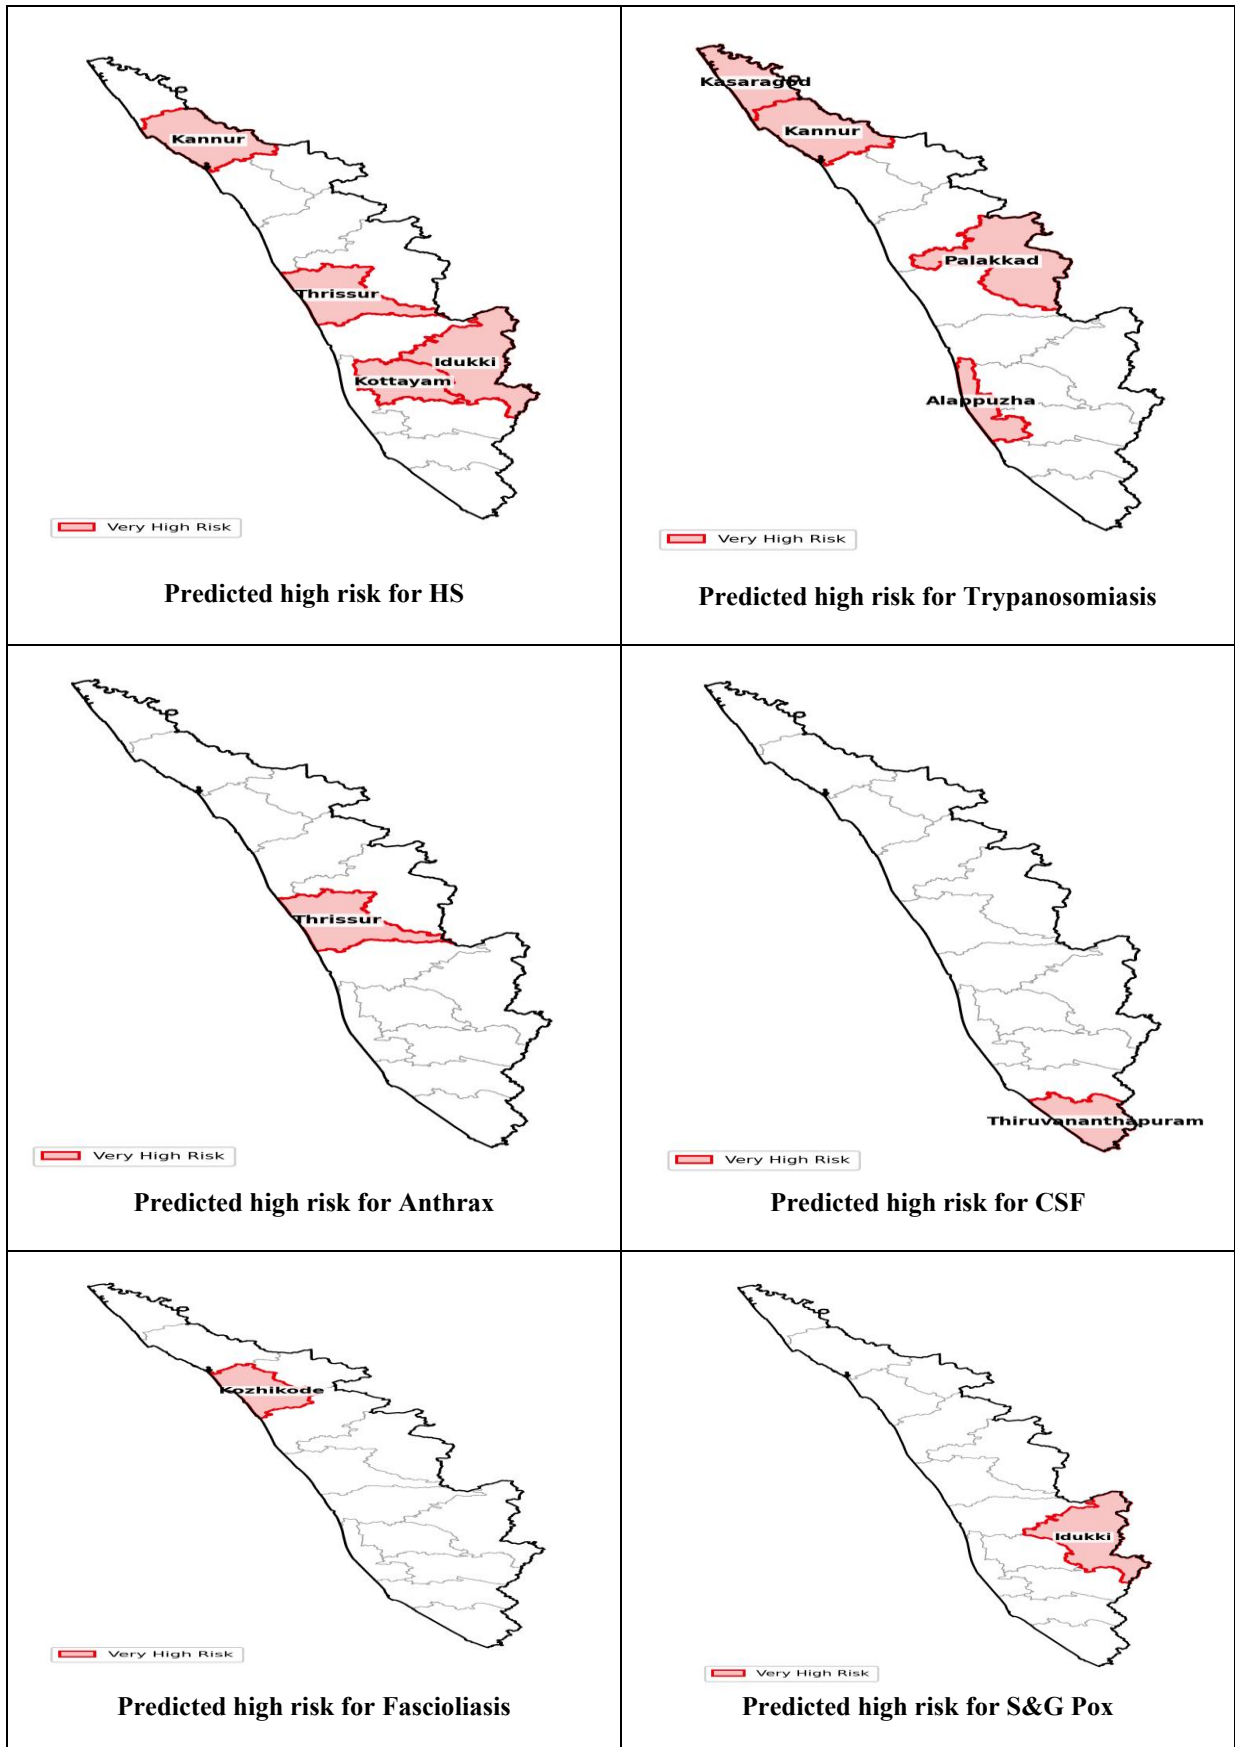

I. Livestock Diseases with Predicted Risk in 14 Districts of Keralam for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Kottayam, Kozhikode, Palakkad and Thrissur
2.	Anthrax	Thrissur
3.	Babesiosis	Alappuzha, Ernakulam, Idukki, Kannur, Kasaragod, Kollam, Kottayam, Kozhikode, Malappuram, Pathanamthitta, Thiruvananthapuram and Thrissur
4.	Classical Swine Fever	Thiruvananthapuram
5.	Enterotoxaemia	Ernakulam, Kottayam, Malappuram, Palakkad and Thiruvananthapuram
6.	Fascioliasis	Kozhikode
7.	Foot and Mouth Disease	Alappuzha, Kannur, Kasaragod, Kottayam, Kozhikode, Malappuram, Thiruvananthapuram, Thrissur and Wayanad
8.	Haemorrhagic Septicaemia	Idukki, Kannur, Kottayam and Thrissur
9.	Lumpy Skin Disease	Alappuzha, Idukki, Kannur, Kollam, Kozhikode, Palakkad and Thrissur
10.	Peste des Petits Ruminants	Alappuzha, Kannur, Kozhikode, Malappuram and Thiruvananthapuram
11.	Sheep and Goat pox	Idukki
12.	Theileriosis	Alappuzha, Ernakulam, Idukki, Kannur, Kasaragod, Kollam, Kottayam, Kozhikode, Malappuram, Palakkad, Pathanamthitta, Thiruvananthapuram, Thrissur and Wayanad
13.	Trypanosomiasis	Alappuzha, Kannur, Kasaragod and Palakkad

II. District-wise mapping of very high-risk areas for 13 diseases in Keralam for the month of November 2026

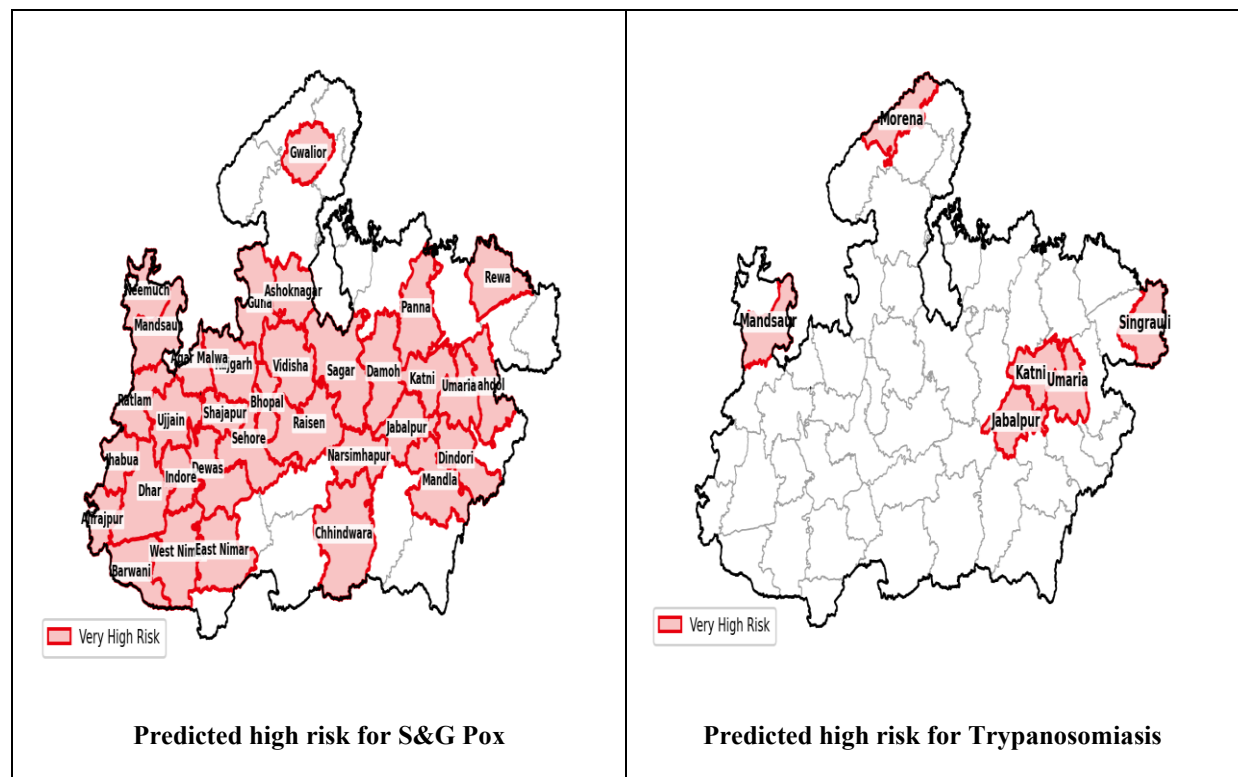

3.18. Madhya Pradesh

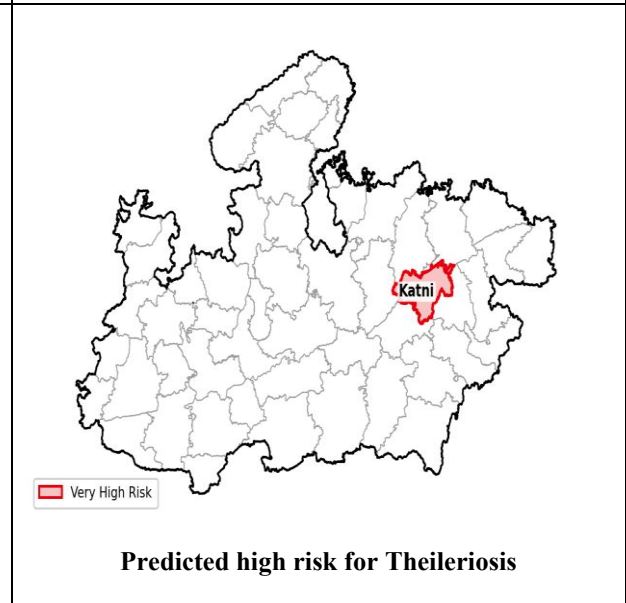

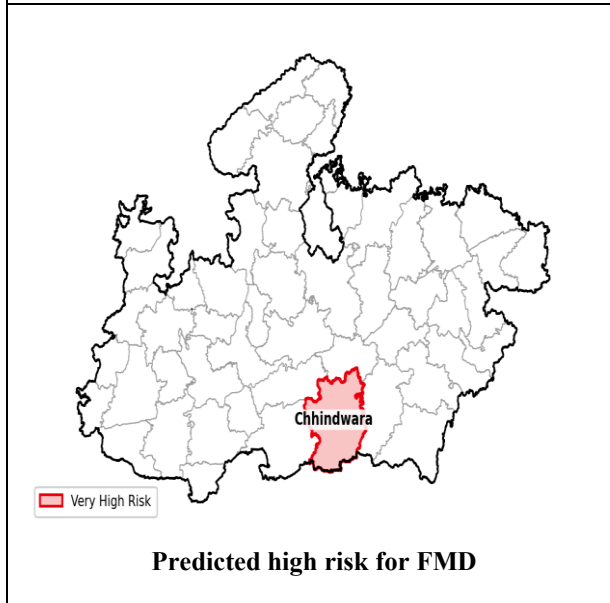

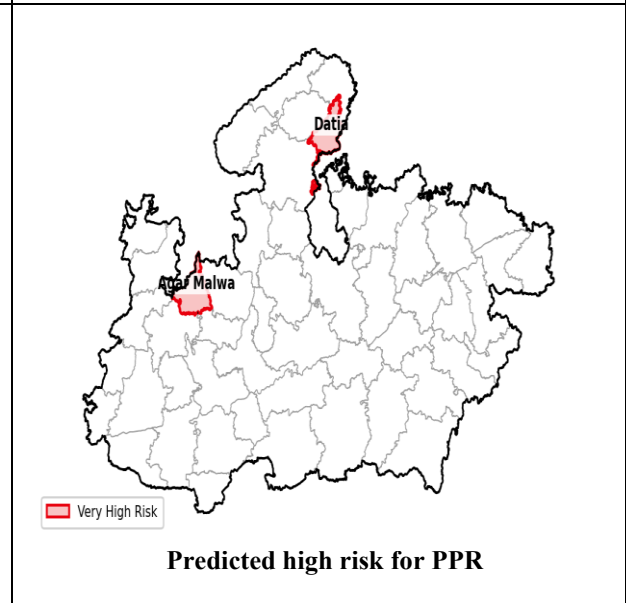

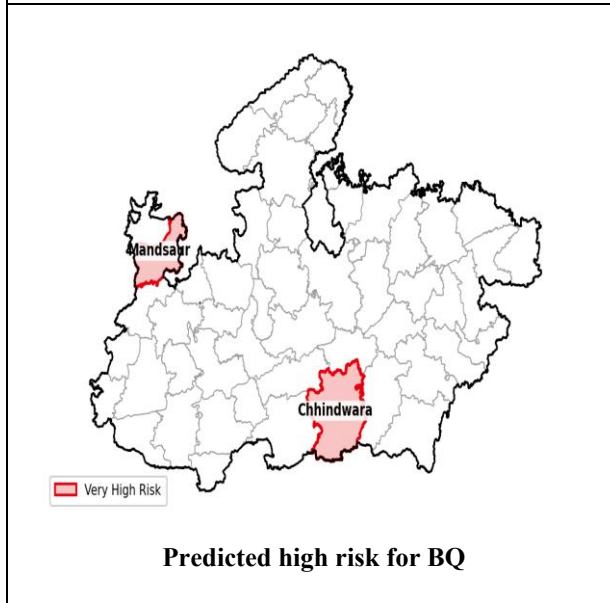

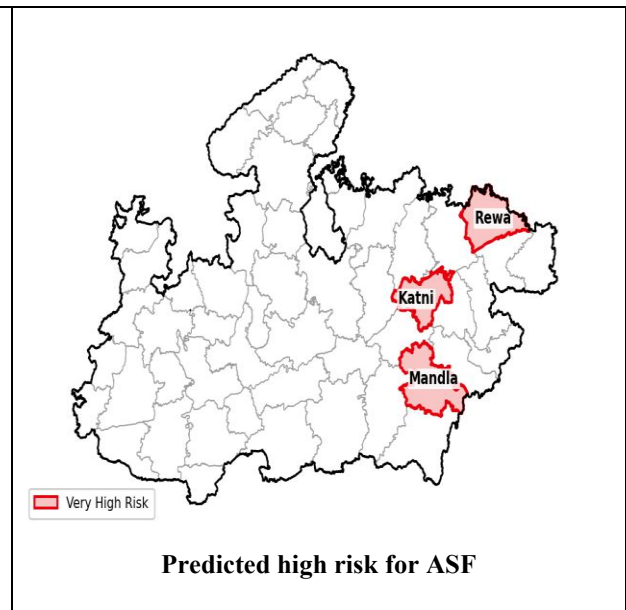

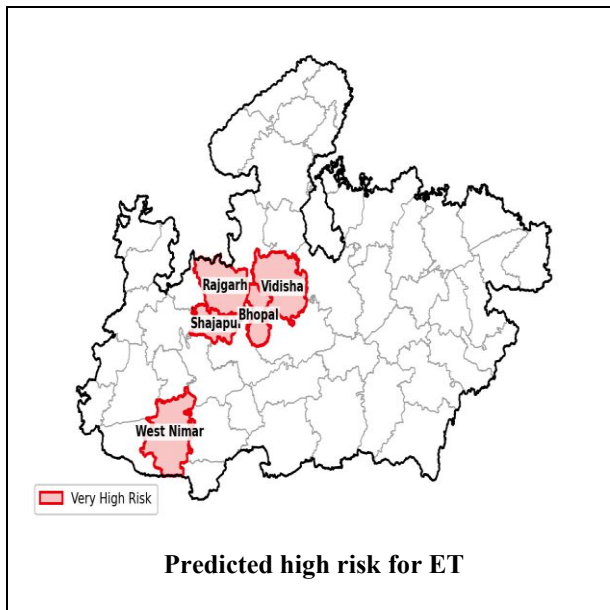

The livestock disease forecast for **Madhya Pradesh** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **37** districts are at **very high risk** for **ASF, BQ, ET, FMD, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 37 Districts of Madhya Pradesh for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Katni, Mandla and Rewa
2.	Black Quarter	Chhindwara and Mandsaur
3.	Enterotoxaemia	Bhopal, Rajgarh, Shajapur, Vidisha and West Nimar
4.	Foot and Mouth Disease	Chhindwara
5.	Peste des Petits Ruminants	Agar Malwa and Datia
6.	Sheep and Goat pox	Agar Malwa, Alirajpur, Ashoknagar, Barwani, Bhopal, Chhindwara, Damoh, Dewas, Dhar, Dindori, East Nimar, Guna, Gwalior, Indore, Jabalpur, Jhabua, Katni, Mandla, Mandsaur, Narsimhapur, Neemuch, Panna, Raisen, Rajgarh, Ratlam, Rewa, Sagar, Sehore, Shahdol, Shajapur, Ujjain, Umaria, Vidisha and West Nimar
7.	Theileriosis	Katni
8.	Trypanosomiasis	Jabalpur, Katni, Mandsaur, Morena, Singrauli and Umaria

II. District-wise mapping of very high-risk areas for 8 diseases in Madhya Pradesh for the month of November 2026

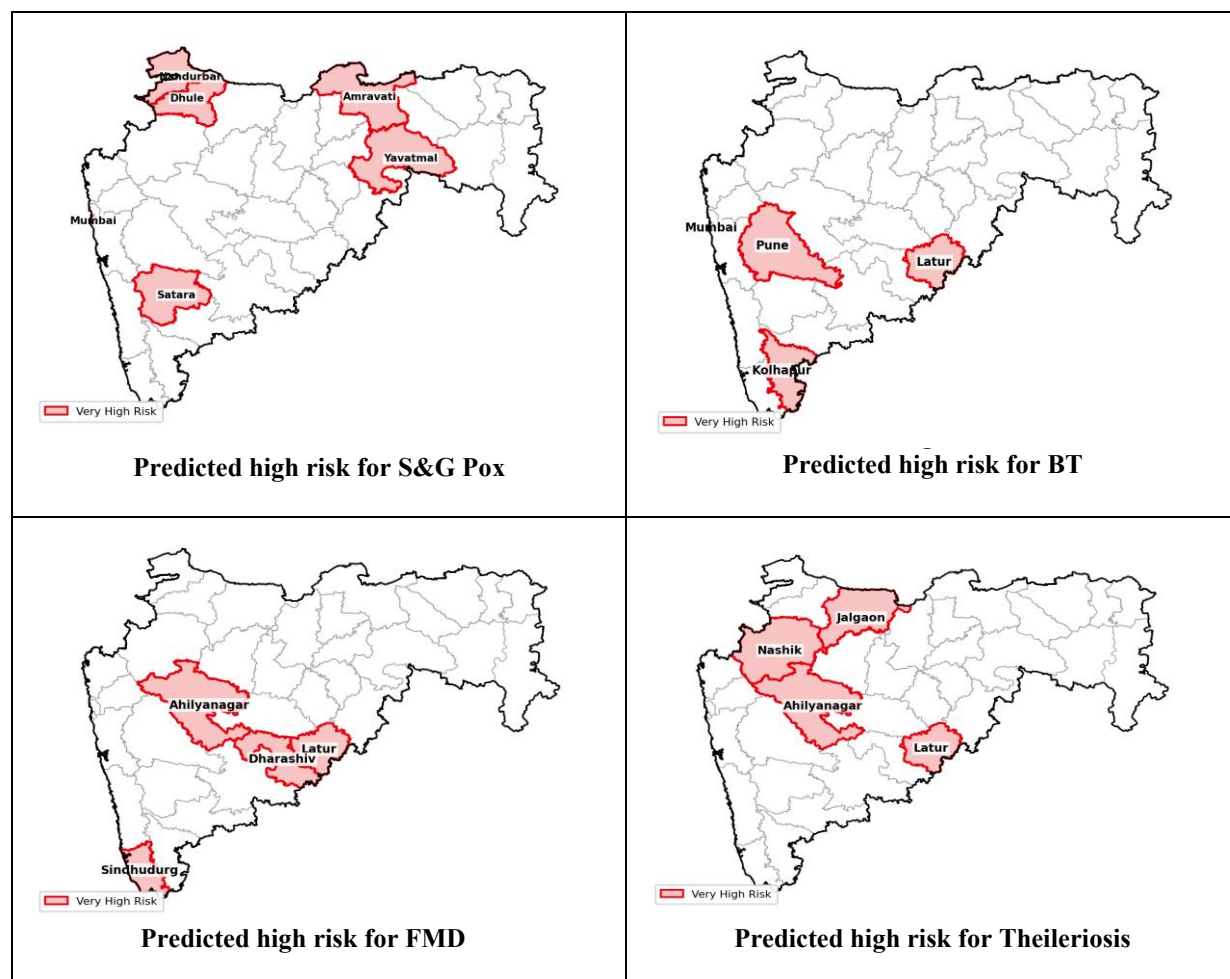

3.19. Maharashtra

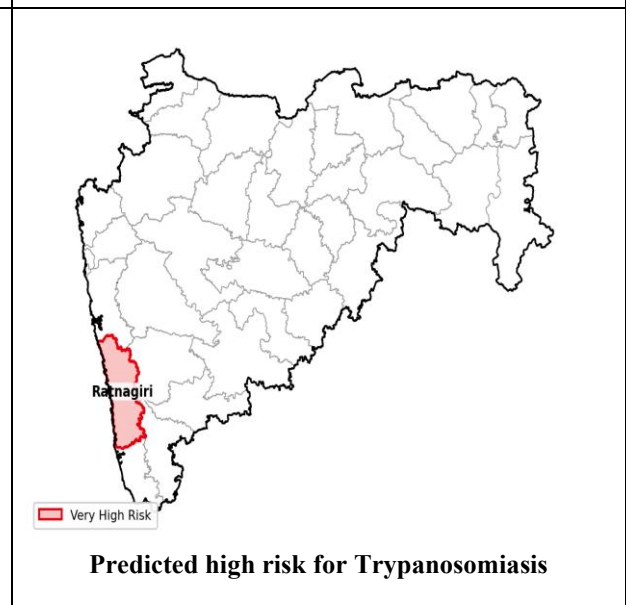

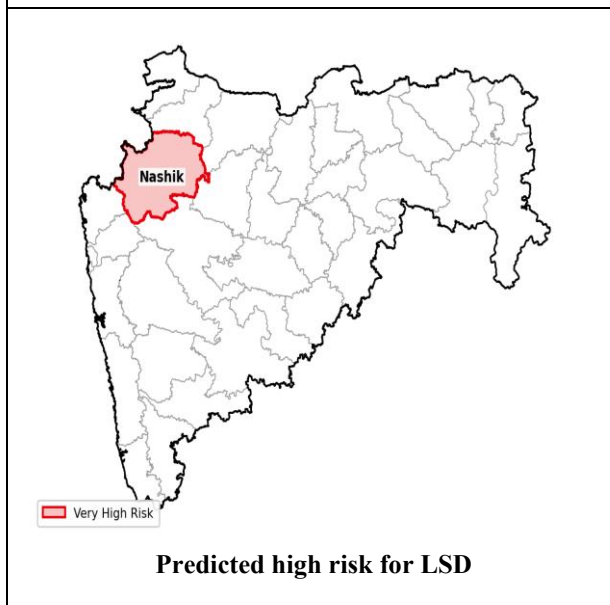

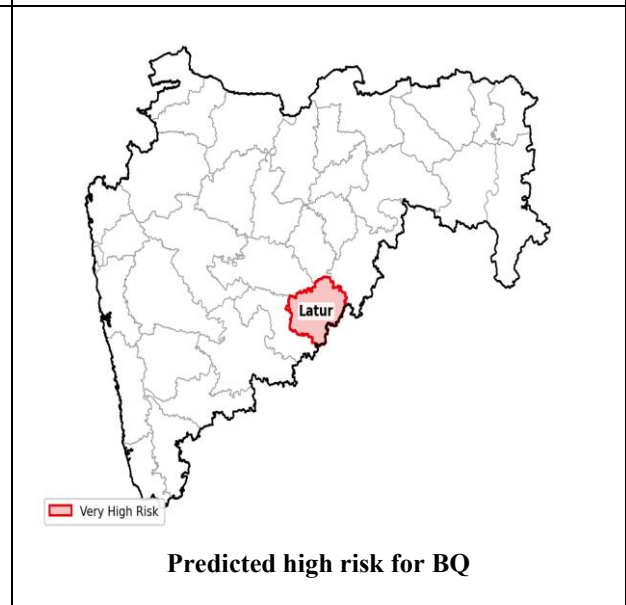

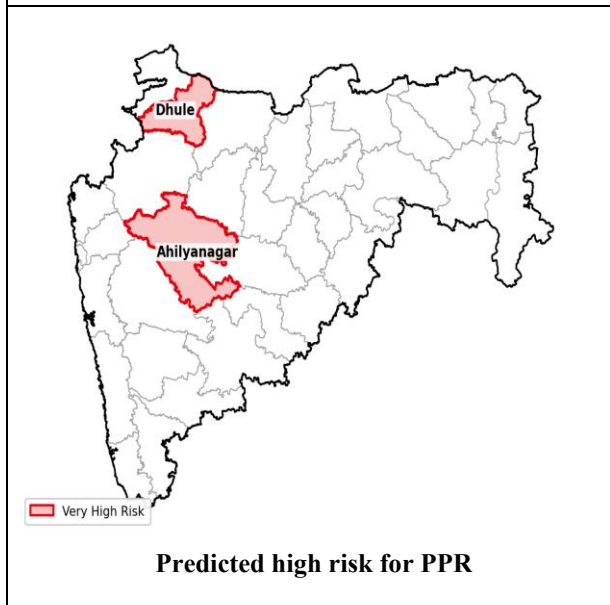

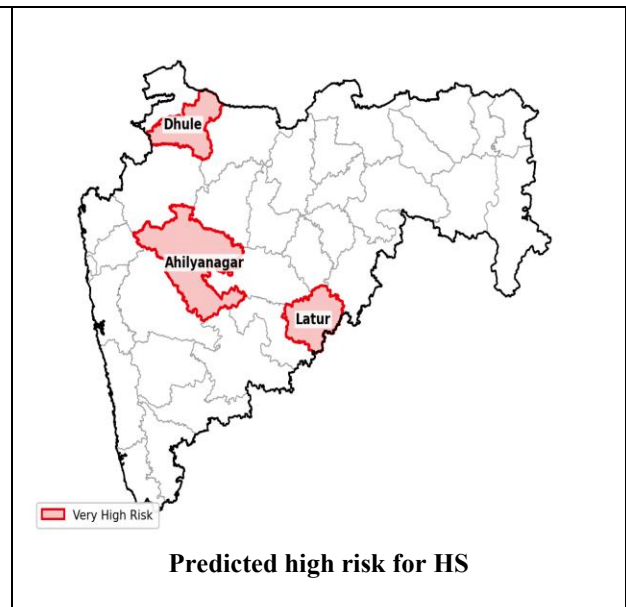

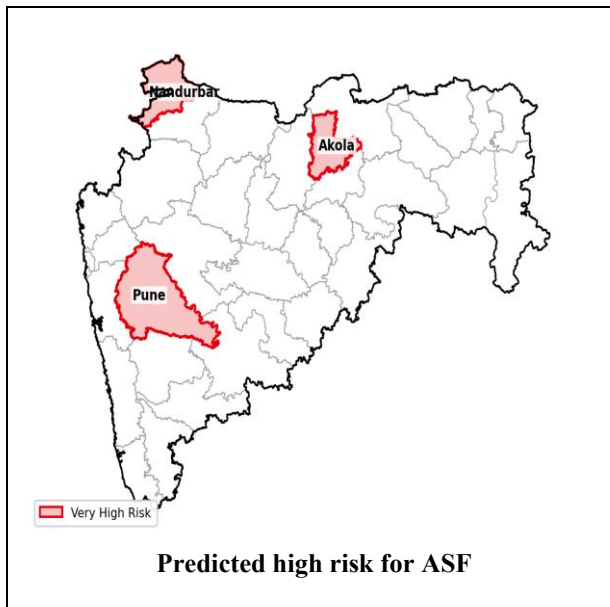

The livestock disease forecast for **Maharashtra** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **16** districts are at **very high risk** for **ASF, BQ, BT, FMD, HS, LSD, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 16 Districts of Maharashtra for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Akola, Nandurbar and Pune
2.	Black Quarter	Latur
3.	Bluetongue	Kolhapur, Latur, Mumbai and Pune
4.	Foot and Mouth Disease	Ahilyanagar, Latur, Dharashiv and Sindhudurg
5.	Haemorrhagic Septicaemia	Ahilyanagar, Dhule and Latur
6.	Lumpy Skin Disease	Nashik
7.	Peste des Petits Ruminants	Ahilyanagar and Dhule
8.	Sheep and Goat pox	Amravati, Dhule, Mumbai, Nandurbar, Satara and Yavatmal
9.	Theileriosis	Ahilyanagar, Jalgaon, Latur and Nashik
10.	Trypanosomiasis	Ratnagiri

II. District-wise mapping of very high-risk areas for 10 diseases in Maharashtra for the month of November 2026

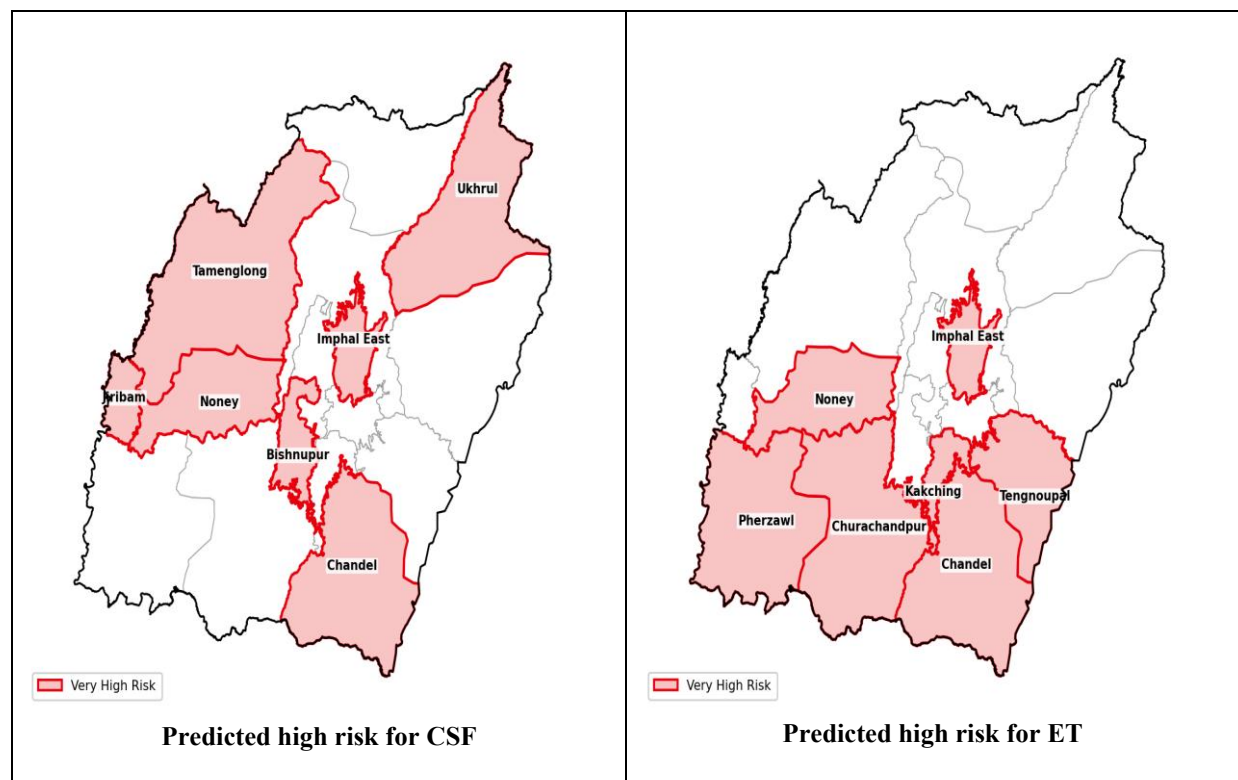

3.20. Manipur

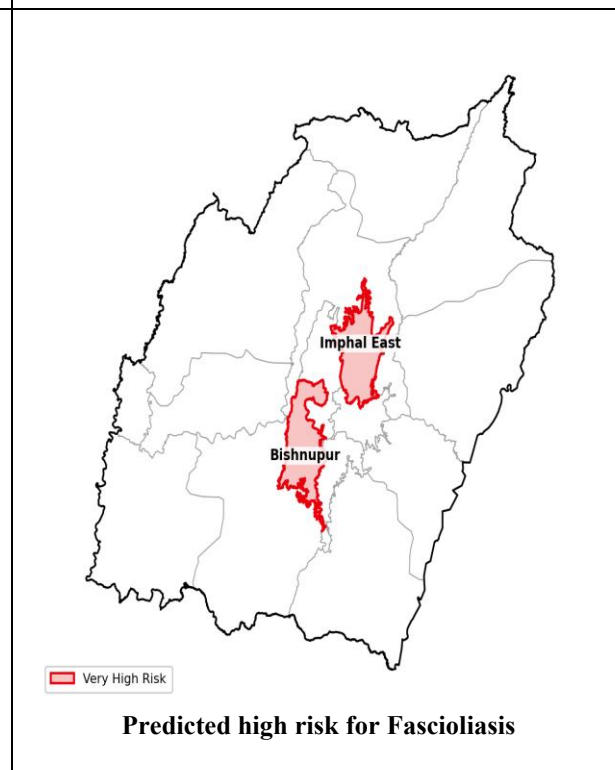

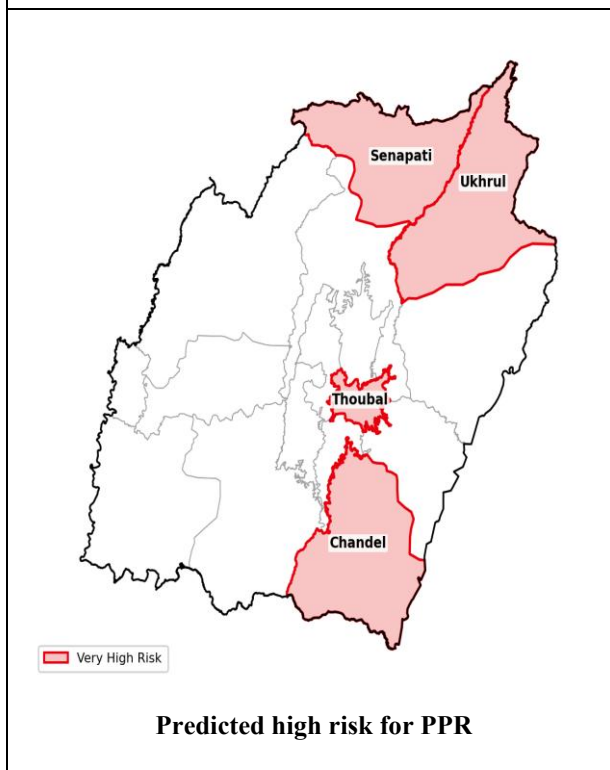

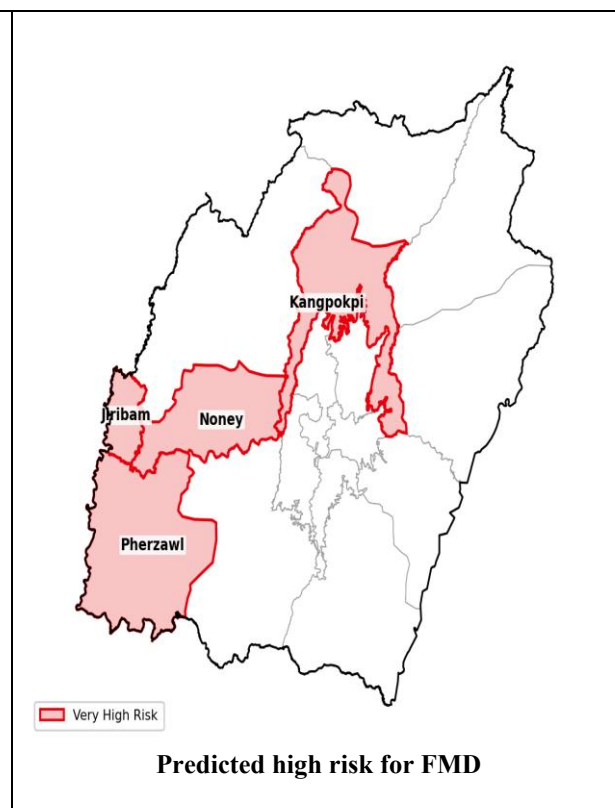

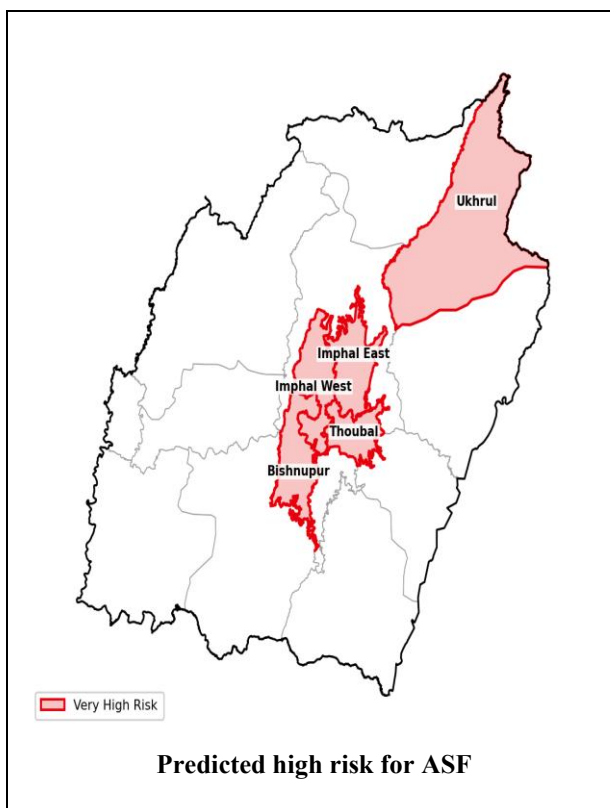

The livestock disease forecast for **Manipur** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **15** districts are at **very high risk** for **ASF, BQ, CSF, ET, Fascioliasis, FMD, HS, PPR** and **S&G Pox** showing the highest predicted risks.

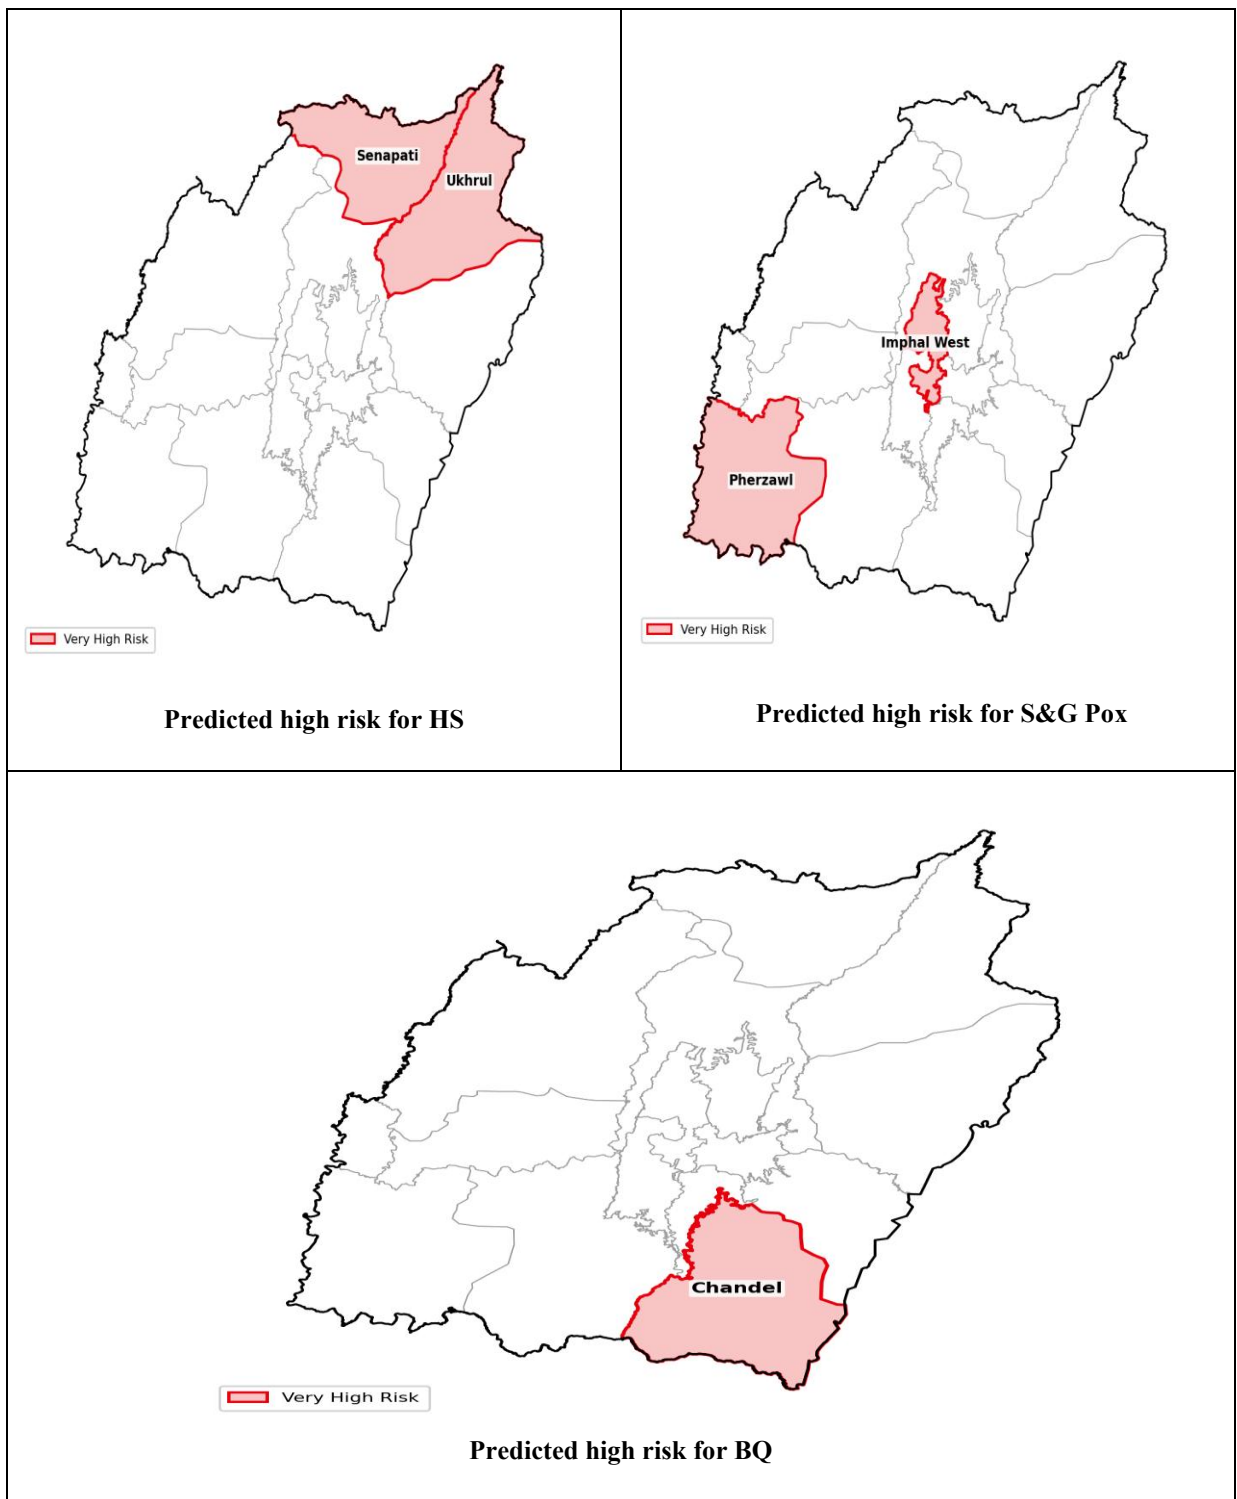

I. Livestock Diseases with Predicted Risk in 15 Districts of Manipur for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Bishnupur, Imphal East, Imphal West, Thoubal and Ukhrul
2.	Black Quarter	Chandel
3.	Classical Swine Fever	Bishnupur, Chandel, Imphal East, Jiribam, Noney, Tamenglong and Ukhrul
4.	Enterotoxaemia	Chandel, Churachandpur, Imphal East, Kakching, Noney, Pherzawl and Tengnoupal
5.	Fascioliasis	Bishnupur and Imphal East
6.	Foot and Mouth Disease	Jiribam, Kangpokpi, Noney and Pherzawl
7.	Haemorrhagic Septicaemia	Senapati and Ukhrul
8.	Peste des Petits Ruminants	Chandel, Senapati, Thoubal and Ukhrul
9.	Sheep and Goat pox	Imphal West and Pherzawl

II. District-wise mapping of very high-risk areas for 9 diseases in Manipur for the month of November 2026

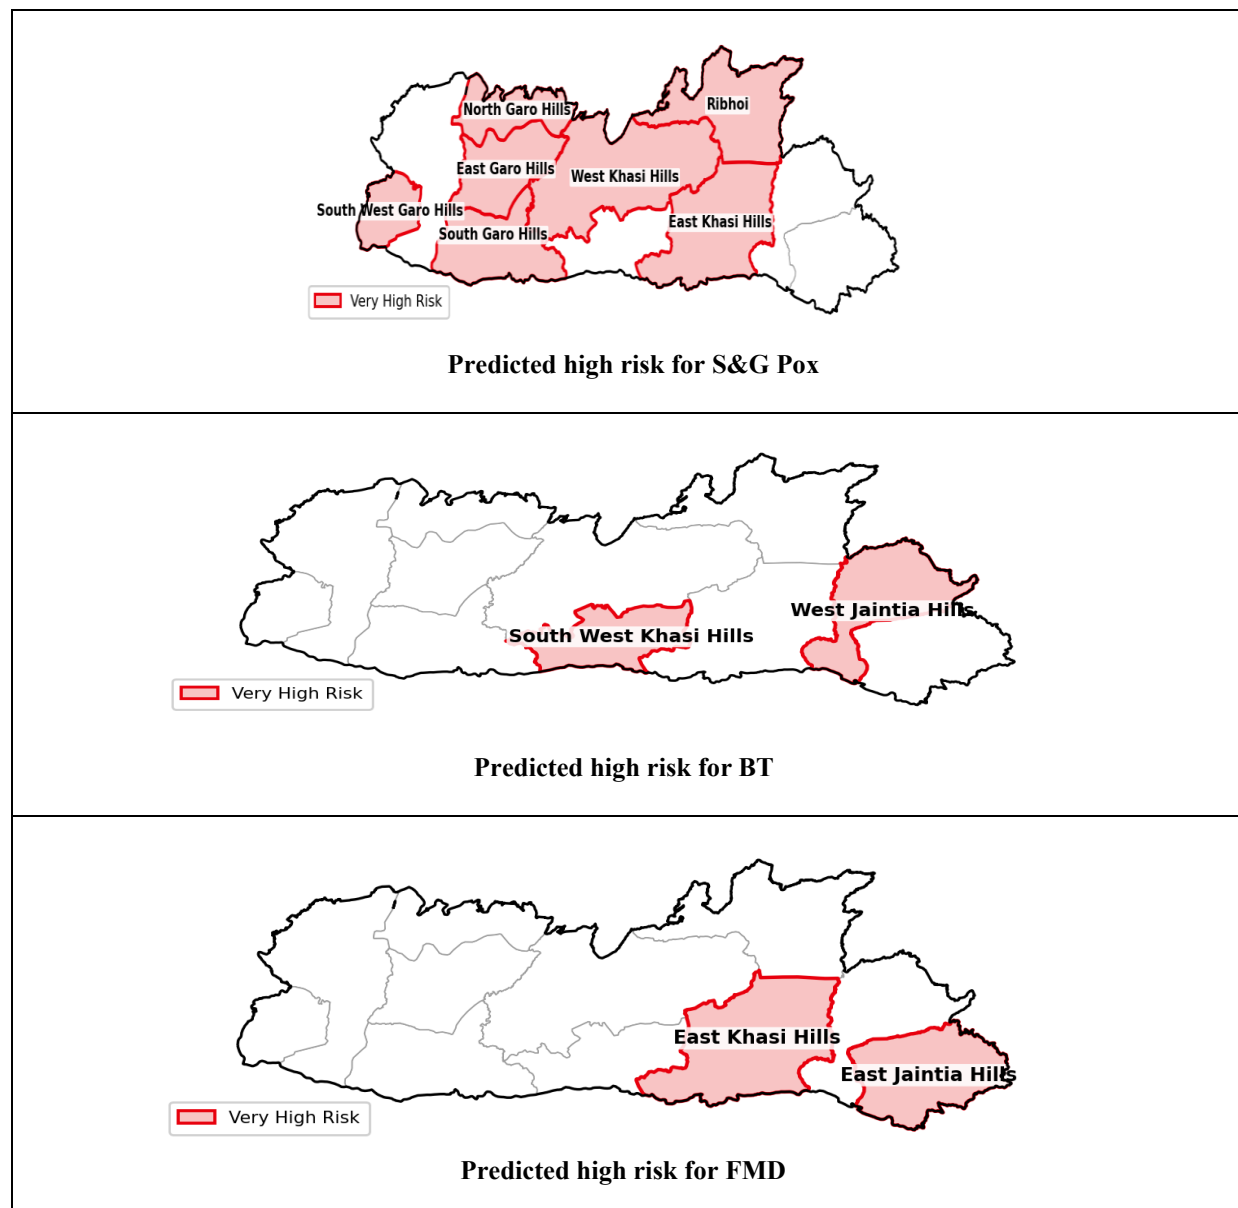

3.21. Meghalaya

The livestock disease forecast for **Meghalaya** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **10** districts are at **very high risk** for **BT, FMD** and **S&G Pox** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 10 Districts of Meghalaya for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Bluetongue	South West Khasi Hills and West Jaintia Hills
2.	Foot and Mouth Disease	East Jaintia Hills and East Khasi Hills
3.	Sheep and Goat pox	East Garo Hills, East Khasi Hills, North Garo Hills, Ribhoi, South Garo Hills, South West Garo Hills and West Khasi Hills

II. District-wise mapping of very high-risk areas for 3 diseases in Meghalaya for the month of November 2026

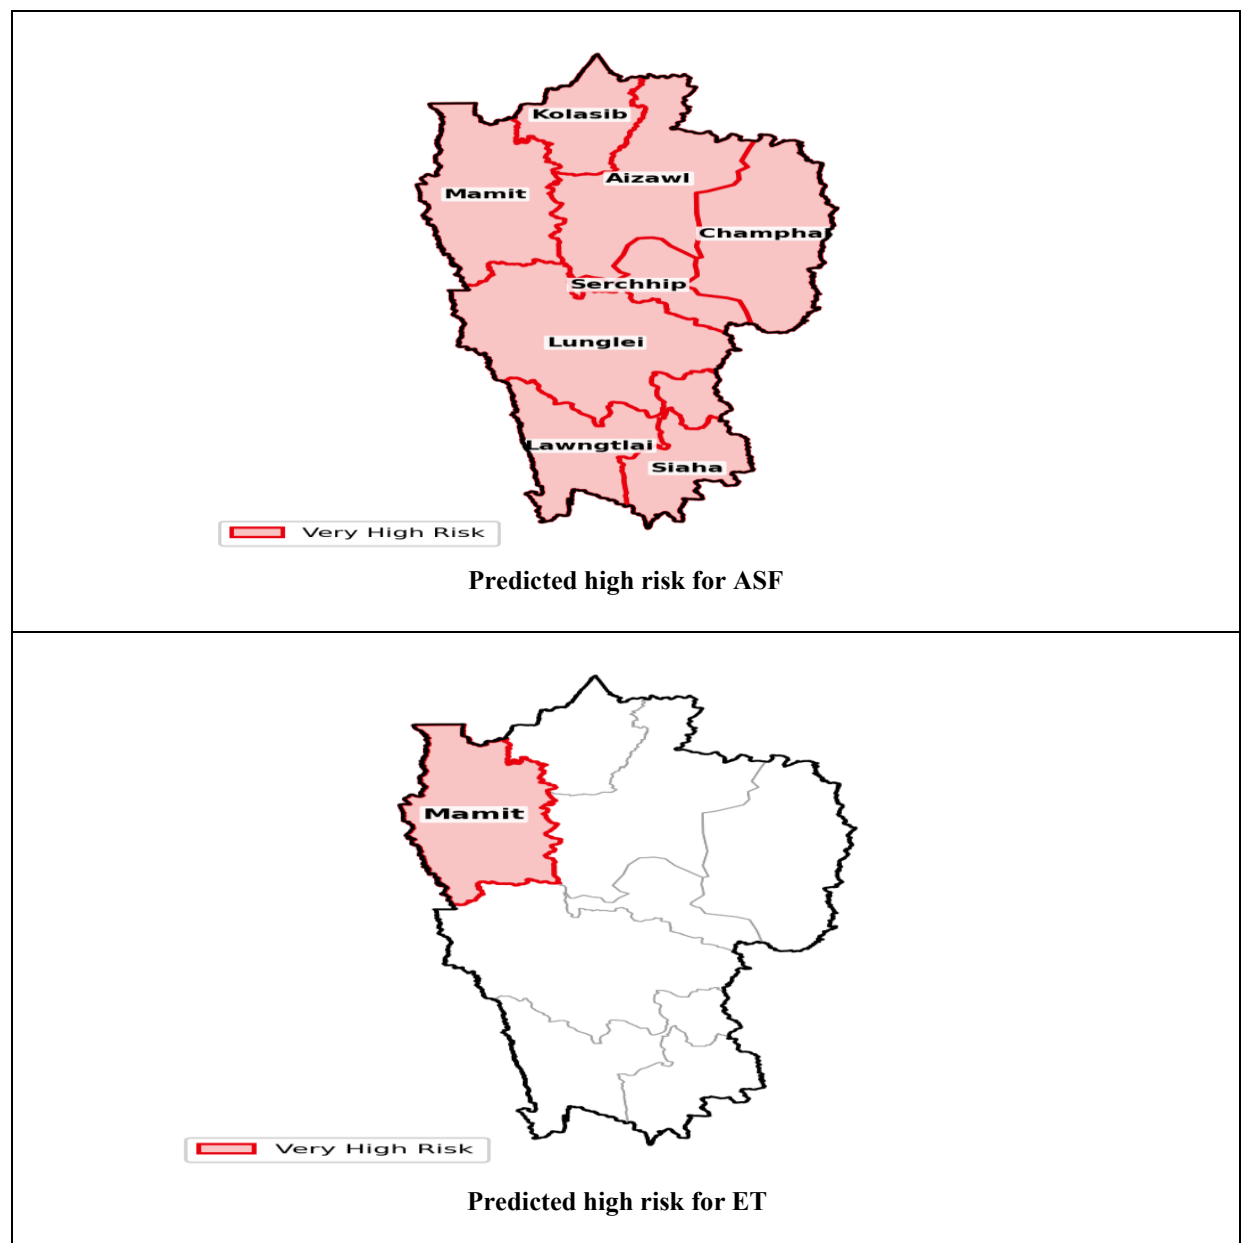

3.22. Mizoram

The livestock disease forecast for **Mizoram** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **8** districts are at **very high risk** for **ASF** and **ET** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 8 Districts of Mizoram for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Aizawl, Champhai, Kolasib, Lawngtlai, Lunglei, Mamit, Siahla and Serchhip
2.	Enterotoxaemia	Mamit

II. District-wise mapping of very high-risk areas for 2 diseases in Mizoram for the month of November 2026

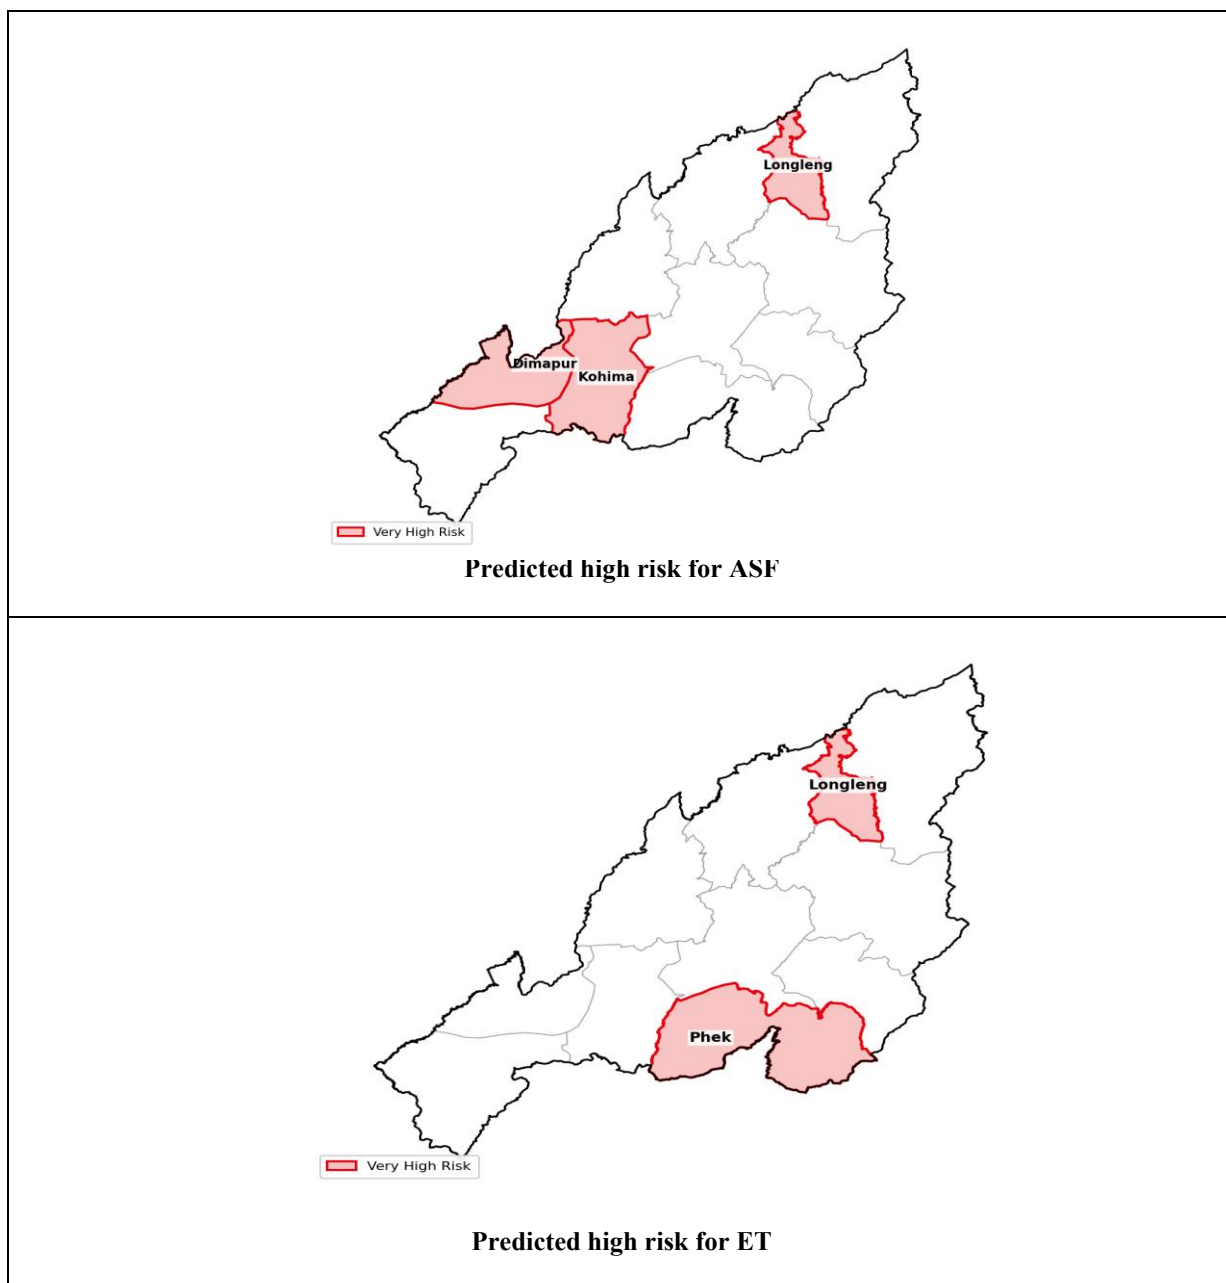

3.23. Nagaland

The livestock disease forecast for **Nagaland** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **4** districts are at **very high risk** for **ASF** and **ET** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 4 Districts of Nagaland for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Dimapur, Kohima and Longleng
2.	Enterotoxaemia	Longleng and Phek

II. District-wise mapping of very high-risk areas for 2 diseases in Nagaland for the month of November 2026

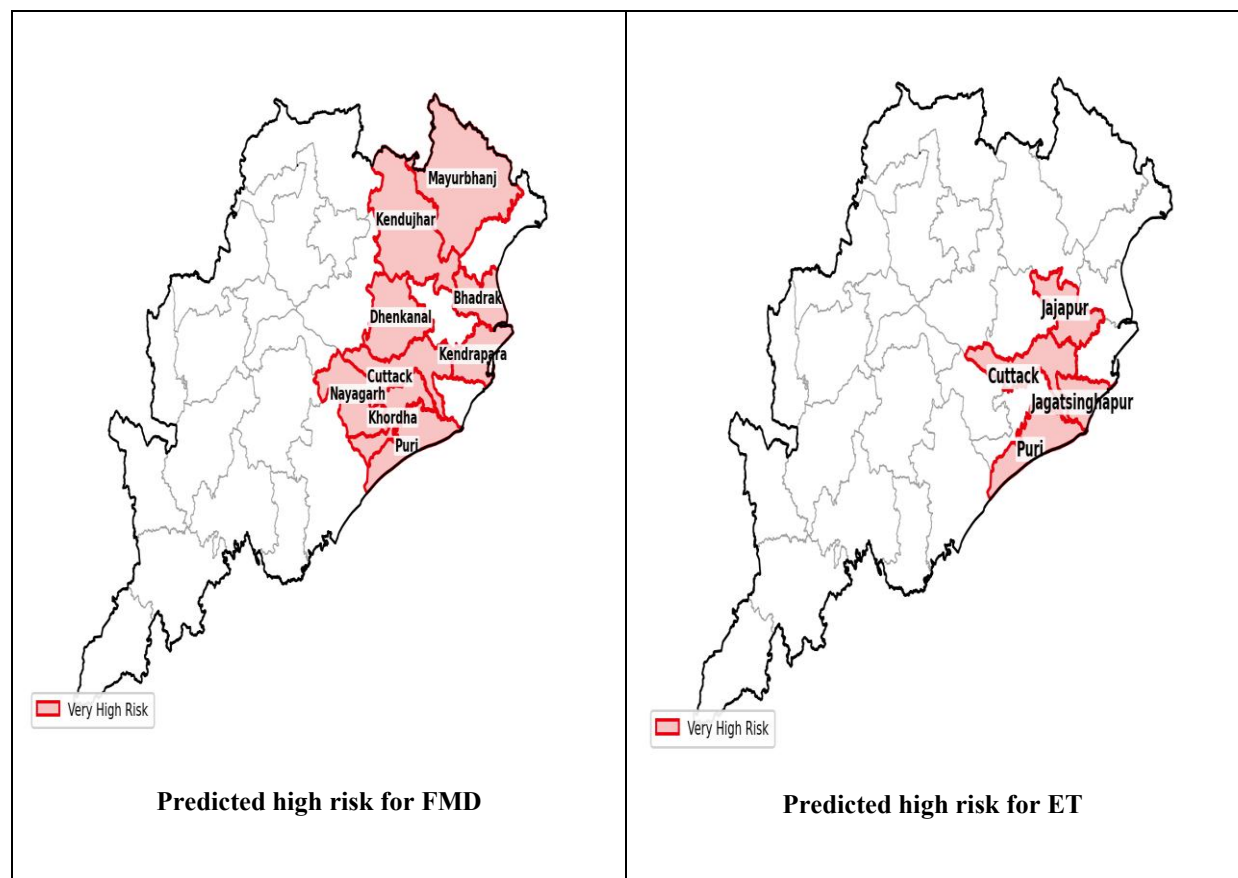

3.24. Odisha

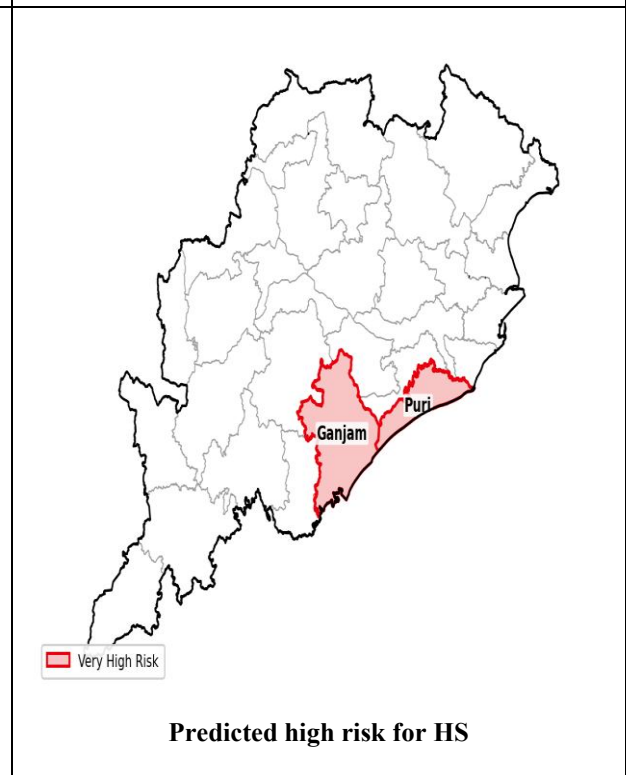

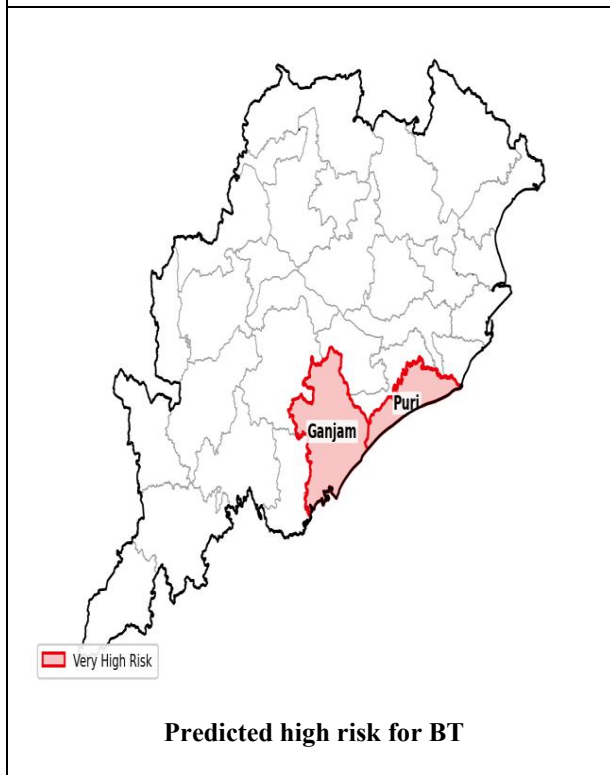

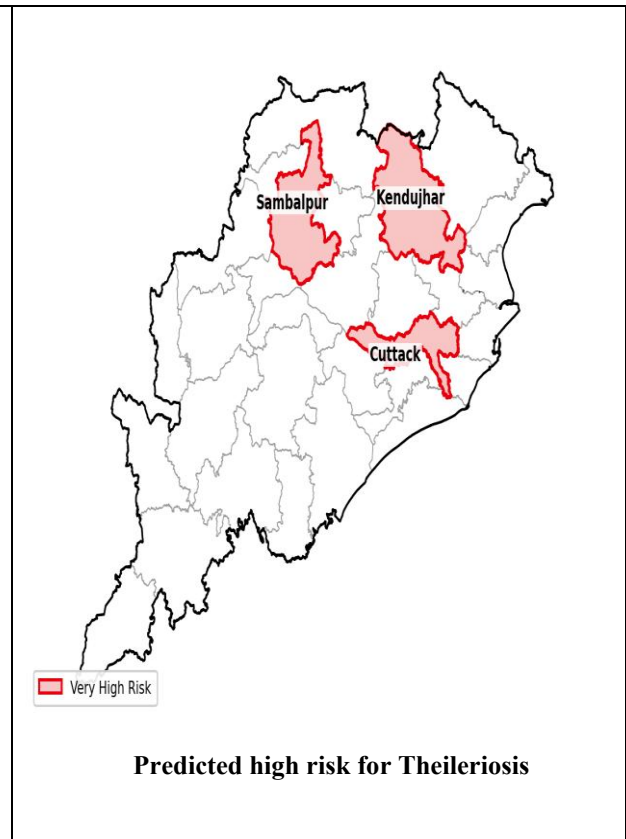

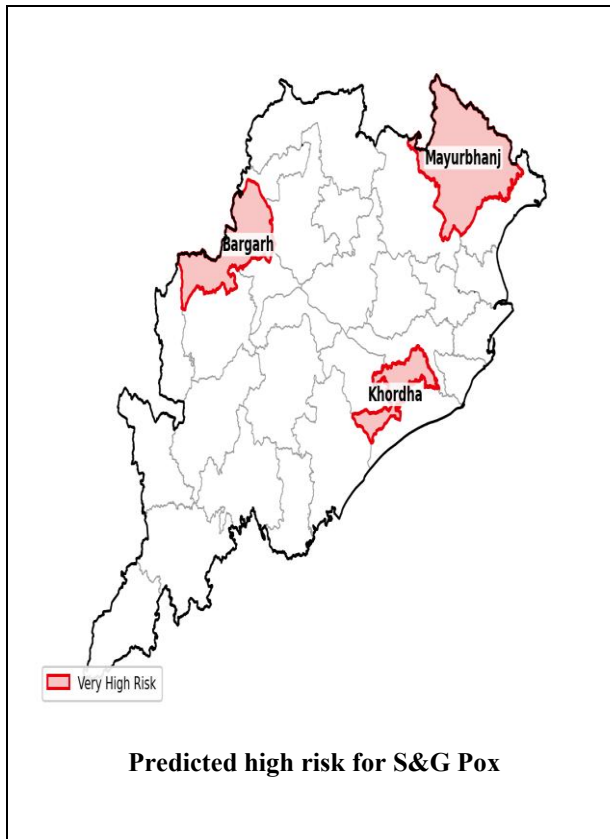

The livestock disease forecast for **Odisha** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **15** districts are at **very high risk** for **Anthrax**, **Babesiosis**, **BT**, **ET**, **FMD**, **HS**, **LSD**, **S&G Pox**, **Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

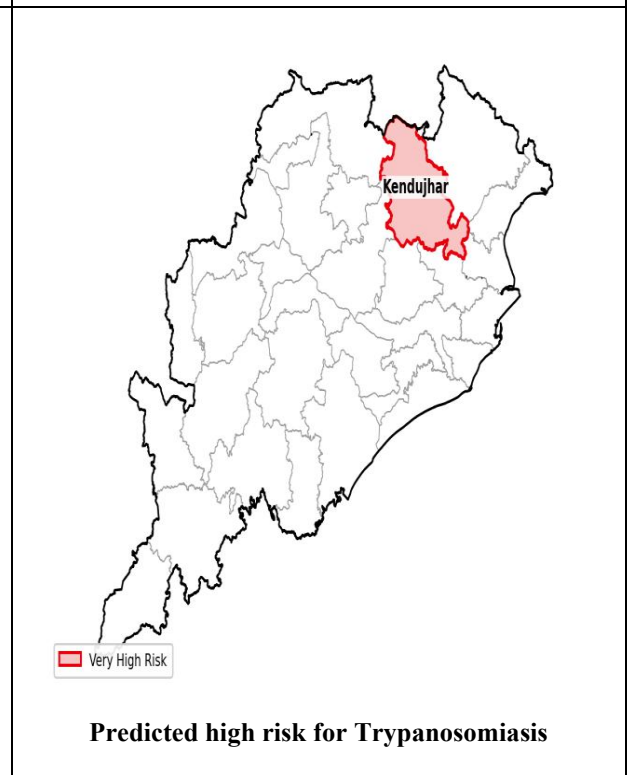

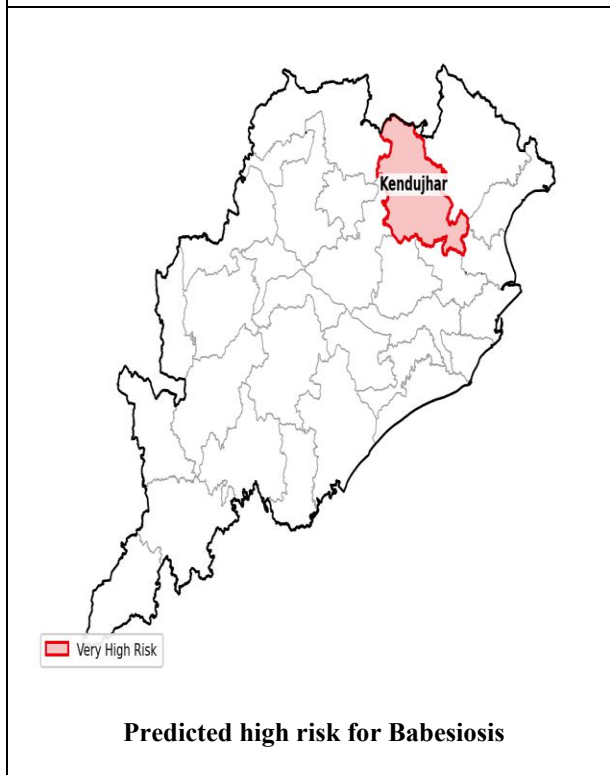

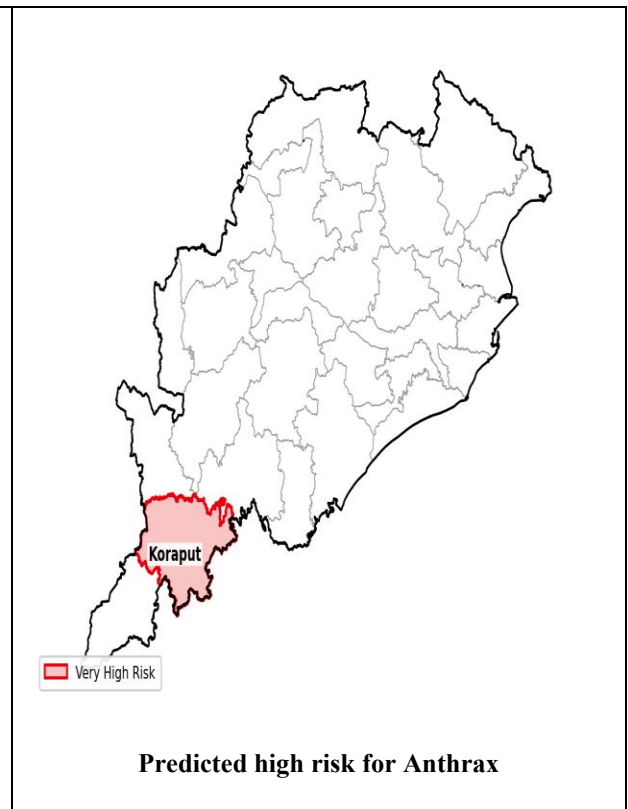

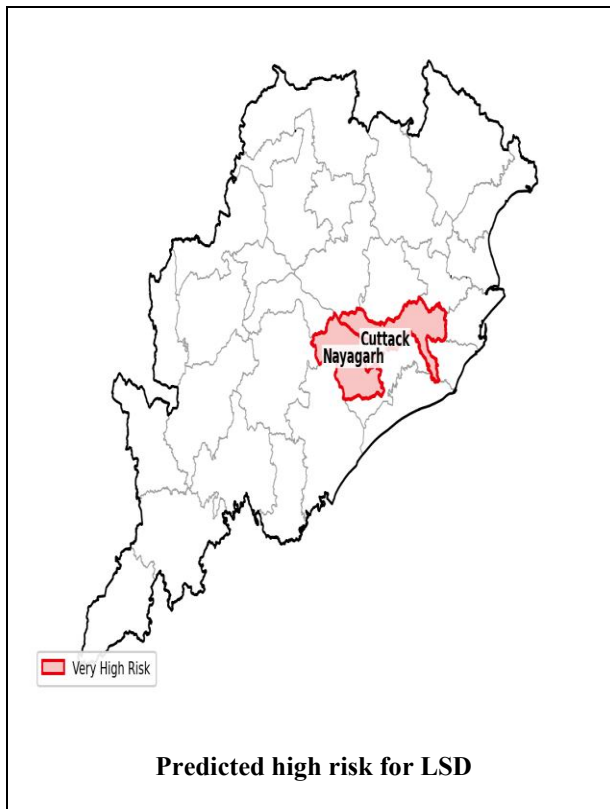

I. Livestock Diseases with Predicted Risk in 15 Districts of Odisha for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Anthrax	Koraput
2.	Babesiosis	Kendujhar
3.	Bluetongue	Ganjam and Puri
4.	Enterotoxaemia	Cuttack, Jagatsinghapur, Jajapur and Puri
5.	Foot and Mouth Disease	Bhadrak, Cuttack, Dhenkanal, Kendrapara, Kendujhar, Khordha, Mayurbhanj, Nayagarh and Puri
6.	Haemorrhagic Septicaemia	Ganjam and Puri
7.	Lumpy Skin Disease	Cuttack and Nayagarh
8.	Sheep and Goat pox	Bargarh, Khordha and Mayurbhanj
9.	Theileriosis	Cuttack, Kendujhar and Sambalpur
10.	Trypanosomiasis	Kendujhar

II. District-wise mapping of very high-risk areas for 10 diseases in Odisha for the month of November 2026

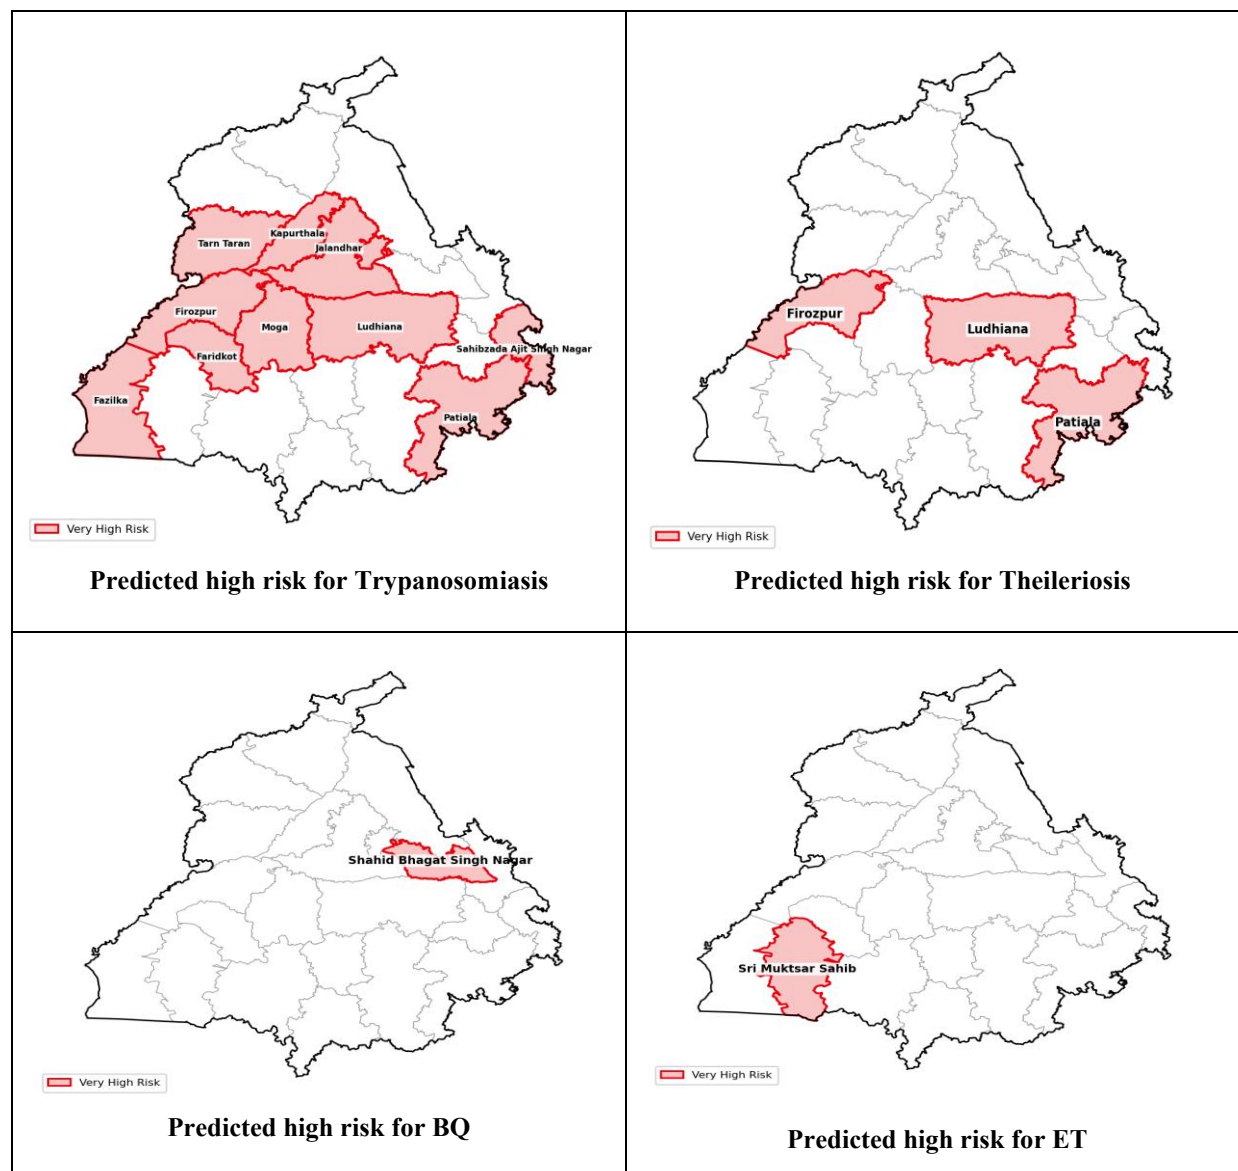

3.25. Punjab

The livestock disease forecast for **Punjab** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **12 districts** are at **very high risk** for **BQ, ET, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 12 Districts of Punjab for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Black Quarter	Shahid Bhagat Singh Nagar
2.	Enterotoxaemia	Sri Muktsar Sahib
3.	Theileriosis	Firozpur, Ludhiana and Patiala
4.	Trypanosomiasis	Faridkot, Fazilka, Firozpur, Jalandhar, Kapurthala, Ludhiana, Moga, Patiala, Sahibzada Ajit Singh Nagar and Tarn Taran

II. District-wise mapping of very high-risk areas for 4 diseases in Punjab for the month of November 2026

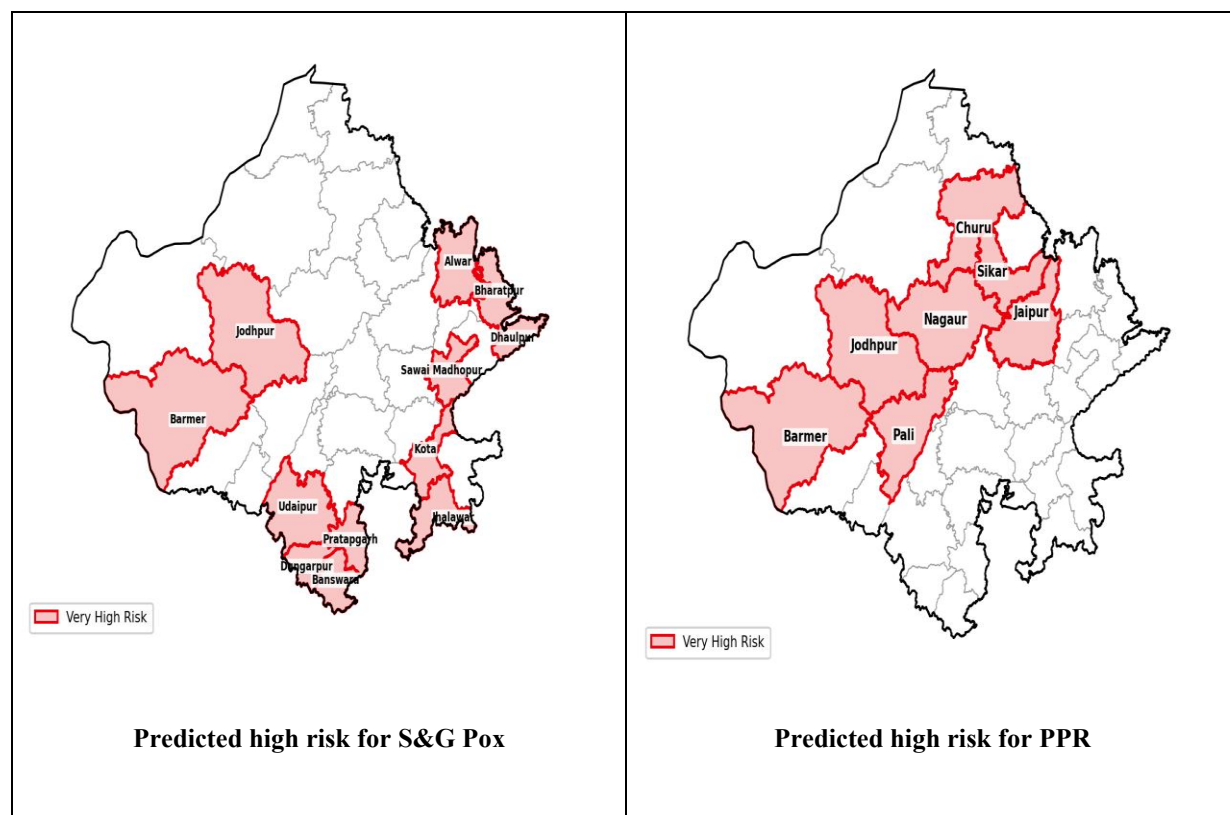

3.26. Rajasthan

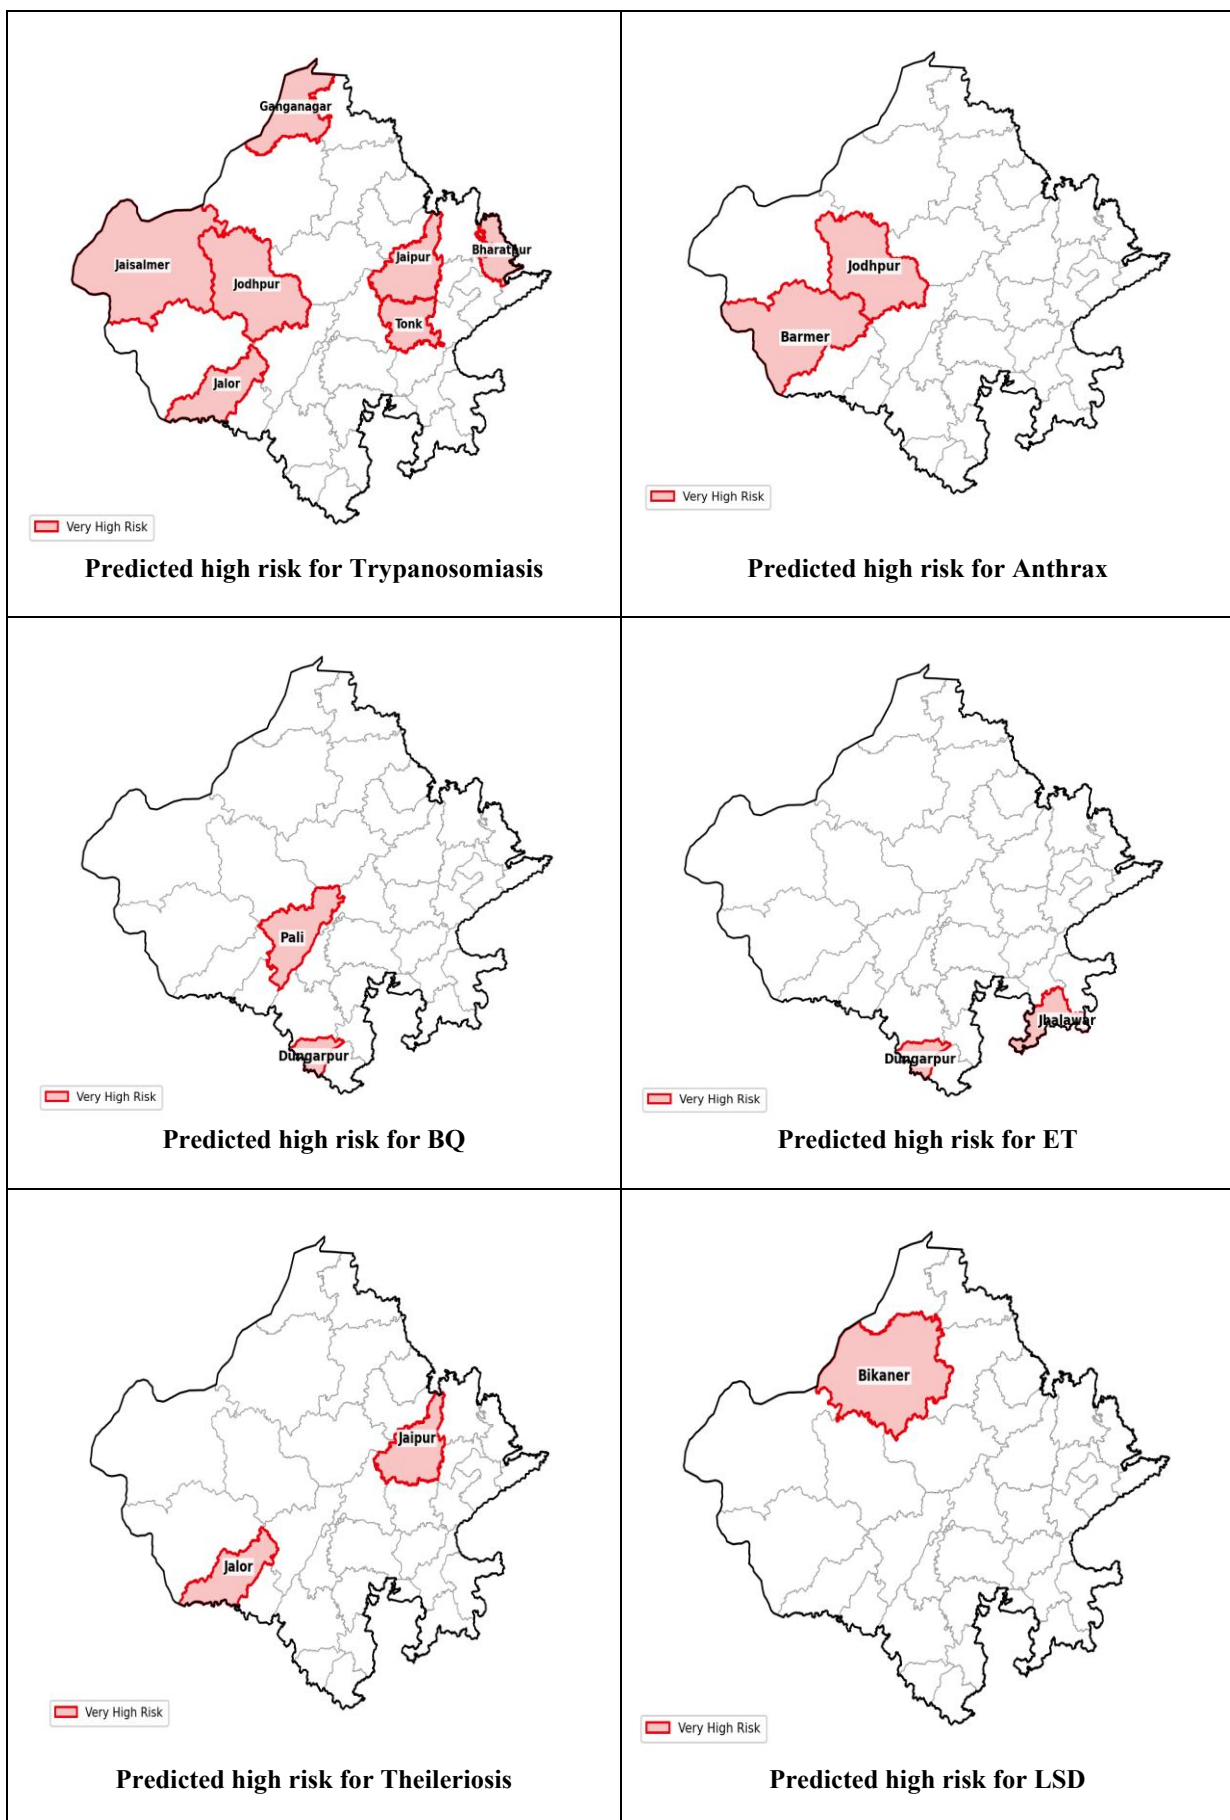

The livestock disease forecast for **Rajasthan** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **22 districts** are at **very high risk** for **Anthrax, BQ, ET, LSD, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 22 Districts of Rajasthan for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Anthrax	Barmer and Jodhpur
2.	Black Quarter	Dungarpur and Pali
3.	Enterotoxaemia	Dungarpur and Jhalawar
4.	Lumpy Skin Disease	Bikaner
5.	Peste des Petits Ruminants	Barmer, Churu, Jaipur, Jodhpur, Nagaur, Pali and Sikar
6.	Sheep and Goat pox	Alwar, Banswara, Barmer, Bharatpur, Dhaulpur, Dungarpur, Jhalawar, Jodhpur, Kota, Pratapgarh, Sawai Madhopur and Udaipur
7.	Theileriosis	Jaipur and Jalor
8.	Trypanosomiasis	Bharatpur, Ganganagar, Jaipur, Jaisalmer, Jalor, Jodhpur and Tonk

II. District-wise mapping of very high-risk areas for 8 diseases in Rajasthan for the month of November 2026

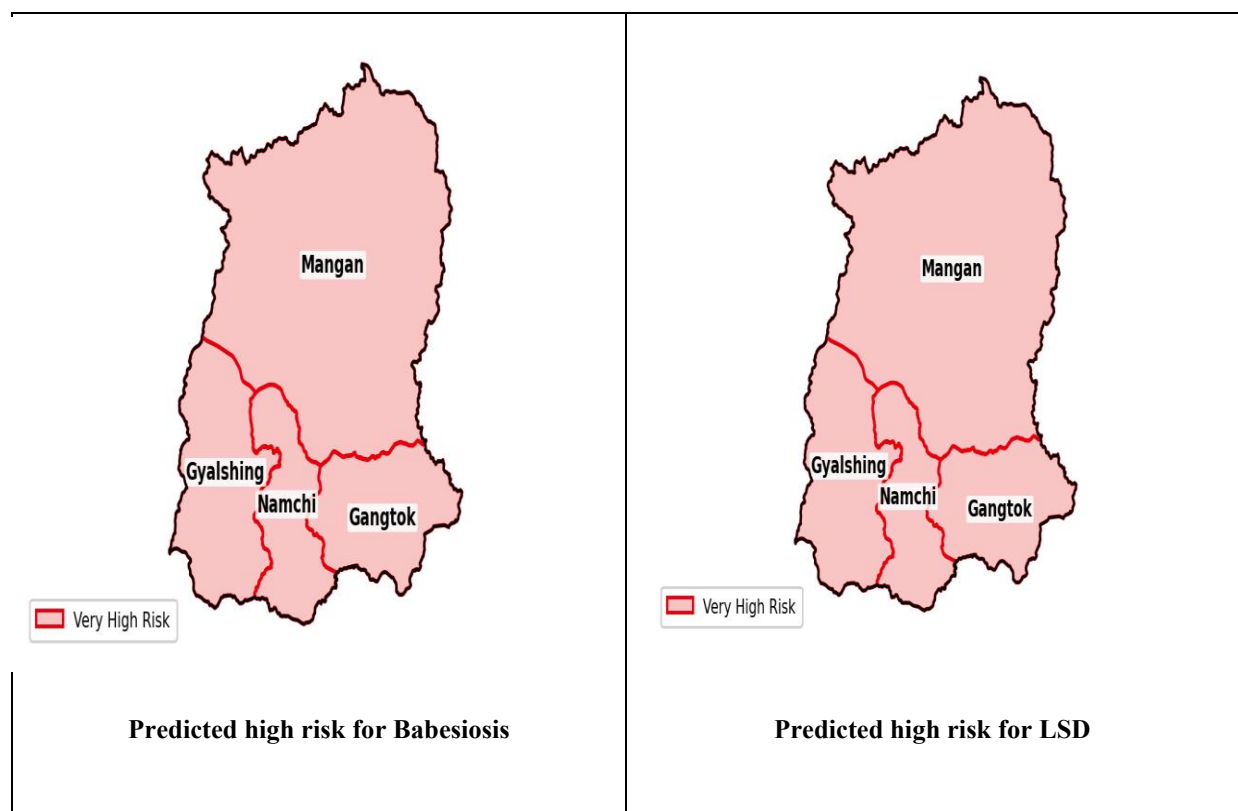

3.27. Sikkim

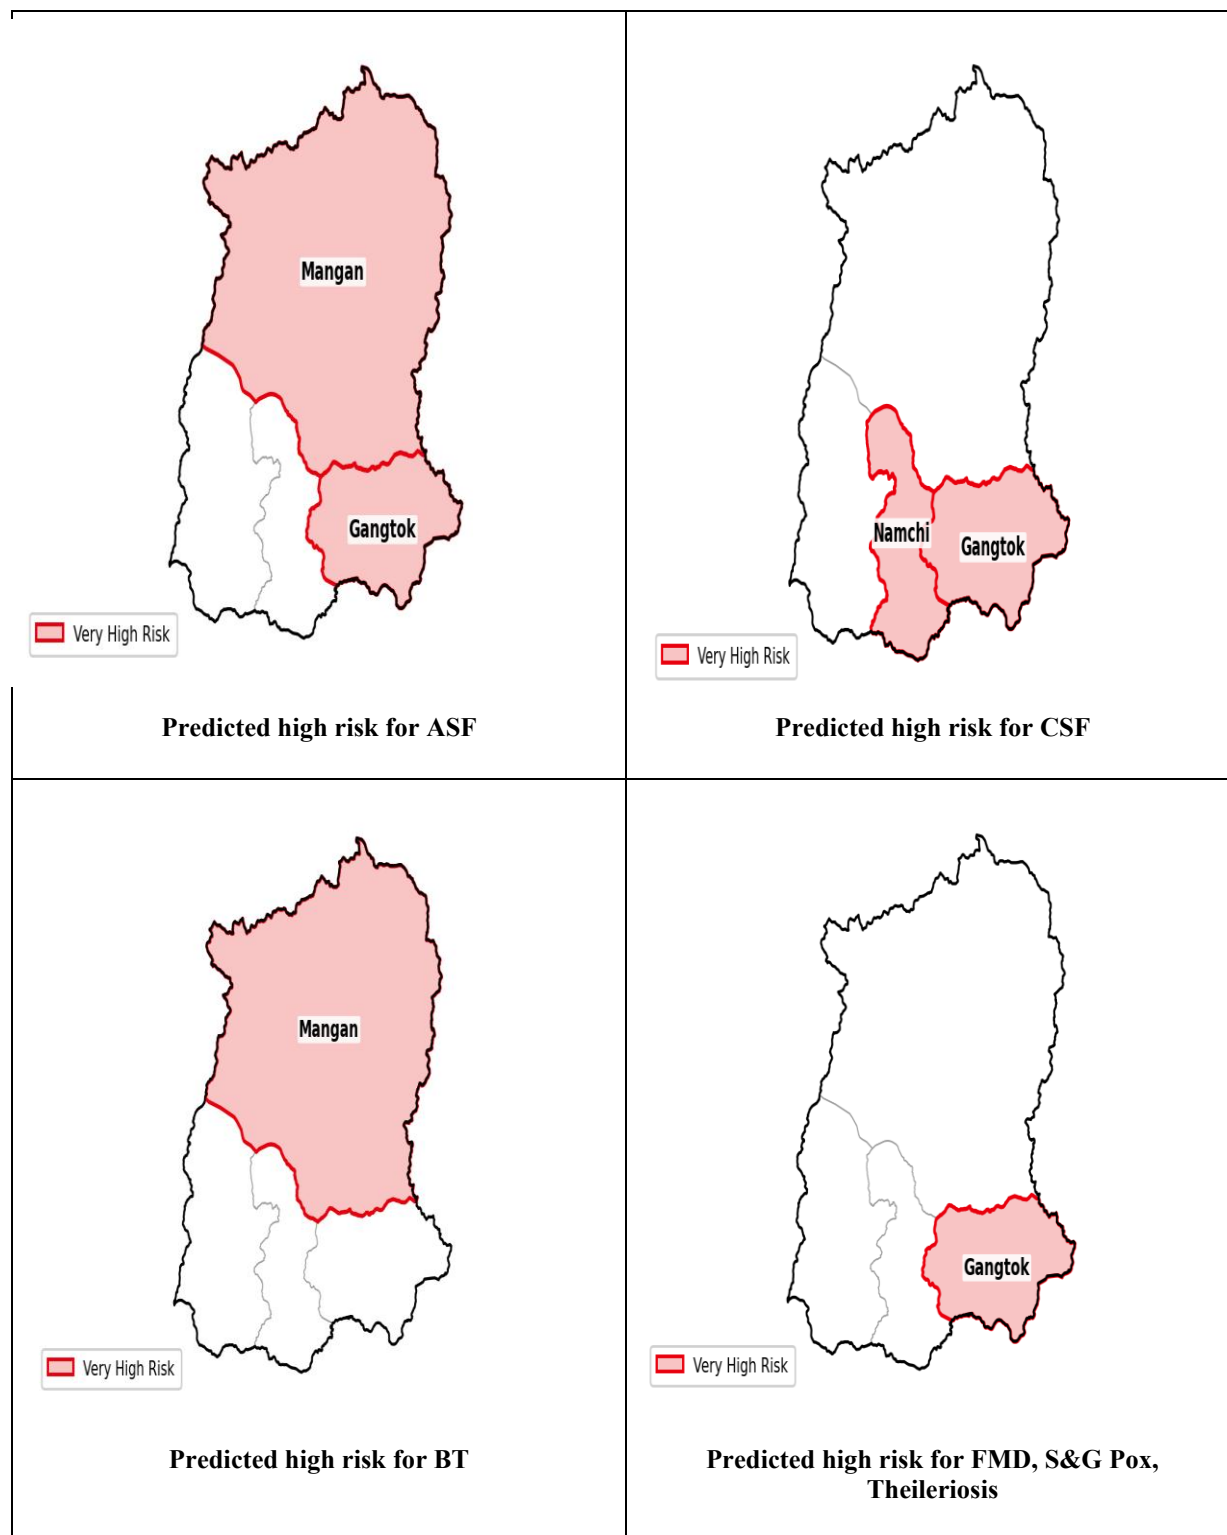

The livestock disease forecast for **Sikkim** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **4 districts** are at **very high risk** for **ASF, Babesiosis, BQ, BT, CSF, FMD, LSD, S&G Pox** and **Theileriosis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 4 Districts of Sikkim for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Gangtok and Mangan
2.	Babesiosis	Gangtok, Mangan, Namchi and Gyalshing
3.	Black Quarter	Gangtok
4.	Bluetongue	Mangan
5.	Classical Swine Fever	Gangtok and Namchi
6.	Foot and Mouth Disease	Gangtok
7.	Lumpy Skin Disease	Gangtok, Mangan, Namchi and Gyalshing
8.	Sheep and Goat pox	Gangtok
9.	Theileriosis	Gangtok

II. District-wise mapping of very high-risk areas for 9 diseases in Sikkim for the month of November 2026

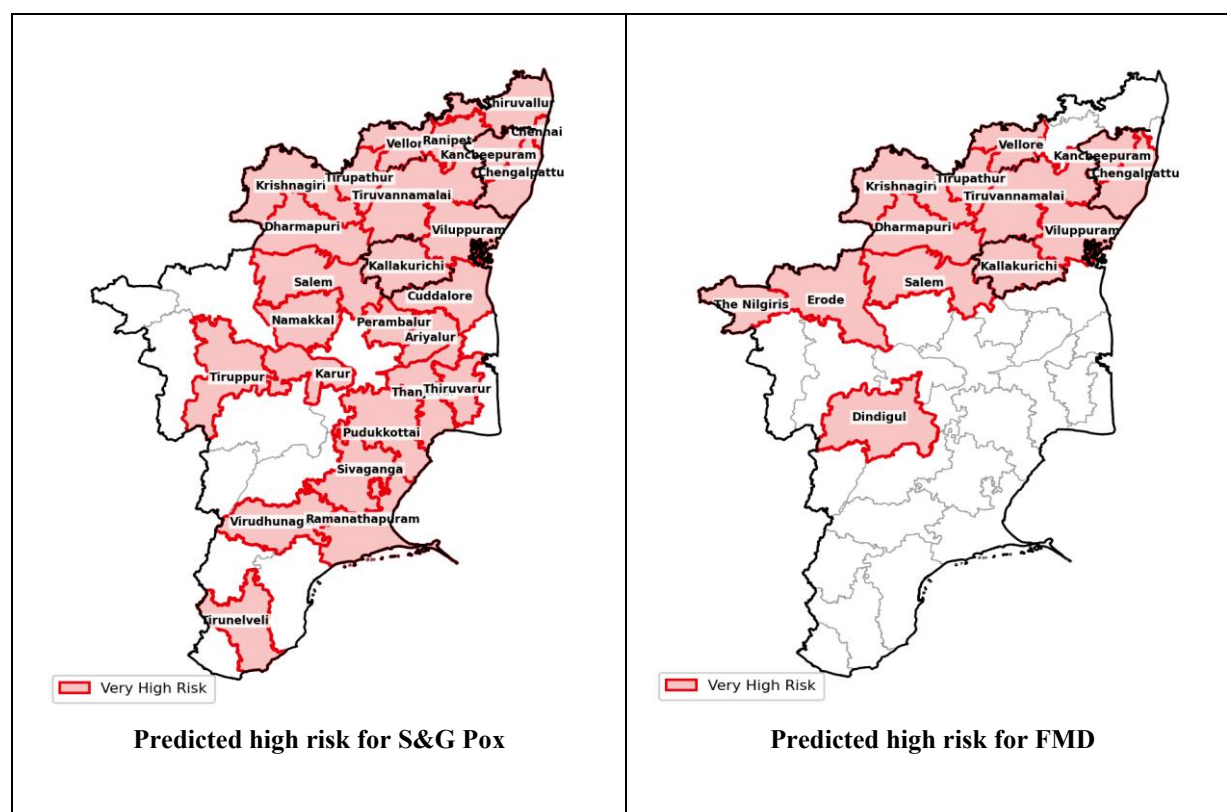

3.28. Tamil Nadu

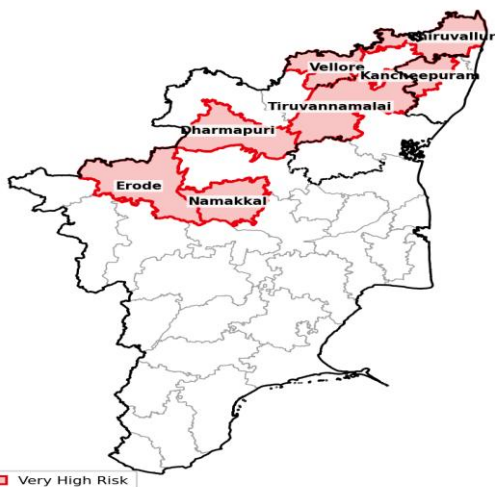

The livestock disease forecast for **Tamil Nadu** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **29 districts** are at **very high risk** for **ASF, Anthrax, BT, ET, FMD, LSD, PPR and S&G Pox** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 29 Districts of Tamil Nadu for November 2026

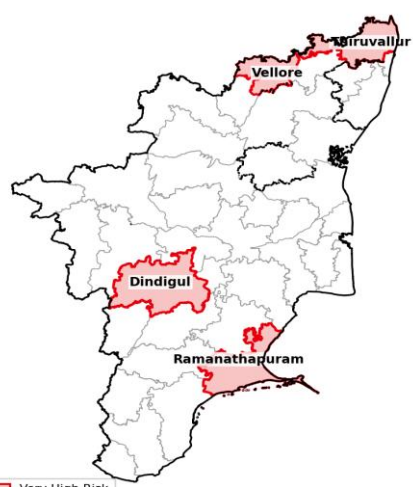

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	The Nilgiris
2.	Anthrax	Dindigul, Ramanathapuram, Thiruvallur and Vellore
3.	Bluetongue	Pudukkottai and Tirunelveli
4.	Enterotoxaemia	Erode
5.	Foot and Mouth Disease	Chengalpattu, Dharmapuri, Dindigul, Erode, Kallakurichi, Kancheepuram, Krishnagiri, Salem, The Nilgiris, Tirupattur, Tiruvannamalai, Vellore and Viluppuram
6.	Lumpy Skin Disease	Dharmapuri, Erode, Kancheepuram, Namakkal, Thiruvallur, Tiruvannamalai and Vellore
7.	Peste des Petits Ruminants	Salem
8.	Sheep and Goat pox	Ariyalur, Chengalpattu, Chennai, Cuddalore, Dharmapuri, Kallakurichi, Kancheepuram, Karur, Krishnagiri, Namakkal, Perambalur, Pudukkottai, Ramanathapuram, Ranipet, Salem, Sivaganga, Thanjavur, Thiruvallur, Thiruvarur, Tirunelveli, Tirupattur, Tiruppur, Tiruvannamalai, Vellore, Viluppuram and Virudhunagar

II. District-wise mapping of very high-risk areas for 8 diseases in Tamil Nadu for the month of November 2026

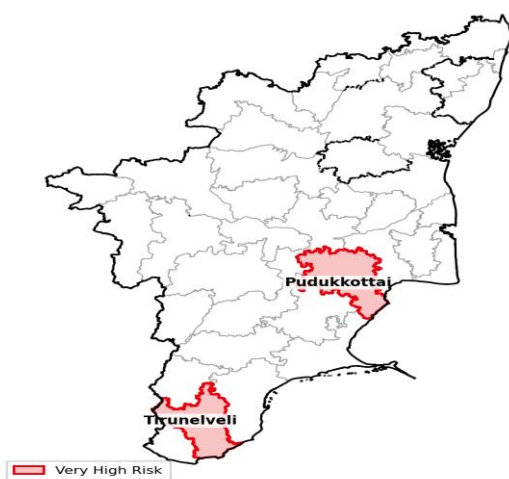

Predicted high risk for LSD

Predicted high risk for Anthrax

Predicted high risk for BT

Predicted high risk for ASF

Predicted high risk for ET

Predicted high risk for PPR

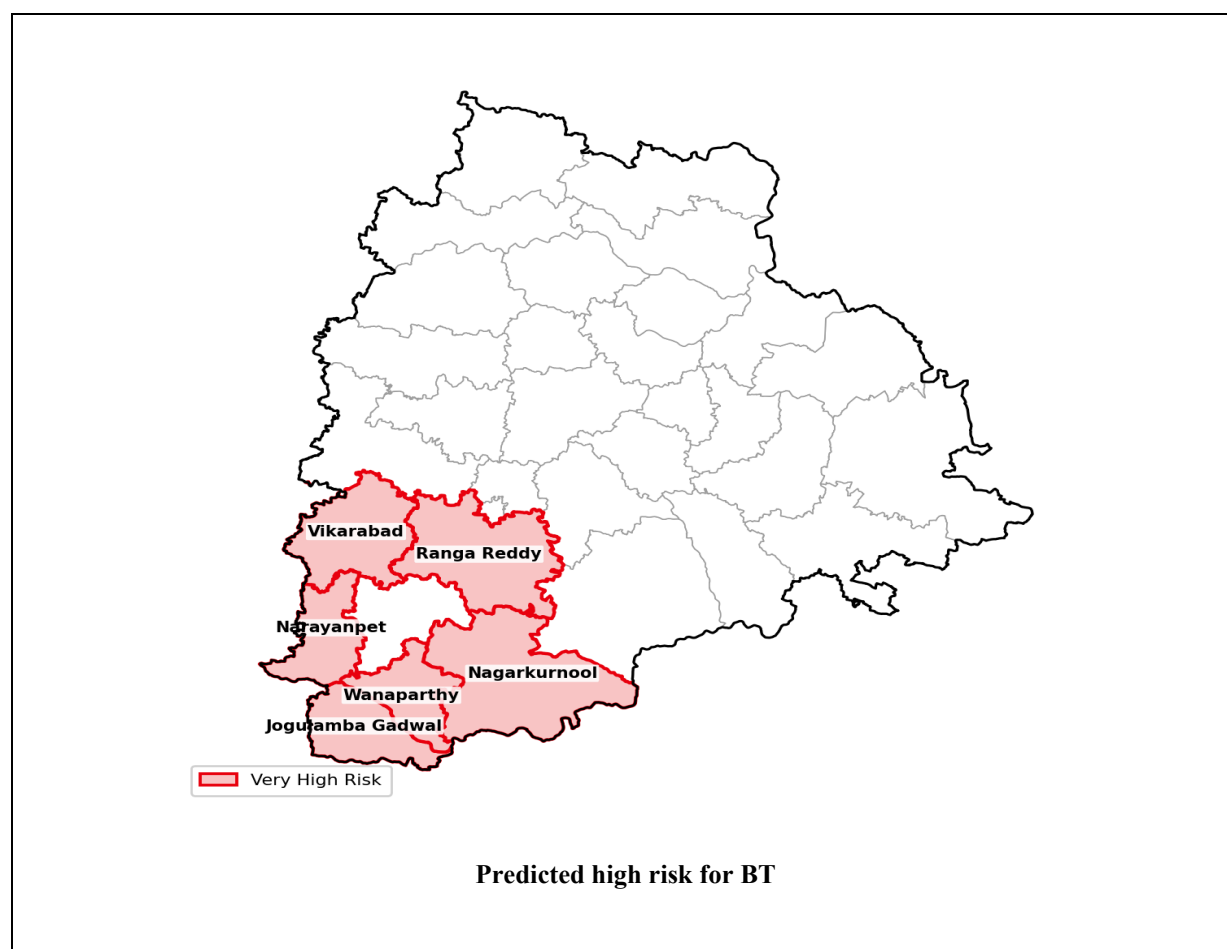

3.29. Telangana

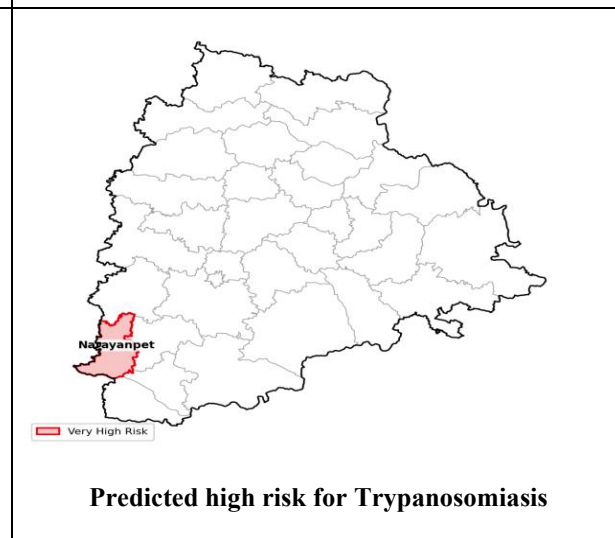

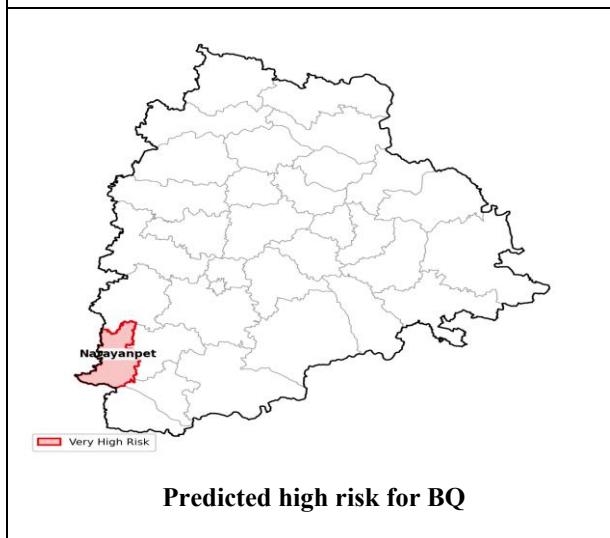

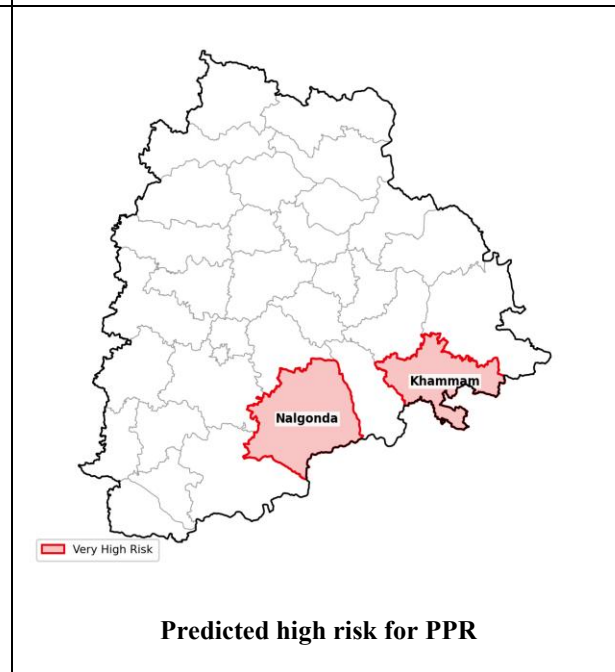

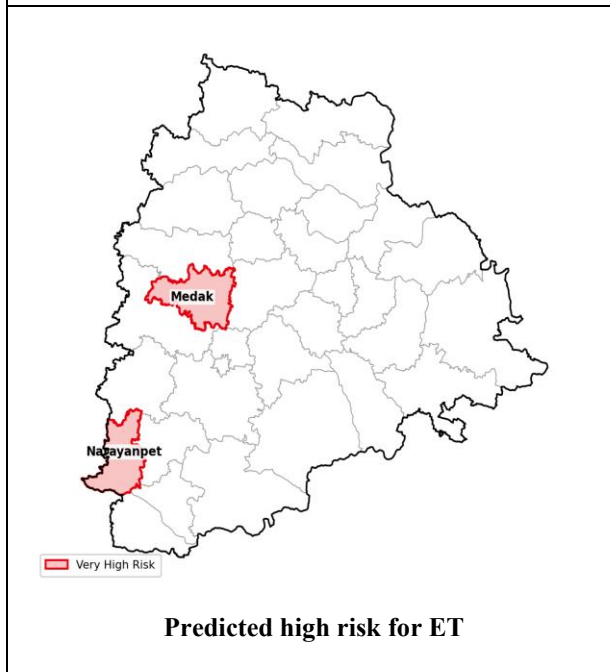

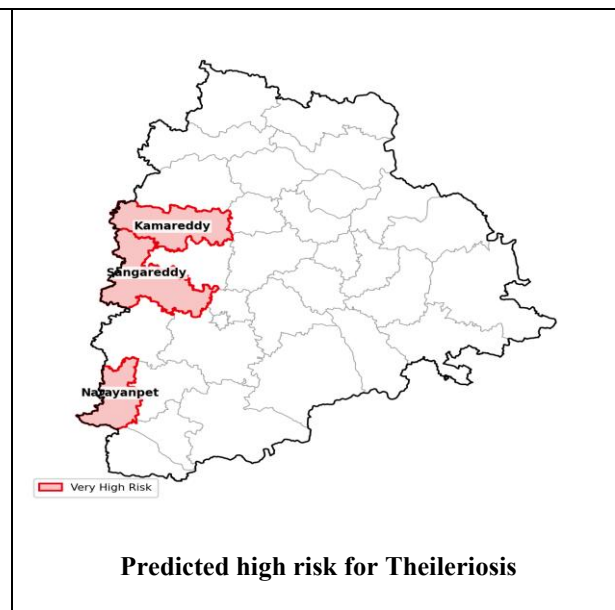

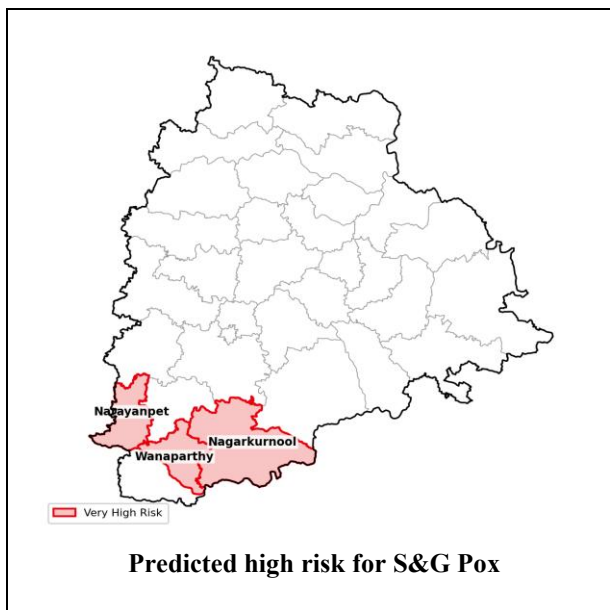

The livestock disease forecast for **Telangana** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **11** districts are at **very high risk** for **BQ, BT, ET, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 11 Districts of Telangana for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Black Quarter	Narayanpet
2.	Bluetongue	Jogulamba, Nagarkurnool, Narayanpet, Rangareddy, Vikarabad and Wanaparthy
3.	Enterotoxaemia	Medak and Narayanpet
4.	Peste des Petits Ruminants	Khammam and Nalgonda
5.	Sheep and Goat pox	Nagarkurnool, Narayanpet and Wanaparthy
6.	Theileriosis	Kamareddy, Narayanpet and Sangareddy
7.	Trypanosomiasis	Narayanpet

II. District-wise mapping of very high-risk areas for 7 diseases in Telangana for the month of November 2026

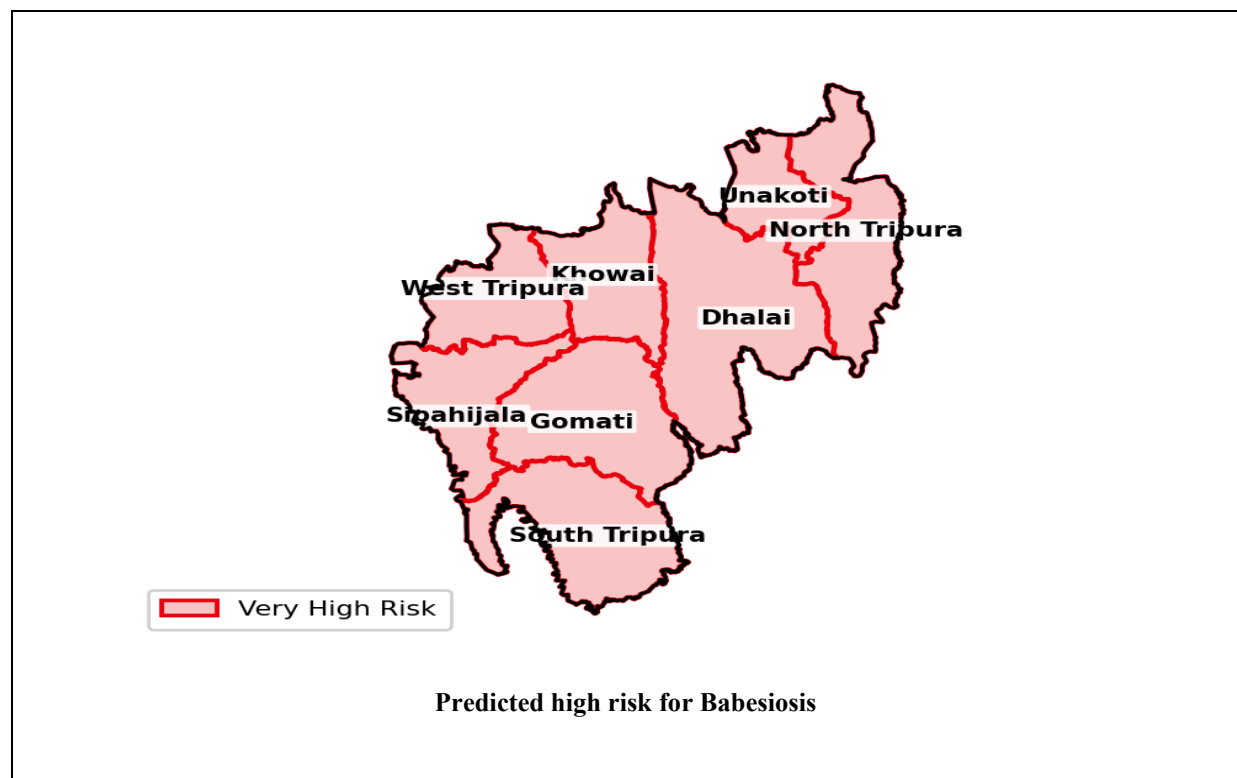

3.30. Tripura

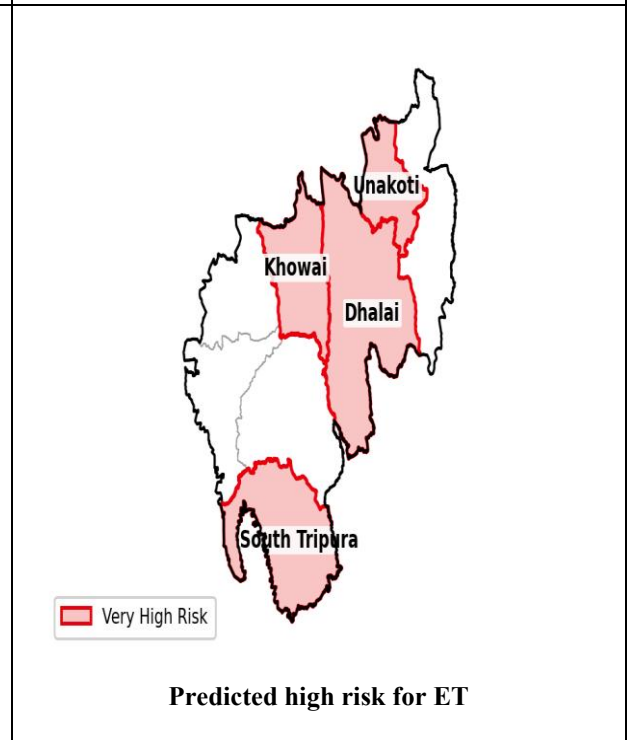

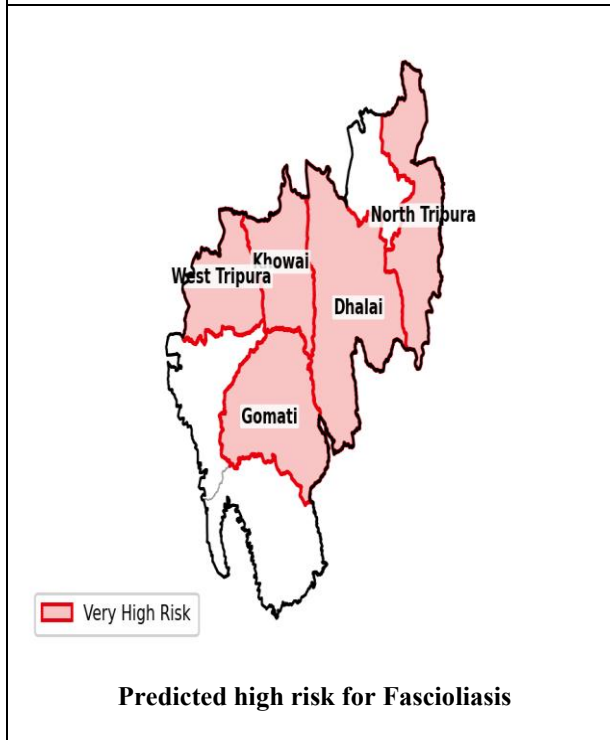

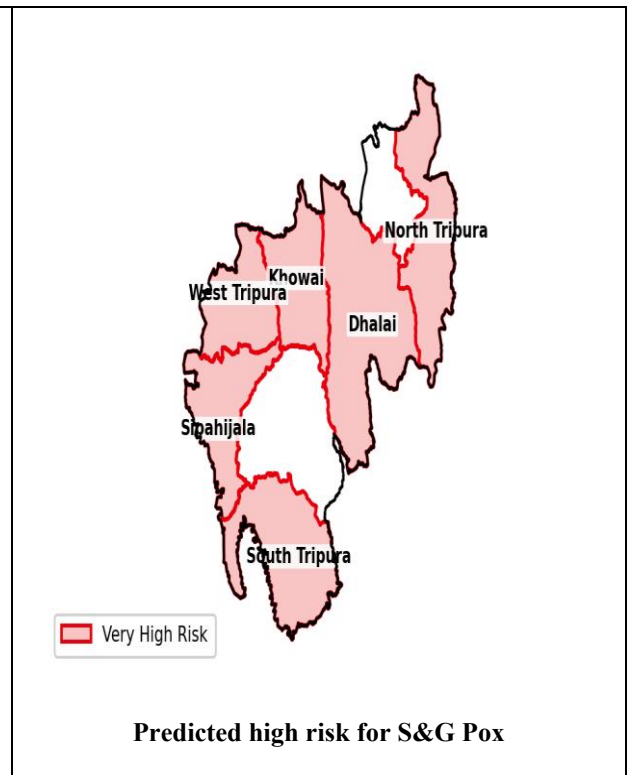

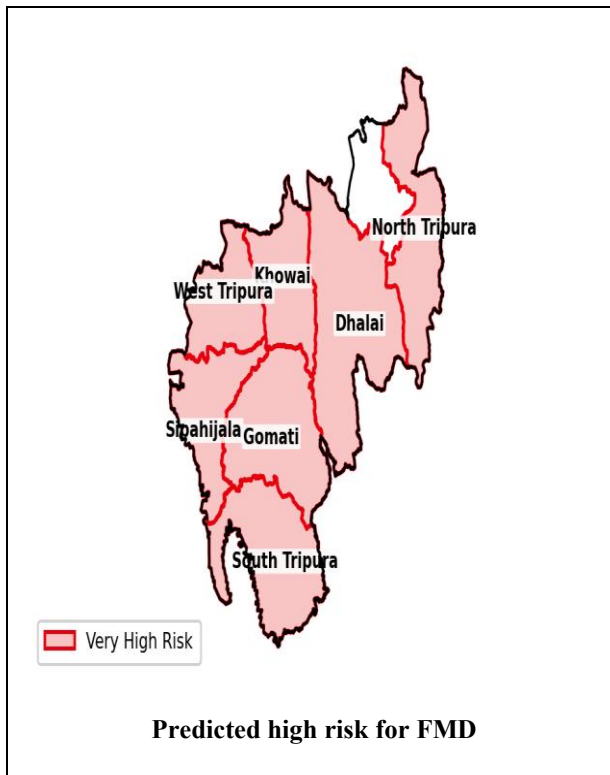

The livestock disease forecast for **Tripura** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **8 districts** are at **very high risk** for **ASF, Babesiosis, BQ, BT, CSF, ET, Fascioliasis, FMD, LSD, PPR** and **S&G Pox** showing the highest predicted risks.

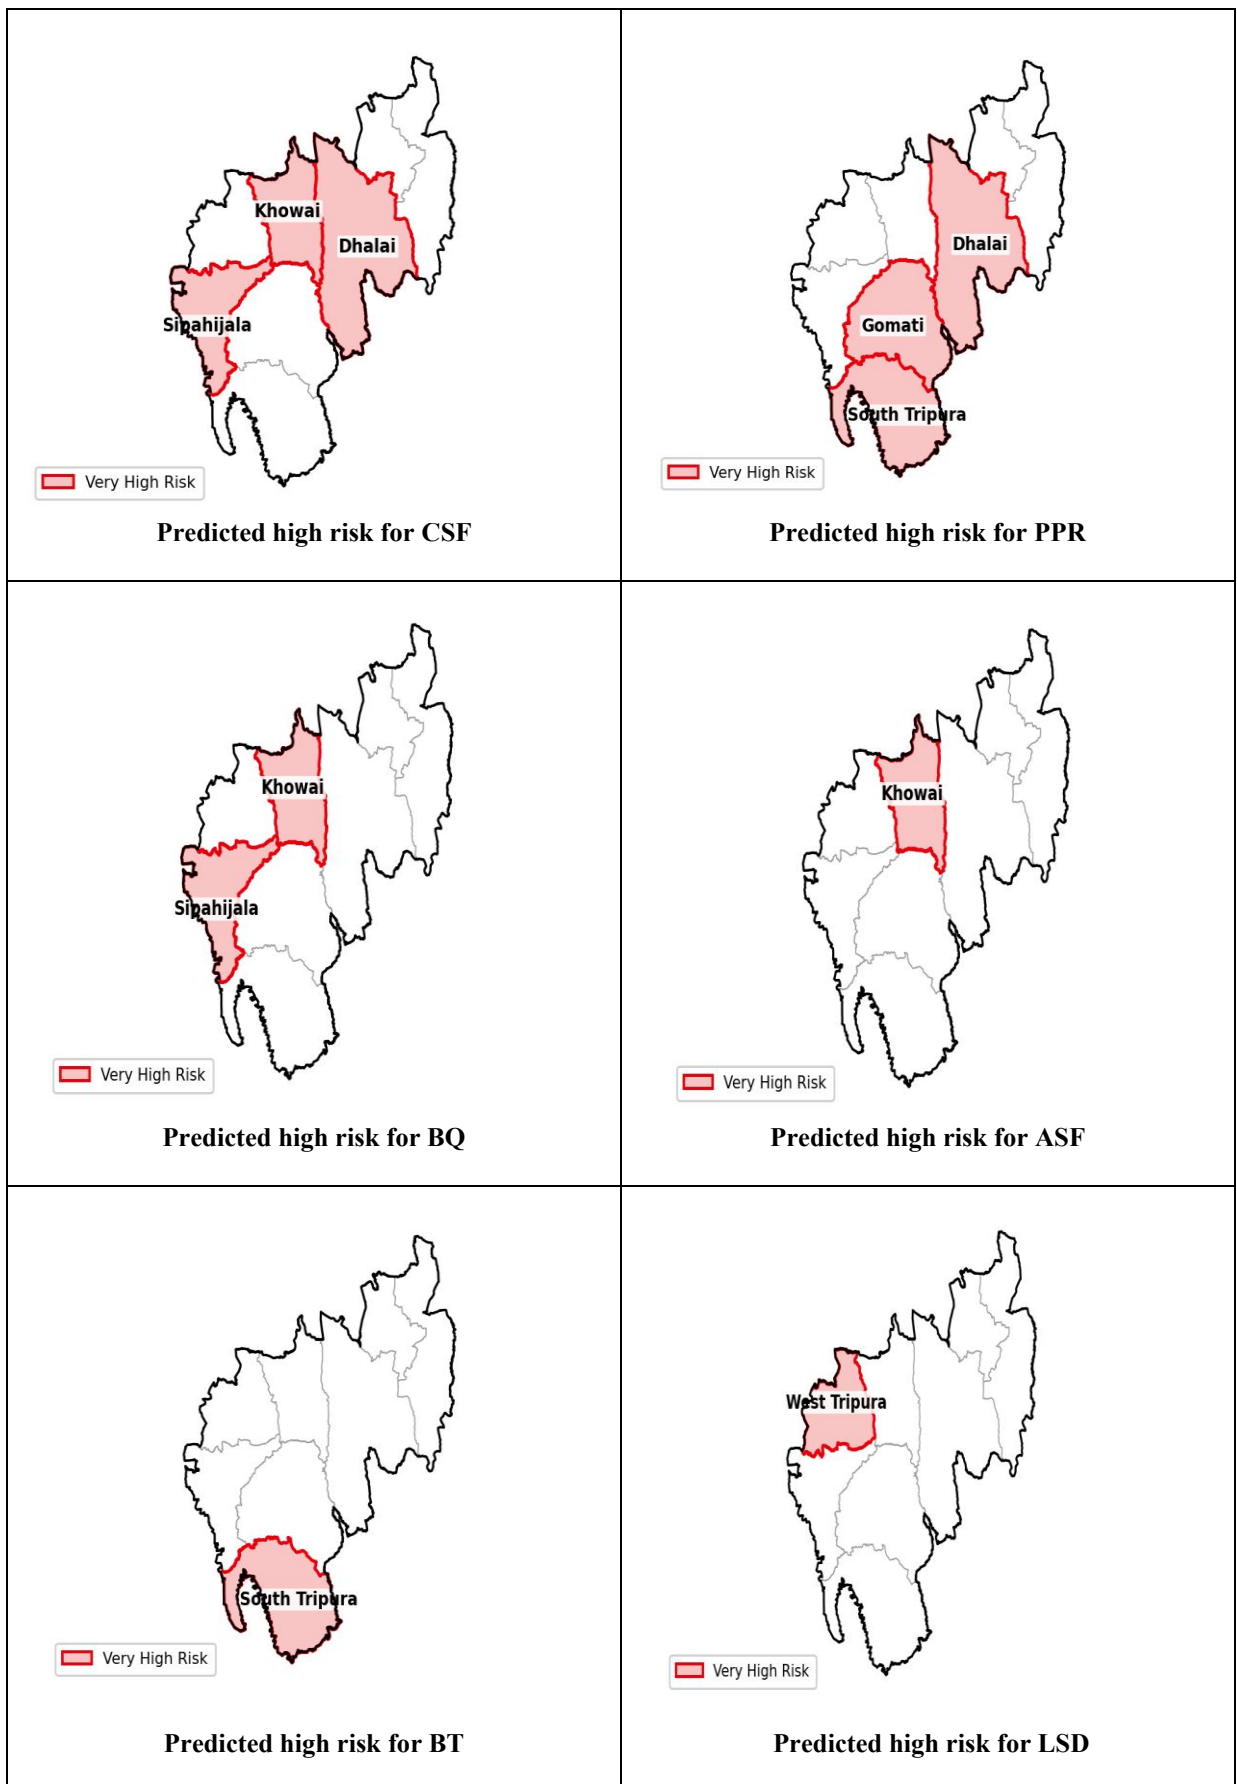

I. Livestock Diseases with Predicted Risk in 8 Districts of Tripura for November 2026

Sl. No.	Disease Name	Names of Districts
1.	African Swine Fever	Khowai
2.	Babesiosis	Dhalai, Gomati, Khowai, North Tripura, Sipahijala, South Tripura, Unakoti and West Tripura
3.	Black Quarter	Khowai and Sipahijala
4.	Bluetongue	South Tripura
5.	Classical Swine Fever	Dhalai, Khowai and Sipahijala
6.	Enterotoxaemia	Dhalai, Khowai, South Tripura and Unakoti
7.	Fascioliasis	Dhalai, Gomati, Khowai, North Tripura and West Tripura
8.	Foot and Mouth Disease	Dhalai, Gomati, Khowai, North Tripura, Sipahijala, South Tripura and West Tripura
9.	Lumpy Skin Disease	West Tripura
10.	Peste des Petits Ruminants	Dhalai, Gomati and South Tripura
11.	Sheep and Goat pox	Dhalai, Khowai, North Tripura, Sipahijala, South Tripura and West Tripura

II. District-wise mapping of very high-risk areas for 11 diseases in Tripura for the month of November 2026

3.31. Uttar Pradesh

The livestock disease forecast for **Uttar Pradesh** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **74** districts are at **very high risk** for **Babesiosis, BQ, BT, ET, HS, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 74 Districts of Uttar Pradesh for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Babesiosis	Agra, Prayagraj, Ambedkar Nagar, Amethi, Amroha, Azamgarh, Baghpat, Bahraich, Ballia, Banda, Bara Banki, Bareilly, Bhadohi, Bijnor, Budaun, Bulandshahr, Chandauli, Chitrakoot, Etah, Ayodhya, Fatehpur, Firozabad, Ghazipur, Gorakhpur, Hapur, Hardoi, Hathras, Jaunpur, Kannauj, Kanpur Dehat, Kanpur Nagar, Kasganj, Kaushambi, Kheri, Kushinagar, Mathura, Meerut, Mirzapur, Muzaffarnagar, Pilibhit, Pratapgarh, Rae Bareli, Saharanpur, Sambhal, Shahjahanpur, Shamli, Sitapur, Sonbhadra, Sultanpur, Unnao and Varanasi
2.	Black Quarter	Kheri
3.	Bluetongue	Meerut
4.	Enterotoxaemia	Banda, Gonda, Moradabad, Rampur and Shahjahanpur
5.	Haemorrhagic Septicaemia	Sambhal
6.	Peste des Petits Ruminants	Etah, Fatehpur, Gonda, Gorakhpur, Hardoi, Kanpur Nagar, Moradabad and Sitapur
7.	Sheep and Goat pox	Agra, Prayagraj, Ambedkar Nagar, Amethi, Amroha, Azamgarh, Banda, Bara Banki, Bhadohi, Bijnor, Bulandshahr, Chandauli, Chitrakoot, Etah, Etawah, Ayodhya, Fatehpur, Firozabad, Gonda, Gorakhpur, Hamirpur, Hapur, Hardoi, Hathras, Jalaun, Jaunpur, Jhansi, Kanpur Dehat, Kasganj, Kaushambi, Kheri, Lalitpur, Lucknow, Mahoba, Mirzapur, Moradabad, Pratapgarh, Rae Bareli, Rampur, Shahjahanpur, Sitapur, Sultanpur and Varanasi
8.	Theileriosis	Agra, Prayagraj, Ambedkar Nagar, Amethi, Amroha, Azamgarh, Bahraich, Ballia, Banda, Bara Banki, Bareilly, Basti, Bhadohi, Budaun, Bulandshahr, Chitrakoot, Deoria, Etah, Ayodhya, Fatehpur, Ghazipur, Gorakhpur, Hapur, Hardoi, Hathras, Jalaun, Jaunpur, Kanpur Dehat, Kanpur Nagar, Kasganj, Kaushambi, Kushinagar, Mahrajganj, Mainpuri, Mathura, Mau, Meerut, Mirzapur, Moradabad, Muzaffarnagar, Pilibhit, Pratapgarh, Rae Bareli, Saharanpur, Sambhal, Sant Kabir Nagar, Siddharthnagar, Sitapur, Sonbhadra, Sultanpur, Unnao and Varanasi
9.	Trypanosomiasis	Agra, Aligarh, Prayagraj, Ambedkar Nagar, Amethi, Amroha, Auraiya, Azamgarh, Baghpat, Bahraich, Ballia, Balrampur, Banda, Bara Banki, Bareilly, Basti, Bhadohi, Bijnor, Budaun, Bulandshahr, Chandauli, Chitrakoot, Deoria, Etah, Etawah, Ayodhya, Farrukhabad, Fatehpur, Firozabad, Gautam Buddha Nagar, Ghaziabad, Ghazipur, Gonda, Gorakhpur, Hamirpur, Hapur, Hardoi, Hathras, Jalaun, Jaunpur, Kannauj, Kanpur Dehat, Kanpur Nagar, Kasganj, Kaushambi, Kheri, Kushinagar, Lucknow, Mahoba, Mahrajganj, Mainpuri, Mathura, Mau, Meerut, Mirzapur, Muzaffarnagar, Pilibhit, Pratapgarh, Rae Bareli, Saharanpur, Sambhal, Sant Kabir Nagar, Shahjahanpur, Shamli, Siddharthnagar, Sitapur, Sonbhadra, Sultanpur, Unnao and Varanasi

II. District-wise mapping of very high-risk areas for 9 diseases in Uttar Pradesh for the month of November 2026

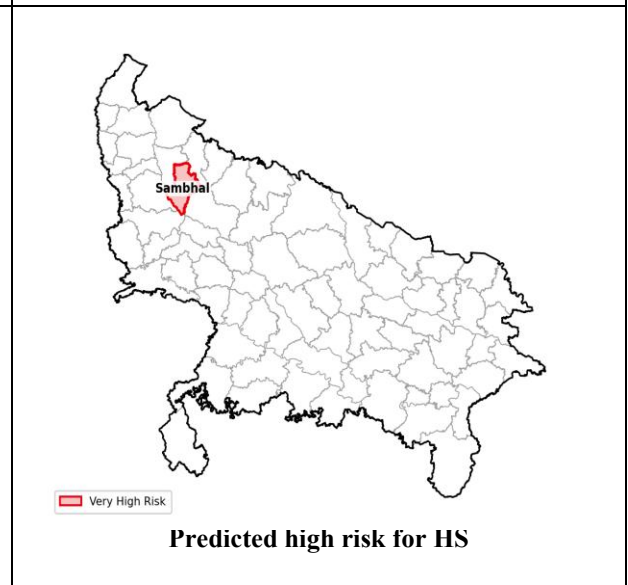

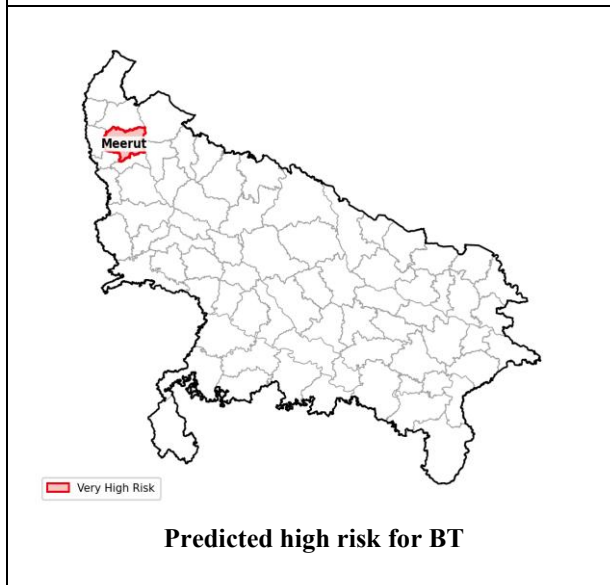

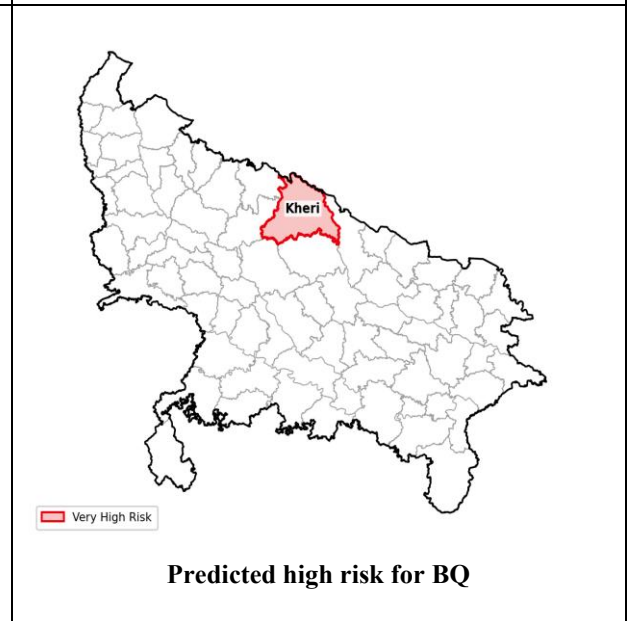

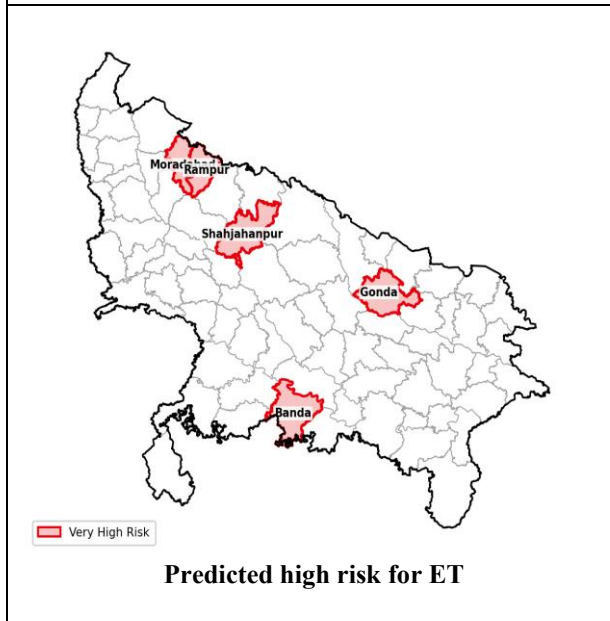

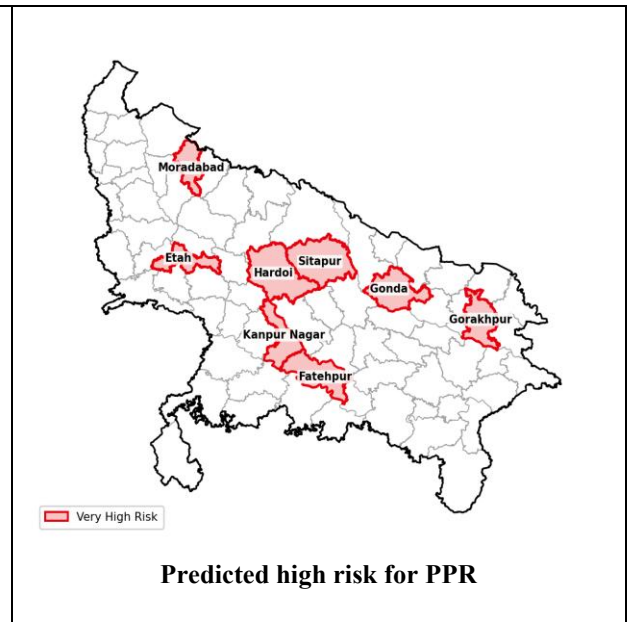

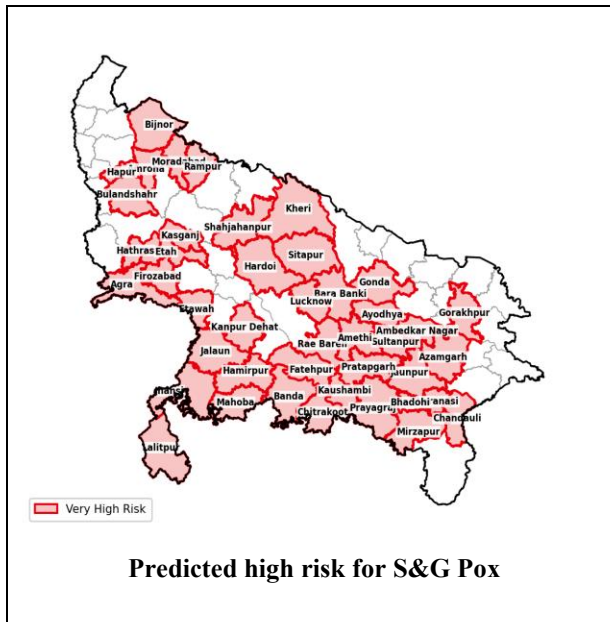

Predicted high risk for Trypanosomiasis

Predicted high risk for Theileriosis

Predicted high risk for Babesiosis

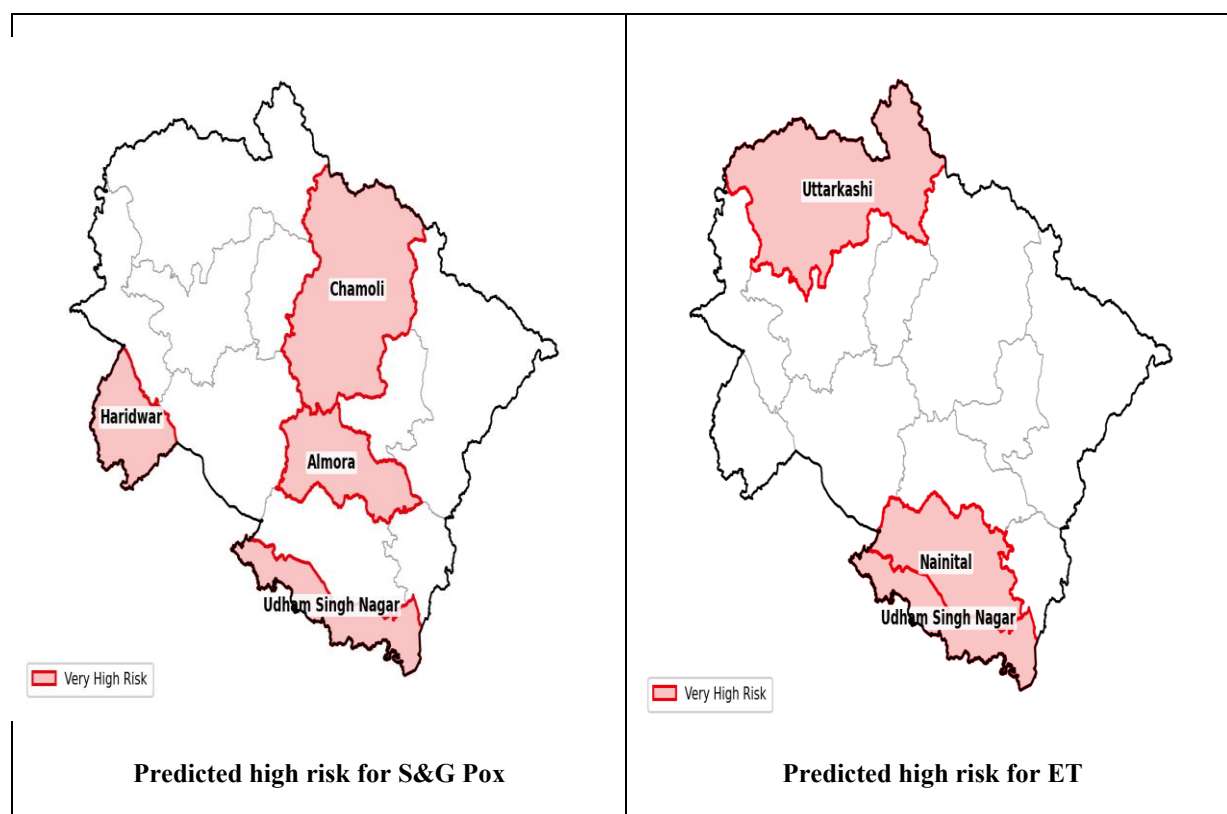

3.32. Uttarakhand

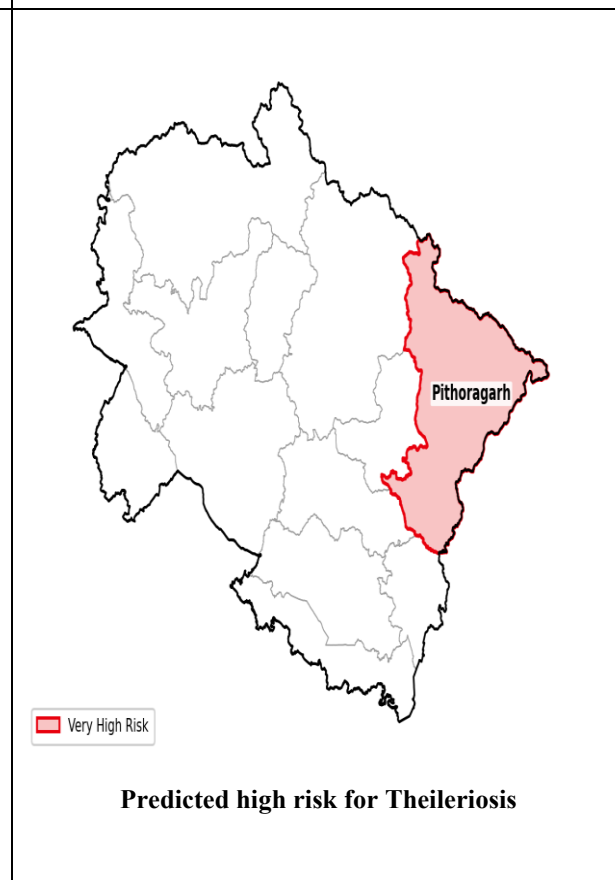

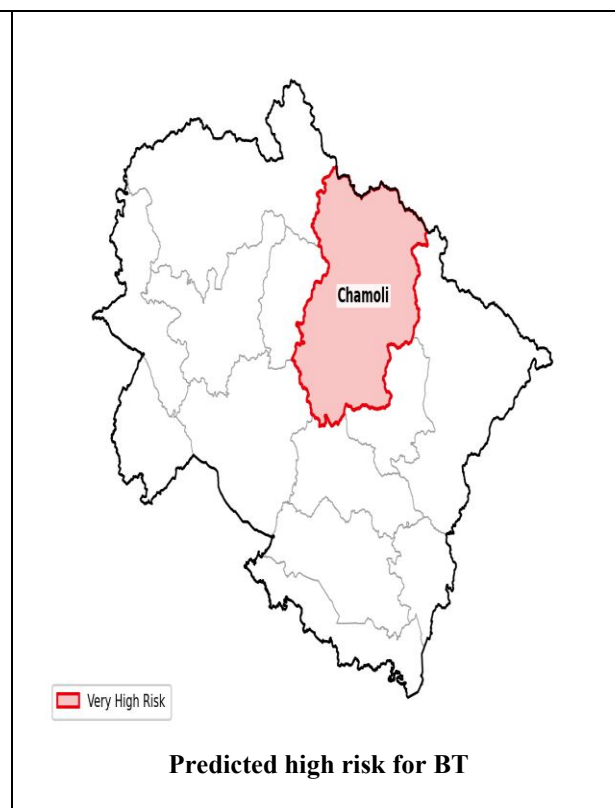

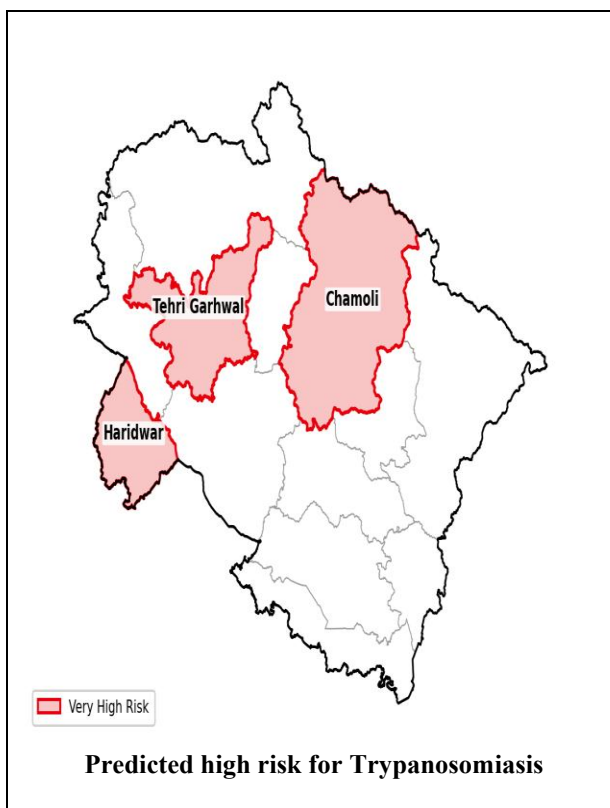

The livestock disease forecast for **Uttarakhand** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **8** districts are at **very high risk** for **BT, ET, PPR, S&G Pox, Theileriosis** and **Trypanosomiasis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 8 Districts of Uttarakhand for November 2026

Sl. No.	Disease Name	Names of Districts
1.	Bluetongue	Chamoli
2.	Enterotoxaemia	Nainital, Udham Singh Nagar and Uttarkashi
3.	Peste des Petits Ruminants	Almora
4.	Sheep and Goat pox	Almora, Chamoli, Haridwar and Udham Singh Nagar
5.	Theileriosis	Pithoragarh
6.	Trypanosomiasis	Chamoli, Haridwar and Tehri Garhwal

II. District-wise mapping of very high-risk areas for 6 diseases in Uttarakhand for the month of November 2026

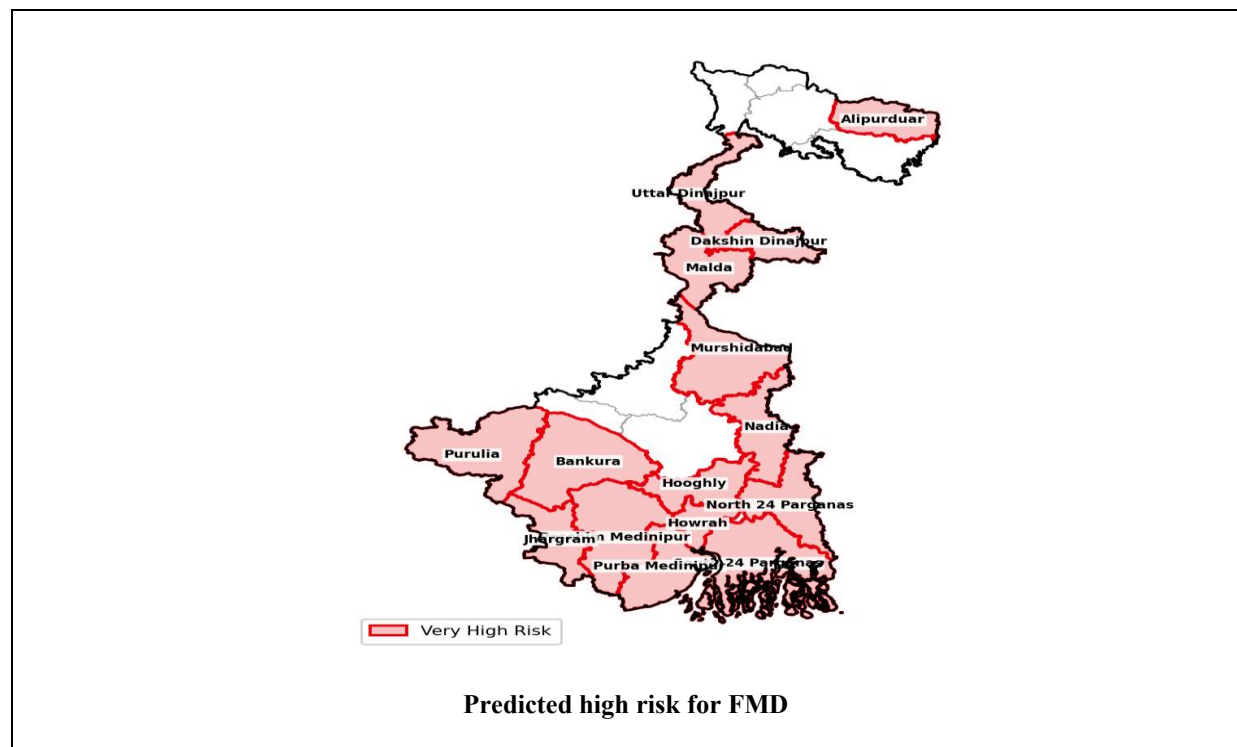

3.33. West Bengal

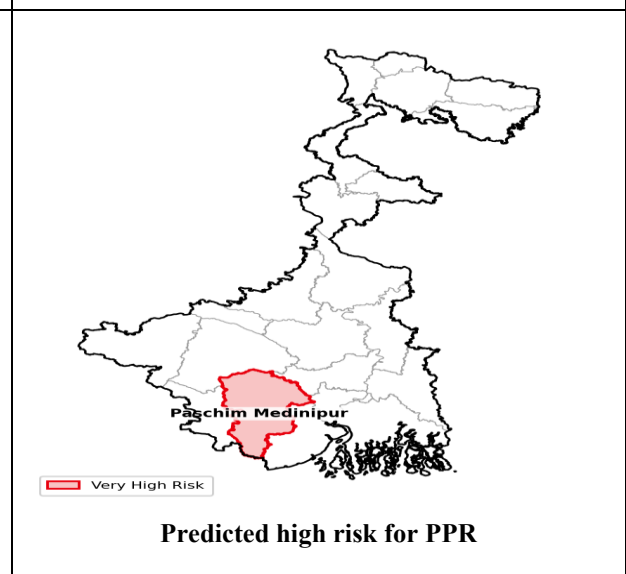

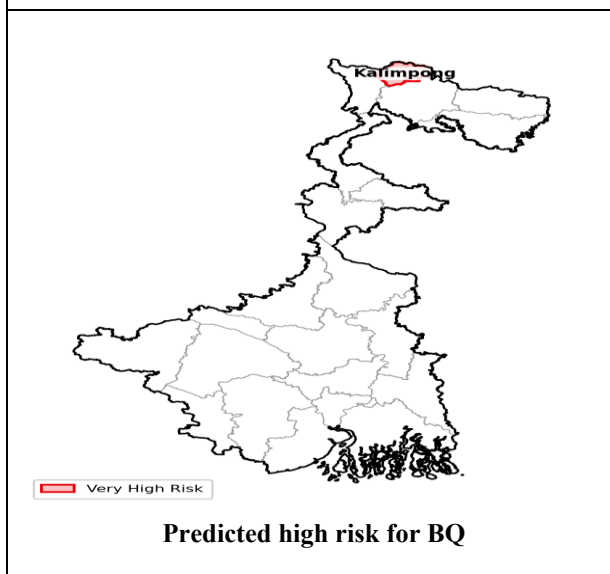

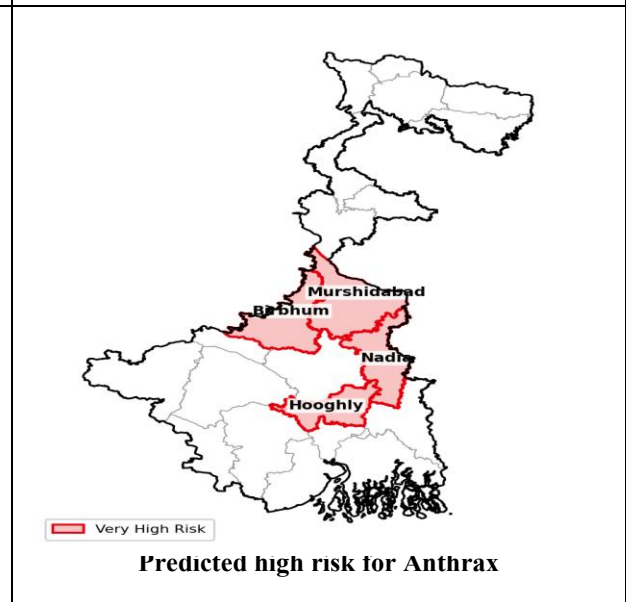

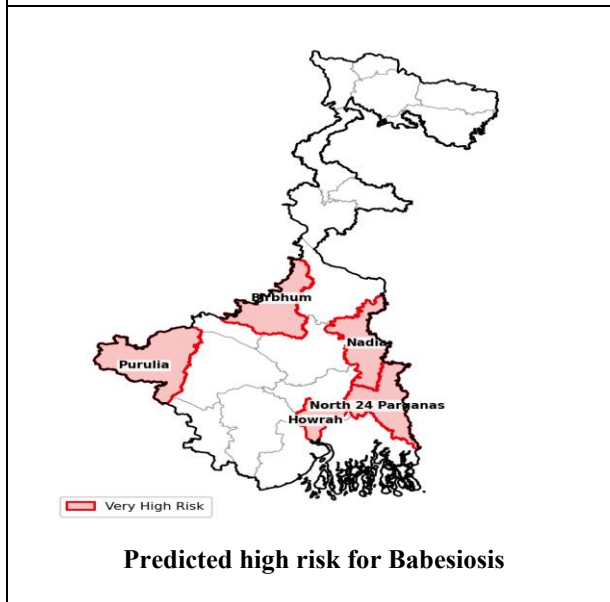

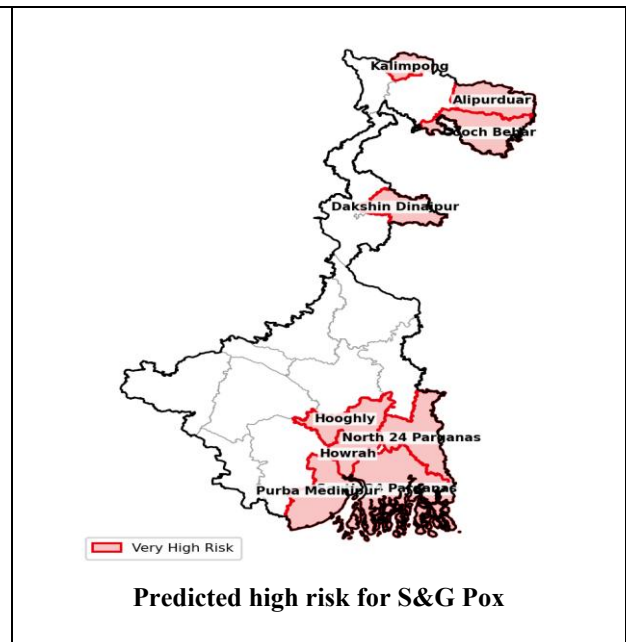

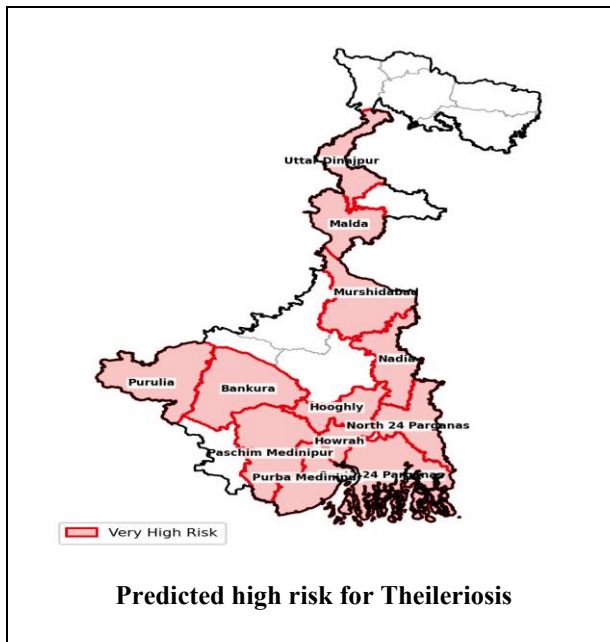

The livestock disease forecast for **West Bengal** for **November 2026**, generated using NADRES v2, an Artificial Intelligence-powered early warning system, indicates that **19** districts are at very high risk for **Anthrax, Babesiosis, BQ, FMD, PPR, S&G Pox** and **Theileriosis** showing the highest predicted risks.

I. Livestock Diseases with Predicted Risk in 19 Districts of West Bengal for November 2026

	Disease Name	Names of Districts
1.	Anthrax	Birbhum, Hooghly, Murshidabad and Nadia
2.	Babesiosis	Birbhum, Howrah, Nadia, North 24 Parganas and Purulia
3.	Black Quarter	Kalimpong
4.	Foot and Mouth Disease	Alipurduar, Bankura, Bardhaman, Dakshin Dinajpur, Howrah, Hooghly, Jhargram, Malda, Murshidabad, Nadia, North 24 Parganas, Paschim Medinipur, Purba Medinipur, Purulia, South 24 Parganas and Uttar Dinajpur
5.	Peste des Petits Ruminants	Paschim Medinipur
6.	Sheep and Goat pox	Alipurduar, Dakshin Dinajpur, Howrah, Hooghly, Kalimpong, Cooch Behar, North 24 Parganas, Purba Medinipur and South 24 Parganas
7.	Theileriosis	Bankura, Bardhaman, Howrah, Hooghly, Malda, Murshidabad, Nadia, North 24 Parganas, Paschim Medinipur, Purba Medinipur, Purulia, South 24 Parganas and Uttar Dinajpur

II. District-wise mapping of very high-risk areas for 7 diseases in West Bengal for the month of November 2026

3.34. Regions with No Predicted Risk for Livestock Diseases in November 2026

For the month of November 2026, there is **Lakshadweep, Chandigarh, Dadar & Nagar Haveli** union territories with no risk Predicted for any of the **15** livestock diseases.

4. Disease Risk Communication: Farmers Empowerment through Information Technology

I. Collaboration with FRUITS, NIC, Govt. Of Karnataka

In addition to NADRES V₂ (The National Animal Disease Referral Expert System), ICAR-NIVEDI collaborated with NIC, Govt. of Karnataka for sending the SMS alerts directly to the farmers who have registered in **FRUITS (Farmers Registration and Unified Beneficiary Information System)**. The information alerts on risk prediction of nine livestock diseases were sent through SMS to farmers is presented in Table A. During **August 2026**, a total of **25,17,127** SMS alerts were sent to farmers.

Table A: Number of famers received the SMS alert through the FRUITS application during **August 2026**

Disease	Districts	No. of Farmers Received SMS
Foot and mouth disease	Bangalore Urban	31,225
	Chamrajnagar	37,158
	Chikkaballapur	52,889
	Chikmagalur	24,266
	Chitradurga	28,282
	Dakshina Kannada	45,307
	Davangere	41,571
	Dharwad	30,001
	Gadag	20,311
	Hassan	110,467
	Haveri	41,608
	Kodagu	4,526
	Kolar	42,708
	Koppal	25,802
	Mandya	145,293
	Mysore	152,065
	Raichur	9,294
	Shimoga	53,622
	Tumkur	128,777
	Udupi	34,906
	Yadgir	598
Trypanosomiasis	Belgaum	76,029
Anthrax	Gulbarga	11,110
	Bellary	4,374
	Chitradurga	28,282
	Davangere	41,571
	Haveri	41,608
Lumpy Skin Diseases	Koppal	25,802
	Tumkur	128,777
	Bidar	14,279
	Chikmagalur	24,266
	Dharwad	30,001
	Hassan	110,467
	Koppal	25,802
	Mandya	145,293
Black quarter	Mysore	152,065
	Udupi	34,906
	Chikkaballapur	52,889
	Chitradurga	28,282
	Davangere	41,571
	Dharwad	30,001
	Haveri	41,608
	Kodagu	4,526
Haemorrhagic septicaemia	Kolar	42,708
	Mysore	152,065
	Tumkur	128,777
	Chitradurga	28,282
Fascioliasis	Gulbarga	11,110
	Total	25,17,127

II. Distributed Ledger Technology (DLT)

In November 2024, ICAR-NIVEDI expanded its livestock disease risk communication initiative by integrating Distributed Ledger Technology (DLT) from **Jio**, utilizing the Fast2SMS platform to target veterinary professionals within States. This advanced service is designed to provide veterinarians with real-time, reliable, and secure information on livestock disease outbreaks. By leveraging **DLT**, the initiative ensures efficient and authenticated dissemination of critical data, enabling frontline veterinary professionals to respond promptly and effectively to emerging disease threats, thereby enhancing livestock health and management across districts.

In November 2024, ICAR-NIVEDI disseminated a total of **1,848** SMS alerts to veterinary professionals in Karnataka, leveraging Distributed Ledger Technology (DLT) for effective communication. By December 2024, the initiative was expanded to include additional states of India, ensuring broader coverage. In December 2024, the service was further scaled to encompass 23 states, significantly enhancing the reach of disease risk communication to veterinarians across these regions. The distribution of SMS alerts during **August 2026** is detailed in Table B, which outlines the number of alerts sent to veterinarians. During this period, a total of **41,104** SMS alerts were successfully disseminated, reinforcing commitment to providing timely and critical disease risk information to veterinary professionals.

Table B: Number of veterinary doctors received SMS alert through DLT during **August 2026**

Sl. No.	State Name	Total SMS Sent
1	Andaman & Nicobar	42
2	Andhra Pradesh	12,765
3	Arunachal Pradesh	12
4	Assam	587
5	Bihar	13
6	Chhattisgarh	367
7	Delhi	66
8	Goa	80
9	Gujarat	2,352
10	Haryana	722
11	Himachal Pradesh	10
12	Jammu & Kashmir	4
13	Jharkhand	2,073
14	Karnataka	3,906
15	Kerala	6,866
16	Madhya Pradesh	925
17	Maharashtra	30
18	Manipur	175
19	Meghalaya	39
20	Mizoram	38
21	Nagaland	44
22	Odisha	1,268
23	Puducherry	6
24	Punjab	2
25	Rajasthan	34
26	Sikkim	128
27	Tamil Nadu	41
28	Telangana	482
29	Tripura	332
30	Uttar Pradesh	3,447
31	Uttarakhand	608
32	West Bengal	3,640
	Total	41,104

ICAR - National Institute of Veterinary Epidemiology and Disease Informatics

Customer/Client Feedback Form

Feedback for the Livestock Diseases Risk Forewarning Bulletin of September 2026, Volume 14 and Issue 09 (Please return this duly filled in after receiving the outbreak report of November 2026)

1. Details of the number of districts with diseases reported vs. forecast in your state.

Sl. No	Disease Name	No. of districts in which outbreaks occurred but not alerted**	Measures taken in case the disease is forecasted: Yes or No.**	Any other
Viral diseases				
1.	African Swine Fever			
2.	Bluetongue			
3.	Classical Swine Fever			
4.	Foot and Mouth Disease			
5.	Lumpy Skin Disease			
6.	Peste des Petits Ruminants			
7.	Sheep & Goat pox			
Parasitic diseases				
8.	Babesiosis			
9.	Fasciolosis			
10.	Theileriosis			
11.	Trypanosomosis			
Bacterial diseases				
12.	Anthrax			
13.	Black Quarter			
14.	Enterotoxaemia			
15.	Haemorrhagic Septicaemia			

** Please include the details for the remaining months that haven't been provided yet.

2. What are the preventive measures taken in case of predicted outbreaks?

3. How would you rate your satisfaction with the following aspects of the services you have received or accessed?

Description	Highly satisfied	Satisfied	Not Satisfied	Not sure
Quality of services provided				
Timeliness of alerts received				
Benefits from forecasting of livestock diseases				
Your awareness of this service				

4. Suggestions for further improvement of report.
